Fallout Erwan Lafleuriel, 2019-06-21 The year was 1997 and Fallout: A Post Nuclear Role Playing Game had just been released by Interplay. This book looks back at the entire Fallout saga, tells the story of the series' birth, retraces its history and deciphers its mechanics. The perfect book to discover and understand the origins of Fallout, with the saga's genesis and the decryption of each of his episodes ! EXTRACT The intro music and the end credits were the final main components of this hybrid post-apocalyptic/50s ambiance. Initially, Brian Fargo wanted to signal Fallout's inspiration with Warriors of the Wasteland, by Frankie Goes to Hollywood, but when he heard The Ink Spots, he changed his mind and loved the result. The first choice was I Don't Want To Set The World On Fire by this group of crooners from the 1930s/40s, but unfortunately the high cost made it impossible to acquire the rights. But while browsing an extensive list of tracks from the era, the team found that Maybe, by the same group, had almost the same sound-with the added bonus of being cheap! The lyrics are about a break-up, from the point of view of the person being left behind: Maybe you'll think of me when you are all alone/ Then maybe you'll ask me to come back again. Leonard Boyarsky notes that, It worked with the intro [and the ending], referring to the ending with the betrayal and lonely exile of Fallout's hero. It felt like it was this genius plan we had [...] but it was only later that we decided to kick [the player] out of the Vault. I feel like this is a metaphor for the whole game: it looks like we had a better picture in mind than we did, it just came out of the things we were doing.

Popular Culture in Europe since 1800 Tobias Becker, Len Platt, 2023-09-28 This book tells the story of the history of popular culture in Europe since 1800, providing a framework which challenges traditional associations that have formulated popular culture firmly in relation to the post-1945 period and the economic power of the USA. Focusing on key themes associated with modernity – secularisation, industrialisation, social cohesion and control, globalisation and technological change – this synthesis of research across a very wide field fills a gap that has long been felt by students and educators working in the field of popular culture. While it is organised as a history of cultural forms, it can also be used across a wide range of social science and humanities programmes, including media and cultural studies, literary studies, sociology and European studies. Covering the subject with a broad number of themes, this book discusses popular culture through visual culture and performance, games, music, film, television and video games. Popular Culture in Europe since 1800 will be of interest to anyone looking for an engaged but concise overview of how book production and reading practices, visual cultures, music, performance and sports and games developed across Europe in the modern period.

Neoliberalism and Global Cinema Jyotsna Kapur, Keith B. Wagner, 2011-05-09 In cinema studies today, rarely do we find a direct investigation into the culture of capitalism and how it has been refracted and fabricated in global cinema production under neoliberalism. However, the current economic crisis and the subsequent Wall Street bailout in 2008 have brought about a worldwide skepticism regarding the last four decades of economic restructuring and the culture that has accompanied it. In this edited volume, an international ensemble of scholars looks at neoliberalism, both as culture and political economy, in the various cinemas of the world. In essays encompassing the cinemas of Asia, Africa, Latin America, Europe, and the United States the authors outline how the culture and subjectivities engendered by neoliberalism have been variously performed, contested, and reinforced in these cinemas. The premise of this book is that the cultural and economic logic of neoliberalism, i.e., the radical financialization and market-driven calculations, of all facets of society are symptoms best understood by Marxist theory and its analysis of the central antagonisms and contradictions of capital. Taking a variety of approaches, ranging from political economy, ideological critique, the intersection of aesthetics and politics, social history and critical-cultural theory, this volume offers a fresh, broad-based Marxist analysis of contemporary film/media. Topics include: the global albeit antagonistic nature of neoliberal culture; the search for a new aesthetic and documentary language; the contestation

between labor and capital in cultural production; the political economy of hollywood, and questions of gender, sexuality, and the nation state in relation to neoliberalism.

Co-Financing Hollywood Film Productions with Outside Investors Kay H. Hofmann,2012-10-28 Over the past two decades, investors from outside the motion picture industry have increasingly supplied equity to U.S. film productions. Today, these so-called co-financing arrangements are a common phenomenon in Hollywood. While the large studios usually carry out the operative tasks of movie production and distribution, the financiers as co-owners of the completed films have rights to the residual profits. Kay H. Hofmann analyzes the conflicts of interest and the organizational problems that may arise between the experienced major studios and investors with comparably low industry expertise. Guided by principal agent theory, the empirical analysis provides evidence for adverse selection and multiple aspects of moral hazard during production as well as distribution. Based on these findings, the author develops solutions that are not only relevant for current and future investors but also for studios and film producers who rely on the long-term availability of external funds.

The Digitization of Cinematic Visual Effects Rama Venkatasawmy,2013 While many books have addressed visual effects in Hollywood cinema, *The Digitization of Cinematic Visual Effects: Hollywood's Coming of Age*, by Rama Venkatasawmy, fills an important gap in cinematic analysis and film history by providing a periodization and techno-historical account of visual effects in Hollywood cinema.

Cinematic Flashes Rashna Wadia Richards,2013 *Cinematic Flashes* challenges popular notions of a uniform Hollywood style by disclosing uncanny networks of incongruities, coincidences, and contingencies at the margins of the cinematic frame. In an agile demonstration of cinephiliac historiography, Rashna Wadia Richards extracts intriguing film fragments from their seemingly ordinary narratives in order to explore what these unexpected moments reveal about the studio era. Inspired by Walter Benjamin's preference for studying cultural fragments rather than composing grand narratives, this unorthodox history of the films of the studio system reveals how classical Hollywood emerges as a disjointed network of accidents, excesses, and coincidences.
