Launch! Advertising and Promotion in Real Time Michael Solomon, 2009 Launch! Advertising and Promotion is written for advertising and promotion courses taught to students in the business school and journalism & mass communication students. This textbook is the first of its kind to teach advertising concepts by reverse engineering a real advertising campaign from beginning to end. In April 2007, SS+K, an innovative New York City communications agency, launched the first ever branding campaign for msnbc.com with the tag A Fuller Spectrum of News. Launch! follows that campaign from initial agency pitch through roll-out of print and media assets to post-campaign analysis. Throughout, it exposes readers to the theory and concepts of advertising and promotion, and the personalities and decisions that drove this campaign. The book takes a rare look behind the curtain - even letting you see some of the paths not chosen by the agency and client. Students get a realistic sense of how theory plays out in practice, and get a flavor for the exciting field of advertising and promotion. And, they consistently learn the perspectives of both the advertising agency (where many journalism and communications students will work) and the client (where many marketing majors will work). This is a unique book, with a unique perspective, by a unique author team, and you won't find this kind of insight in any other text on the market. We think you're going to love it! This textbook has been used in classes at: Ball State University, Emerson College, Florida Institute of Technology, Grand Valley State University, Johnson County Community College, Manchester Business School, McLennan Community College, Michigan State University, North Hennepin Community College, Pierce College, Rochester Institute of Technology, Saint Louis University, Salem State College, South Dakota State University, Texas State University, Texas Tech University, University of New Hampshire, University of North Carolina, University of Notre Dame, University of South Florida, Virginia Tech, Western Kentucky University.

Oil Lamps II Catherine M. V. Thuro, 2019-02-04 The anticipated follow-up to Catherine Thuro's first volume on early lighting, Oil Lamps II: Glass Kerosene Lamps focuses specifically on cased glass, colored glass, and composite lamps that are hallmarks of the golden age of kerosene lighting. More than two hundred photographs showcase the extraordinary craftsmanship and artistic design that distinguish these illuminates. This is a visually delightful collection of beautiful and rare kerosene lamps and is sure to impress both the avid collector and novice alike. Author Catherine Thuro's years of extensive research is reflected in this comprehensive second volume in the three-part series. The complete set is considered to be required reading for those in the field of early lighting. The vast catalogue of manufacturer information and user-friendly pricing chart make Oil Lamps II a necessary addition to the library of all collectors and appraisers.

Oil Lamps Catherine M. V. Thuro, 2019-02-04 Near the turn of the twentieth century, the mass production of affordable lighting forever changed how we work, play, and live. This tectonic shift is directly related to the availability of cheap petroleum-based oil and the refinement of the kerosene lamp. Author Catherine Thuro devoted years of research to compiling a record of these formerly ubiquitous lighting devices. Oil Lamps is her first masterpiece: a comprehensive, invaluable resource. With over 1,000 lamps shown in detailed studio photographs, clearly reproduced illustrations from catalogues and trade journals, this book is the definitive visual compilation of kerosene lamps and accessories. The clear photography is also matched by detailed and engaging explanations about the origins of lamp styles. Thuro places the kerosene lamp in cultural and historical context, discussing the revolutionary large-scale production of these luminaries, the wide array of raw material used, and the far-reaching consequences of a society literally brought into the light on a massive scale. For both historical and comparative information, this is a must-have reference for collectors.

Oil Lamps 3 Catherine M. V. Turo, 2018-12-21 This informative and stunning book is the capstone in Catherine Thuro's three-part series on oil lamps. Focusing on trimmings, the jaw-dropping variety of models, and likely placement in the home, this book celebrates the convergence of appliance and art in the Kerosene Era.

Cyber Situational Awareness Sushil Jajodia,Peng Liu,Vipin Swarup,Cliff Wang,2009-10-03 Motivation for the Book This book seeks to establish the state of the art in the cyber situational awareness area and to set the course for future research. A multidisciplinary group of leading researchers from cyber security, cognitive science, and decision science areas elaborate on the fundamental challenges facing the research community and identify promising solution paths. Today, when a security incident occurs, the top three questions security administrators would ask are in essence: What has happened? Why did it happen? What should I do? Answers to the first two questions form the core of Cyber Situational Awareness. Whether the last question can be satisfactorily answered is greatly dependent upon the cyber situational awareness capability of an enterprise. A variety of computer and network security research topics (especially some systems security topics) belong to or touch the scope of Cyber Situational Awareness. However, the Cyber Situational Awareness capability of an enterprise is still very limited for several reasons: • Inaccurate and incomplete vulnerability analysis, intrusion detection, and forensics. • Lack of capability to monitor certain microscopic system/attack behavior. • Limited capability to transform/fuse/distill information into cyber intelligence. • Limited capability to handle uncertainty. • Existing system designs are not very “friendly” to Cyber Situational Awareness.

Warhol-isms Andy Warhol,2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well.I went to [a psychiatrist] once, and he never called me back.They always say that time changes things, but you actually have to change them yourself.I've never met a person I couldn't call a beauty.New things are always better than old things.I'm still a commercial artist. I was always a commercial artist.
