Quantum Photonics: Pioneering Advances and Emerging Applications Robert W. Boyd,Svetlana G. Lukishova,Victor N. Zadkov,2019-02-19 This book brings together reviews by internationally renowned experts on quantum optics and photonics. It describes novel experiments at the limit of single photons, and presents advances in this emerging research area. It also includes reprints and historical descriptions of some of the first pioneering experiments at a single-photon level and nonlinear optics, performed before the inception of lasers and modern light detectors, often with the human eye serving as a single-photon detector. The book comprises 19 chapters, 10 of which describe modern quantum photonics results, including single-photon sources, direct measurement of the photon's spatial wave function, nonlinear interactions and non-classical light, nanophotonics for room-temperature single-photon sources, time-multiplexed methods for optical quantum information processing, the role of photon statistics in visual perception, light-by-light coherent control using metamaterials, nonlinear nanoplasmonics, nonlinear polarization optics, and ultrafast nonlinear optics in the mid-infrared.

Energy Technology Innovation Arnulf Grubler,Charlie Wilson,2014 An edited volume on factors determining success or failure of energy technology innovation, for researchers and policy makers.

Developing Primary Mathematics Teaching Tim Rowland,Fay Turner,Anne Thwaites,Peter Huckstep,2009-03-09 How can KS1/2 teachers improve their mathematics teaching? This book helps readers to become better, more confident teachers of mathematics by enabling them to focus critically on what they know and what they do in the classroom. Building on their close observation of primary mathematics classrooms, the authors provide those starting out in the teaching profession with a four-stage framework which acts as a tool of support for developing their teaching:

- making sense of foundation knowledge
- focusing on what teachers know about mathematics
- transforming knowledge
- representing mathematics to learners through examples, analogies, illustrations and demonstrations
- connection
- helping learners to make sense of mathematics through understanding how ideas and concepts are linked to each other
- contingency - what to do when the unexpected happens

Each chapter includes practical activities, lesson descriptions and extracts of classroom transcripts to help teachers reflect on effective practice.

Popular Education, Power and Democracy Ann-Marie Laginder,Henrik Nordvall,Jim Crowther,2013 Popular education, a distinctive Swedish tradition of lifelong learning, has always concerned itself with the relationship between learning, power, and democracy in society, rather than having a purely individualistic and instrumental approach to learning for employability, which has dominated policy and practice. Through the themes of power and democracy, this book examines popular education's contribution to enhancing people's lives in communities. It reflects on the wider significance and explores the impact on the political culture of the state and the cultural politics of society within and outside Sweden, including the US, Japan, Canada, and Tanzania. As a comprehensive and unique

collection, the book balances historical reflection, contemporary issues, and the international impact of popular education, combining theoretical analysis and empirical data. *** ...this book provides a wonderful introduction to the historical development and some of the current aspects and examples of Swedish popular education, both in Sweden and beyond....Its various chapters show the continued relevance of popular education approaches to addressing major educational and social issues and their diversity and rich theoretical grounding provide enough stimuli to engage educators and practitioners alike....a key resource in the worldwide struggles for social justice by demonstrating how education can be both (a) a tool for social change as well as for personal transformation and (b) how insights gained from others' actions and struggles can be used by people the world over. -- Tom Nesbit, Canadian Association for the Study of Adult Education, in the European Journal for Research on the Education and Learning of Adults, 2013

Health Promotion Theory Cragg, Liza,Davies, Maggie,Macdowall, Wendy,2013-10-01 This fully updated edition will help students and professionals develop an understanding of the core health promotion theories.

Annelida Günter Purschke,Wilfried Westheide,Markus Böggemann,2020-02-24 This book is the second volume in a series of 4 volumes in the Handbook of Zoology series treating morphology, anatomy, reproduction, development, ecology, phylogeny, systematics and taxonomy of polychaetous Annelida. In this volume a comprehensive review of a few more derived higher taxa within Sedentaria are given, namely Sabellida, Opheliida/Capitellida as well as Hrabieillidae. The former comprise annelids possessing a body divided into two more or less distinct regions or tagmata called thorax and abdomen. Here two groups of families are united, the spioniform and sabelliform polychaetes. Especially Spionidae and Sabellidae are speciose families within this group and represent two of the largest annelid families. These animals live in various types of burrows or tubes and all possess so-called feeding palps. In one group these appendages are differentiated as grooved feeding palps, whereas in the other they may form highly elaborated circular tentacular crowns comprising a number of radioles mostly giving off numerous filamentous pinnulae. Often additionally colourful, the latter are also received the common names feather-duster worms, flowers of the sea, Christmas-tree worms. Opheliida/Capitellida including five families of truly worm-like annelids without appendages represents the contrary. Their members burrow in soft bottom substrates and may be classified as non-selective deposit feeders. Molecular phylogenetic analyses have shown that Echiura or spoon worms, formerly regarded to represent a separate phylum, are members of this group. Last not least Hrabieillidae is one out of only two families of oligochaete-like terrestrial polychaetes and for this reason received strong scientific interest.

