Mean Body Weight, Height, and Body Mass Index Cynthia L. Ogden,2004

Body Mass Index and Health Linda A. Ferrera,2005 The Federal guidelines on the identification, evaluation, and treatment of overweight and obesity in adults have defined overweight as a body mass index value between 25 and 29.9; and obesity as a body mass index value greater than or equal to 30. BMI is a ratio between weight and height. It is a mathematical formula that correlates with body fat, used to evaluate if a person is at an unhealthy weight (given a certain height). BMI value is more useful for predicting health risks than the weight alone (for adults ages 18 and up). Individuals with high BMI's are at increased risk of developing certain diseases, including: Hypertension, Cardiovascular Disease, Dyslipidemia, Adult-Onset Diabetes (Type II), Sleep Apnea, Osteoarthritis, Female Infertility, and other Conditions, including: idiopathic intracranial hypertension lower extremity venous stasis disease, gastroesophageal reflux and urinary stress incontinence. This new book gathers research from around the world in the critical field of obesity research and its effects.

Obesity Judith S. Stern,Alexandra Kazaks,2015-10-13 Obesity has reached epidemic proportions in countries like the United States. This book provides a comprehensive summary of obesity in America and around the world, discussing the causes and proposing ways to help stem the tide and to help

those who are overweight. A highly useful and accessible resource for high school to undergraduate students as well as post-graduate level readers with an interest in health and nutrition, this updated second edition of Obesity: A Reference Handbook offers up-to-date answers to essential questions about obesity and connected societal and health care-related issues. A single-volume, go-to resource, this book addresses difficult questions such as whether obesity is a disease or a moral failing; what factors contribute to obesity; what the economic impacts of obesity are on the health care industry; if and how poverty is a contributor to obesity; how our society encourages obesity; and how changes can be made to improve our society's eating habits as a whole. It presents citations from individuals and peer-reviewed journals and review articles, providing a balance of information sourced from both professionals and informed lay commentators. Also included are dozens of biographies of individuals who have been important in studying, preventing, managing, or increasing awareness about obesity, such as Jared Fogle, longtime Subway sandwiches spokesperson; Kelly Brownell, who coined the phrase toxic environment to describe unhealthy food and exercise patterns; researcher Ethan Allen Sims, who examined the relationship between obesity and diabetes; and Oprah Winfrey, well-known celebrity who stated that if there were a pill to lose weight or a magic diet, she would have it.

Novel Molecular Targets and Treatments for Gastroesophageal Cancer, 2nd edition Bin Li,Alfred King-yin Lam,Linhui Liang,Jianjun Xie,Wen Wen

Xu,2024-01-10 Gastroesophageal cancer is among the most common malignant diseases worldwide and is associated with high mortality rates, leading to a substantial burden on public health and healthcare systems around the world. Chemotherapeutic drugs have achieved great success in the treatment of esophageal cancer; however, they also bring cytotoxicity to other organs and often have serious side effects. With the development of molecular diagnostics and biomarker discovery, the application of precision medicine has emerged to improve clinical outcomes. New antineoplastic therapy development is a timely topic in light of the recent development of precision medicine. New biotherapies aim to inhibit or regulate different targets, which are thought to be functionally selective or overexpressed in some types of tumors. In particular, progress has been made to understand the molecular biology of gastrointestinal cancer, resulting in the discovery of various molecular targets, such as KRAS, PD-1, PD-L1, EGFR, HER2 and VEGF. Moreover, anticancer agents, such as pembrolizumab, olaparib, trastuzumab, bevacizumab, either as single agents or in combination with conventional chemotherapy, have become part of the standard of care for treatment of advanced gastroesophageal cancer. This Research Topic provides a platform for recent studies on novel molecular targets and treatments for gastroesophageal cancer. Both Original Research articles and Reviews are welcome. Subjects may include but are not limited to: 1) Oncogenes and tumor suppressors; 2) Drug sensitivity/resistance; 3) Tumor metastasis and tumor microenvironment; 4)

Biomarker discovery and epigenetic regulation.

