Dual Narrative Dynamics Dan Shen, 2022-12-30 Combining narratological and stylistic methods, this book theorizes dual narrative dynamics consisting of plot development and covert progression and demonstrates the consequences for the interpretation of literary works. In narratives with such dynamics, writers work simultaneously with overt and covert trajectories of signification, establishing a range of relationships between them. The two parallel narrative movements may complement, contradict or even subvert each other, and these relationships significantly influence readers' understanding not just of events but also of characters, themes, and aesthetic values. The book provides a systematic theoretical account of such previously neglected dual narrative dynamics, substantiated and enriched by the textual analysis of works by Ambrose Bierce, Kate Chopin, Franz Kafka, and Katherine Mansfield. The study explores the

many ways that these authors have used dual dynamics to increase the power of their narratives. In addition, the book identifies the challenges such dual dynamics present not only for narratology but also for stylistics and translation studies, and it develops sound and provocative proposals for meeting those challenges. In taking an interdisciplinary approach, this book will appeal to scholars and students in the fields of narrative and literary theory, literary criticism, literary stylistics, and translation studies.

Historical Archaeology of Gendered Lives Deborah Rotman, 2009-07-25 During the last half of the nineteenth century, a number of social and economic factors converged that resulted in the rural village of Deerfield, Massachusetts becoming almost entirely female. This drastic shift in population presents a unique lens through which to study gender roles and social relations in the late nineteenth and early twentieth century. The lessons gleaned from this case study will provide new insight to the study of gender relations throughout other historical periods as well. Through an intensive examination of both historical and archaeological evidence, the author presents a clear picture of the gendered social relations in Deerfield over the span of seventy years. While gender relations in urban settings have been studied extensively, this unique work provides the same level of examination to gender relations in a rural setting. Likewise, where previous studies have often focused only on relations between married men and women, the unique case of Deerfield provides insight into the experiences of single women, particularly widows and "spinsters". This work presents a unique contribution that will be essential for anyone studying the historical archaeology of gender, or gender roles in the Victorian era and beyond.
