The Multi Business Model Innovation Approach Peter Lindgren, 2022-09-01 It is argued in most academic literature that Business Model (BM) is a general model for how any business runs or should be run, it is the blueprint of the business. Conversely we argue that no business has just one BM, one model on which it runs all its business or intends to run its business. In other words the BM can be used for as-is and the to-be businesses. However our research, in contrast to the other BM frameworks, indicates that businesses have more BMs - both as-is and to-be BMs - the multi business model approach. This was already theoretically indicated by Markides and Charitou in 2004, and again in the Casadesus-Masanell and Ricart model of 2010, but sadly no one in the BM community has followed up on this since then. It could have made a breakthrough in our understanding of BMs, Business Model Innovation (BMI) and Strategic BMI. The Multi Business Model Innovation Approach addresses the concerns in the BM community and in BMI practice to just focus on the ideation and conceptualization of BMs. BM canvassing, innovating BM building blocks or BM dimensions when

carrying out BMI, so-called blind business model innovation, is not sufficient to run and understand a business today. BMs and BMI must address all the different levels in a business. All BMs are objects to BMI and should be used to maximize the performance and sustainability of the business. The core business and all levels BMs, such as BM dimension components, BM dimensions, BM portfolio, and Business Model Ecosystem (BMES), should all be considered for BMI. The book addresses and documents a gap in BM research and the BM community - but also proposes a generic definition and language of a BM and BMI layers. The significance and importance of this work is related to significant and unexplored possibilities that BMI offers today, and can offer tomorrow. When we thoroughly understand all levels, dimensions and components of the business and its business models, and we are able to communicate, work and innovate with business models at all levels together, then a next step in BM and BMI research and practice can be taken. It is proposed that any BMs are related to seven dimensions- value proposition, user and/or customer, value chain functions (internal), competence, network, relations and value formulae. It is further proposed that seven different levels of

a BMI from the most detailed level - the BM dimension component - to the BM dimension, BM, BM portfolio, business, and the vertical and horizontal business model ecosystem layer - and these can be objects to BMI. Conceptually, the Business Model Cube was formed using the seven dimensions which could be used both in a 2D and a 3D version.

Managerial Opportunity Recognition in Business Model Innovation Marijan Topic, 2017-11-06

Master's Thesis from the year 2017 in the subject Business economics - Business Management, Corporate Governance, Friedrich-Alexander University Erlangen-Nuremberg, language: English, abstract: The goal of this Master's thesis is to examine the relationship between managerial OR and business model innovations (BMIs) in established organizations. In order to meet the complexity of the topic, this thesis is focused on factors that hinder or help managers in recognizing business opportunities. Focusing on incumbent firms, this paper conducts further research to identify the main influencing factors, including challenges, vulnerabilities, and obstacles. The thesis is divided into six parts, starting with a brief description of the research topic, including the problem position and objective. Second, a literature review is conducted to summarize the state of research, including theoretical foundations. In today's scientific literature the two fields of research BMI & OR are by no means treated independently from each other. For the time being BMI and OR are considered independently of each other. It is then shown exactly how current literature treats managerial OR with

respect to BMI. The results are then synthesized into a summary, highlighting what is known and not known. The areas of controversy in the literature are identified and questions are formulated that need further research. The third part of the thesis consists of expert interviews. Derived from the literature review, a guideline for interviews is developed to treat the research gaps in an appropriate way and to meet the complexity of the task setting. The explorative survey aims to identify the challenges and drivers of managerial OR in BMI and to identify approaches that have not yet been addressed in scientific literature to a significant extent. The core of the analysis is the splitting of the BM into the elements value proposition, value creation, and value capture. This ensures that all the facets of a company's BM are accurately addressed and form the basis for high-quality results. In order to cover a broad range, the paper does not focus on a certain industry. The interviews are conducted with an array of decision-makers in organizations that have attempted or are currently attempting to innovate their BM at the business unit level or the corporate level.