A Faunal Review of Aleocharine Beetles in the Rapidly Changing Arctic and Subarctic Regions of North America (Coleoptera, Staphylinidae) Jan Klimaszewski,Adam Brunke,Derek S. Sikes,Mikko Pentinsaari,Benoit Godin,Reginald P. Webster,Anthony Davies,Caroline Bourdon,Alfred F. Newton,2021-08-27 Arctic and Subarctic North America is particularly affected by climate change, where average temperatures are rising three times faster than the global average. Documenting the changing climate/environment of the north requires a structured knowledge of indicator

taxa that reflect the effects of climate changes. Aleocharine beetles are a dominant group of forest insects, which are being used in many projects as indicators of environmental change. Many species are forest specialists restricted to certain microhabitats, some are generalists and others are open habitat specialists. They represent many ecological niches and, as such, are good indicators for many other species as well. The majority of Canadian aleocharine beetle species (about 600 spp.) has been studied and published by Jan Klimaszewski et al. (2018, 2020), mainly from southern, central, and western Canada, while the northern taxa remain poorly known and documented. The aim of the present book is to summarize the knowledge on this insect group in the Arctic and Subarctic North America and to provide a diagnostic and ecological tool for scientists studying and monitoring insects in northern Canada and Alaska. The book includes a review of the literature, information on 238 species and their habitats, taxonomic review, images, and identification tools.

Geocryology Stuart A. Harris, Anatoli Brouchkov, Cheng Guodong, 2017-09-28 This book provides a general survey of Geocryology, which is the study of frozen ground called permafrost. Frozen ground is the product of cold climates as well as a variety of environmental factors. Its major characteristic is the accumulation of large quantities of ice which may exceed 90% by volume. Soil water changing to ice results in ground heaving, while thawing of this ice produces ground subsidence often accompanied by soil flowage. Permafrost is very susceptible to changes in weather and climate as well as to changes in the microenvironment. Cold weather produces contraction of the ground, resulting in cracking of the soil as well as breakup of concrete, rock, etc. Thus permafrost regions have unique landforms and processes not found in warmer lands. The book is divided into three parts. Part 1 provides an introduction to the characteristics of permafrost. Four chapters deal with its definition and characteristics, the unique processes operating there, the factors affecting it, and its general distribution. Part 2 consists of seven chapters describing the characteristic landforms unique to these areas and the processes involved in their formation. Part 3 discusses the special problems encountered by engineers in construction projects including settlements, roads and railways, the oil and gas industry, mining, and the agricultural and forest industries. The three authors represent three countries and three language groups, and together have over 120 years of experience of working in permafrost areas throughout the world. The book contains over 300 illustrations and photographs, and includes an extensive bibliography in order to introduce the interested reader to the large current literature. Finalist of the 2019 PROSE Awards.

The VAT/GST Treatment of Public Bodies Oskar Henkow, 2013-01-01 Most VAT systems exclude public bodies from the scope of value added tax (VAT) systems. However, a movement to include public sector bodies within the GST system to some extent or even fully (as in New Zealand) is gaining momentum, and underlies the European Commission's 2011 study on the treatment and economic impact of exemptions in the public interest. Whether the present EU treatment really is as bad as some of its critics suggest, and whether the New Zealand model really is so perfect that jurisdictions with exclusion models ought simply to replace these existing systems with a New Zealand style system: these are the questions which triggered this research and which form the basis for the critical analysis

