Biomass Conversion Chinnappan Baskar,Shikha Baskar,Ranjit S. Dhillon,2012-05-08 The consumption of petroleum has surged during the 20th century, at least partially because of the rise of the automobile industry. Today, fossil fuels such as coal, oil, and natural gas provide more than three quarters of the world's energy. Unfortunately, the growing demand for fossil fuel resources comes at a time of diminishing reserves of these nonrenewable resources. The worldwide reserves of oil are sufficient to supply energy and chemicals for only about another 40 years, causing widening concerns about rising oil prices. The use of biomass to produce energy is only one form of renewable energy that can be utilized to reduce the impact of energy production and use on the global environment. Biomass can be converted into three main products such as energy, biofuels and fine chemicals using a number of different processes. Today, it is a great challenge for researchers to find new environmentally benign methodology for biomass conversion, which are industrially profitable as well. This book focuses on the conversion of biomass to biofuels, bioenergy and fine chemicals with the interface of biotechnology, microbiology, chemistry and materials science. An international scientific authorship summarizes the state-of-the-art of the current research and gives an outlook on future developments.

The Conversion of Scandinavia Anders Winroth,2012-01-24 In this book a MacArthur Award-winning scholar argues for a radically new interpretation of the conversion of Scandinavia from paganism to Christianity in the early Middle Ages. Overturning the received narrative of Europe's military and religious conquest and colonization of the region, Anders Winroth contends that rather than acting as passive recipients, Scandinavians converted to Christianity because it was in individual chieftains' political, economic, and cultural interests to do so. Through a painstaking analysis and historical reconstruction of both archeological and literary sources, and drawing on scholarly work that has been unavailable in English, Winroth opens up new avenues for studying European ascendancy and the expansion of Christianity in the medieval period.

The Viking World Stefan Brink,Neil Price,2008-10-31 Filling a gap in the literature for an academically oriented volume on the Viking period, this unique book is a one-stop authoritative introduction to all the latest research in the field. Bringing together today's leading scholars, both established seniors and younger, cutting-edge academics, Stefan Brink and Neil Price have constructed the first single work to gather innovative research from a spectrum of disciplines (including archaeology, history, philology, comparative religion, numismatics and cultural geography) to create the most comprehensive Viking Age book of its kind ever attempted. Consisting of longer articles providing overviews of important themes, supported by shorter papers focusing on material of particular interest, this comprehensive volume covers such wide-ranging topics as social institutions, spatial issues, the Viking Age economy, warfare, beliefs, language, voyages, and links with medieval and Christian Europe. This original work, specifically oriented towards a university audience and the educated public, will have a self-evident place as an undergraduate course book and will be a standard work of reference for all those in the field.

Christianizing Peoples and Converting Individuals Guyda Armstrong,Ian N. Wood,2000 This selection of papers from the International Medieval Congress held at Leeds University in 1997, reflects the interest shown by those present, in the christianisation of Britain and the interface between Christians, Muslims and Jews.

Comparative Archaeologies Ludomir R Lozny,2011-04-06 Archaeology, as with all of the social sciences, has always been characterized by competing theoretical propositions based on diverse bodies of locally acquired data. In order to fulfill local, regional expectations, different goals have been assigned to the practitioners of Archaeology in different regions. These goals might be entrenched in local politics, or social expectations behind cultural heritage research. This comprehensive book explores regional archaeologies from a sociological perspective—to identify and explain regional differences in archaeological practice, as well as their existing similarities. This work covers not only the currently-dominant Anglo-American archaeological paradigm, but also Latin America, Western and Eastern Europe, Asia, and Africa, all of which have developed their own unique archaeological traditions. The contributions in this work cover these alternative archaeologies, in the context of their own geographical, political, and socio-economic settings, as well as the context of the currently accepted mainstream approaches.
