Body Sensor Networks Guang-Zhong Yang,2014-04-16 The last decade has witnessed a rapid surge of interest in new sensing and monitoring devices for wellbeing and healthcare. One key development in this area is wireless, wearable and implantable in vivo monitoring and intervention. In the 2nd edition of this popular and authoritative reference on Body Sensor Networks (BSN), major topics related to the latest technological developments and potential clinical applications are discussed, with contents covering. Biosensor Design, Interfacing and Nanotechnology Wireless Communication and Network Topologies Communication Protocols and Standards Energy Harvesting and Power Delivery Ultra-low Power Bio-inspired Processing Multi-sensor Fusion and Context Aware Sensing Autonomic Sensing Wearable, Ingestible Sensor Integration and Exemplar Applications System Integration and Wireless Sensor Microsystems The book also provides a comprehensive review of the current wireless sensor development platforms and a step-by-step guide to developing your own BSN applications through the use of the BSN development kit.

Social Psychology E. Tory Higgins,Arie W. Kruglanski,1996-07-01 While social psychology has made fundamental contributions to the understanding of basic principles that underlie social behavior, these principles themselves--including expectancies, goals, explanations, arousal, social influence, interdependence, social conflict, persuasion, and social standards--have never been directly reviewed in a comprehensive manner. Filling a significant gap in the literature, this authoritative reference and text illuminates the essential processes, mechanisms, and structures at different levels of analysis--biological, cognitive, motivational, interpersonal, and group/cultural--to provide access to the central principles that guide social psychological investigation. Formatted for easy reference and comparison, each chapter describes alternative conceptualizations of a particular principle and reviews research supporting (and failing to support) these different perspectives. Covering all the significant theories and research programs, the empirical literature is surveyed not for the traditional function of providing comprehensive reviews of content areas, but for its relevance to broad conceptual issues. This enables readers to get a better idea of the big picture concerning various social psychological principles, facilitating their ability to keep track of conceptual trends and developments in social psychology. An essential tool for all social psychologists, as well as professionals in related fields, this authoritative handbook also serves as an invaluable text for advanced classes in social psychology.

Tightly edited chapters provide clear recommendations for adapting standard treatment protocols for tough-to-treat patients; enhancing motivation and homework compliance; dealing with common comorbidities; complementing CBT with other approaches; and targeting the factors that contribute to relapse and recurrence.

Cosmos Louise S. Milne,2015-12-31 Cosmos is the Journal of the Traditional Cosmology Society. Cosmos is concerned with exploring myth, religion and cosmology across cultural and disciplinary boundaries and with increasing understanding of world views in the past and present. We welcome all academic papers that contribute to our better knowledge about folk beliefs and legends, folktales, myths, rituals, music, art and crafts etc. from all over the world, and our better understanding of their underlying symbolic meanings, applying any method, from comparative, structural researches to presentations of fieldwork research discoveries, and so on. Papers are invited from all disciplines including, but not limited to, ethnology, anthropology, folklore studies, history, art history, archaeology, philology, literature, theology, medicine, psychology, musicology etc. While papers on any part of the world's mythological issues are welcomed, we would especially like to encourage more authors dealing with European mythology and worldview to submit their papers.