contained in this book. Using a system design point of view, the author focuses on VAT systems where exclusion or inclusion of public bodies are currently being applied and on how these models function. He presents an in-depth analysis of the major issues in this context, such as the treatment of public bodies as taxable persons, their right to deduct input VAT on acquisitions, and the treatment of the income of public bodies. Specific aspects examined [include the following: reallocation of funds and income vs. the production/distribution/consumption cycle; the concept of 'merit goods'; bias to self-supply instead of contracting out; preference to integrate vertically in the supply chain; applicability of VAT to government regulatory services; tax cascading in the public goods and services context; administration and compliance burden in government agencies; interpretational and implementation difficulties in EU Member States; and VAT compensation schemes in the public sector context, and whether these constitute illegal State aid. The book concludes with an insightful discussion of what might be considered as 'best practice' in relation to both the exclusion and full tax models. Beyond its thorough discussion of the treatment of public bodies in various VAT systems, and in the EU VAT system in particular, this is the first book on how a GST/VAT system may be designed to best accommodate public bodies, and as such it is sure to be warmly welcomed by practitioners, academics, and policymakers as a valuable contribution to the debate on the relation between VAT and public sector activities.

Foundations of Property Law Christian von Bar, 2023-08-25 Foundations of Property Law: Things as Objects of Property Rights is an abridged translation of the first volume of Christian von Bar's *Gemeineuropäisches Sachenrecht* -a milestone in European private law theory, and in comparative property law more broadly. Radical in content and scope, the English version examines the dynamics of interaction between the objects, contents, and holders of property. The conceptual framework of 'property law' is presented as a domain of erga omnes monopoly rights that govern the relationship between persons and objects of value. Within that framework, a reciprocal relationship is illustrated between property rights and their objects; property rights play a role in constituting the very objects (things) in which they are held. With comprehensive comparative analysis, insights are gleaned from all the jurisdictions of the European Union and the United Kingdom, presenting a critical evaluation of property law systems in both Common and Civil Law traditions. This book joins all the national legal systems in a single inquiry, treating their traditions and arguments with the respect they deserve and taking advantage of the knowledge embodied in the diversity of European private law. A scholastic work, offering deep and unique insights into the European property law systems, *Foundations of Property Law* will quickly become a go-to resource for anyone interested in European private law and comparative property law.

Climate Change in Cities Sara Hughes, Eric K. Chu, Susan G. Mason, 2017-09-27 This book presents pioneering work on a range of innovative practices, experiments, and ideas that are becoming an integral part of urban climate change governance in the 21st century. Theoretically, the book builds on nearly two decades of scholarships identifying the emergence of new urban actors, spaces and political dynamics in response to climate change priorities. However, it further articulates and applies the concepts associated with urban climate change governance by

bridging formerly disparate disciplines and approaches. Empirically, the chapters investigate new multi-level urban governance arrangements from around the world, and leverage the insights they provide for both theory and practice. Cities - both as political and material entities - are increasingly playing a critical role in shaping the trajectory and impacts of climate change action. However, their policy, planning, and governance responses to climate change are fraught with tension and contradictions. While on one hand local actors play a central role in designing institutions, infrastructures, and behaviors that drive decarbonization and adaptation to changing climatic conditions, their options and incentives are inextricably enmeshed within broader political and economic processes. Resolving these tensions and contradictions is likely to require innovative and multi-level approaches to governing climate change in the city: new interactions, new political actors, new ways of coordinating and mobilizing resources, and new frameworks and technical capacities for decision making. We focus explicitly on those innovations that produce new relationships between levels of government, between government and citizens, and among governments, the private sector, and transnational and civil society actors. A more comprehensive understanding is needed of the innovative approaches being used to navigate the complex networks and relationships that constitute contemporary multi-level urban climate change governance. Debra Roberts, Co-Chair, Working Group II, IPCC 6th Assessment Report (AR6) and Acting Head, Sustainable and Resilient City Initiatives, Durban, South Africa "Climate Change in Cities offers a refreshingly frank view of how complex cities and city processes really are." Christopher Gore, Associate Professor and Chair, Department of Politics and Public Administration, Ryerson University, Canada "This book is a rare and welcome contribution engaging critically with questions about cities as central actors in multilevel climate governance but it does so recognizing that there are lessons from cities in both the Global North and South." Harriet Bulkeley, Professor of Geography, Durham University, United Kingdom "This timely collection provides new insights into how cities can put their rhetoric into action on the ground and explores just how this promise can be realised in cities across the world - from California to Canada, India to Indonesia."

Queer Methods and Methodologies Catherine J. Nash, 2016-04-15 Queer Methods and Methodologies provides the first systematic consideration of the implications of a queer perspective in the pursuit of social scientific research. This volume grapples with key contemporary questions regarding the methodological implications for social science research undertaken from diverse queer perspectives, and explores the limitations and potentials of queer engagements with social science research techniques and methodologies. With contributors based in the UK, USA, Canada, Sweden, New Zealand and Australia, this truly international volume will appeal to anyone pursuing research at the intersections between social scientific research and queer perspectives, as well as those engaging with methodological considerations in social science research more broadly.