Do I Count? Gunter M. Ziegler,2013-07-22 The subject of mathematics is not something distant, strange, and abstract that you can only learn about—and often dislike—in school. It is in everyday situations, such as housekeeping, communications, traffic, and weather reports. Taking you on a trip into the world of mathematics, Do I Count? Stories from Mathematics describes in a clear and captivating way the people behind the numbers and the places where mathematics is made. Written by top scientist and engaging storyteller Günter M. Ziegler and translated by Thomas von Foerster, the book presents mathematics and mathematicians in a manner that you have not previously encountered. It guides you on a scenic tour through the field, pointing out which beds were useful in constructing which theorems and which notebooks list the prizes for solving particular problems. Forgoing esoteric areas, the text relates mathematics to celebrities, history, travel, politics, science and technology, weather, clever puzzles, and the future. Can bees count? Is 13 bad luck? Are there equations for everything? What's the real practical value of the Pythagorean Theorem? Are there Sudoku puzzles with fewer than 17 entries and just one solution? Where and how do mathematicians work? Who invented proofs and why do we need them? Why is there no Nobel Prize for mathematics? What kind of life did Paul Erdős lead? Find out the answers to these and other questions in this entertaining book of stories. You'll see that everyone counts, but no computation is needed.

Why Calories Don't Count Giles Yeo,2021-12-07 A Cambridge obesity researcher upends everything we thought we knew about calories and calorie-counting. Calorie information is ubiquitous. On packaged food, restaurant menus, and online recipes we see authoritative numbers that tell us the calorie count of what we're about to consume. And we treat these numbers as gospel—counting, cutting, intermittently consuming and, if you believe some 'experts' out there, magically making them disappear. We all know, and governments advise, that losing weight is just a matter of burning more calories than we consume. But it's actually all wrong. In Why Calories Don't Count, Dr. Giles Yeo, an obesity researcher at Cambridge University, challenges the conventional model and demonstrates that all calories are not created equal. He addresses why popular diets succeed, at least in the short term, and why they ultimately fail, and what your environment has to do with your bodyweight. Once you understand that calories don't count, you can begin to make different decisions about how you choose to eat, learning what you really need to be counting instead. Practical, science-based and full of illuminating anecdotes, this is the most entertaining dietary advice you'll ever read.

The Obesity Reality Naheed Ali,2012 The Obesity Reality discusses obesity's effects from a wide range of standpoints, including medical, personal, financial, and preventative. It reminds readers that solving the world's obesity problem requires both a personal and a much larger collective effort.

Nutrition Monitoring in the United States ,1993 Contains reports from Interagency Board for Nutrition Monitoring and Related Research agencies that highlight recent findings or trend data from some of the activities in the Nutrition Monitoring Program. The reports provide a sampling of the variety of data available in the NNMRRP. The Chartbook is divided into five sections that reflect the five measurement areas of the Nutrition Monitoring Program. These are nutritional status and related health measurements; food and nutrient consumption; knowledge, attitudes, and behavior assessments; food composition and nutrient data bases; and food supply determinations.

Why Calories Count Marion Nestle,Malden Nesheim,2012-04-18 Explores food issues in America including understanding how calories work in the body and understanding how the food industry presents calories on labels.

Journal of the National Cancer Institute ,2004 Each issue is packed with extensive news about important cancer related science, policy, politics and people. Plus, there are editorials and reviews by experts in the field, book reviews, and commentary on timely topics.

Fat Bloke Slims Bruce Byron,2009-01-01 Bruce Byron is a popular character in The Bill. He's about three to four stones overweight, nearing fifty and, in his own words, a heart attack waiting to happen. 'You see, I have a weight issue - the issue being that I have too much of it. Currently in the UK around six in ten men are medically defined as overweight and one in six as

obese. Obesity in the UK has more than doubled in the past eighteen years, amongst blokes it's tripled and with this come increased risks to our health including heart disease - the UK's biggest killer. According to my friends at the British Heart Foundation, heart disease kills one in five males. It is responsible for 32% of premature deaths in males. Someone in the UK has a heart attack every two minutes. That could be me. So, here we are. This is the documented journey of a soon to be fifty-year-old, seriously overweight man who works long hours and wants to be around to see his children grow up, a man who wants to play and do exciting activities with my family, enjoy growing old with my beautiful wife and be around long enough to enjoy the rewards of our very hard-earned success. Today's the day I stop making excuses.'