YSEC Yearbook of Socio-Economic Constitutions 2022 Eva Storskrubb, 2023-11-13 Funding of justice has significant consequences for the enforcement of rights and impacts directly on access to justice and the right to a fair trial as constitutional rights. Access to justice in turn essentially impacts on the effective enjoyment of any other

constitutional right, since having the actual means to access a court in case of a potential breach strengthens that right. Public funding, such as legal aid, has come under pressure due to the reality of financial austerity measures and the tightening public budgets in many countries. This has contributed to privatization and marketisation of funding in ever more jurisdictions. Private forms of funding include inter alia litigation insurance, third-party litigation finance and crowdfunding, as well as different forms of assigning or selling claims. As public funding is in decline and as market liberalization in the field of justice increases, crucial questions related to the rule of law, access to justice and social and economic development, in the intersection between states, citizens and business are raised. For example, potential questions of conflict of interest and how to ensure a basic level of equality of access to funding, whilst at the same time protecting market freedom. Some of the contributions in the volume deal with the consequences of privatization of funding of justice on access to justice from a general, principled and theoretical perspective. Other contributions deal with specific regulatory developments or issues at the EU level, alternatively at the local level in specific jurisdictions. Further contributions deal with crucial issues of funding of justice in environmental matters, that are increasingly relevant and topical in practice.

The Indigenous Identity of the South Saami Håkon Hermanstrand, Asbjørn Kolberg, Trond Risto Nilssen, Leiv Sem, 2019-02-01 This open access book is a novel contribution in two ways: It is a multi-disciplinary examination of the indigenous South Saami people in Fennoscandia, a social and cultural group that often is overlooked as it is a minority within the Saami minority. Based on both historical material such as archaeological evidence, 20th century newspapers, and postcard motives as well as current sources such as ongoing land-right trials and recent works of historiography, the articles highlight the culture and living conditions of this indigenous group, mapping the negotiations of different identities through the interaction of Saami and non-Saami people through the ages. By illuminating this under-researched field, the volume also enriches the more general debate on global indigenous history, and sheds light on the construction of a Scandinavian identity and the limits of the welfare state and the myth of heterogeneity and equality.

Water Utility Benchmarking Sanford Berg, 2010-03-31 Benchmarking is essential for those developing and implementing water policy. If decision-makers do not know where they have been or where they are, it would seem to be impossible to set reasonable targets for future performance. Information on water/sewerage system (WSS) operations, investments, and outputs is essential for good management and oversight. This book is designed to help decision makers identify the data required for performance comparisons over time and across water utilities, to understand the strengths and limitations of alternative benchmarking methodologies, and to perform (or commission) benchmark studies. This book provides an overview of the strengths and limitations of different methodologies for making performance comparisons over time and across water utilities (metric benchmarking). In addition, it identifies ways to determine the robustness of performance rankings. Current benchmarking activities in Latin

America, Asia, Africa, Central Europe/Asia, and OECD nations are summarized. Five basic approaches to benchmarking characterize current studies: Core indicators and a summary or overall performance Indicator (partial metric method), Performance scores based on production or cost estimates ("total" methods), Performance relative to a model company (engineering approach), Process benchmarking, and Customer survey benchmarking. This volume is of interest to the water professionals, water utility managers and senior staff of regulatory agencies, professionals in related government agencies, and consultants. Measuring the Master Race Jon Røyne Kyllingstad, 2014-12-22 The notion of a superior 'Germanic' or 'Nordic' race was a central theme in Nazi ideology. But it was also a commonly accepted idea in the early twentieth century, an actual scientific concept originating from anthropological research on the physical characteristics of Europeans. The Scandinavian Peninsula was considered to be the historical cradle and the heartland of this 'master race'. *Measuring the Master Race* investigates the role played by Scandinavian scholars in inventing this so-called superior race, and discusses how the concept stamped Norwegian physical anthropology, prehistory, national identity and the eugenics movement. It also explores the decline and scientific discrediting of these ideas in the 1930s as they came to be associated with the genetic cleansing of Nazi Germany. This is the first comprehensive study of Norwegian physical anthropology. Its findings shed new light on current political and scientific debates about race across the globe.
