Gaming Utopia Claudia Costa Pederson,2021-04-06 In *Gaming Utopia: Ludic Worlds in Art, Design, and Media*, Claudia Costa Pederson analyzes modernist avant-garde and contemporary video games to challenge the idea that gaming is an exclusively white, heterosexual, male, corporatized leisure activity and reenvision it as a catalyst for social change. By looking at over fifty projects that together span a century and the world, Pederson explores the capacity for sociopolitical commentary in virtual and digital realms and highlights contributions to the history of gaming by women, queer, and transnational artists. The result is a critical tool for understanding video games as imaginative forms of living that offer alternatives to our current reality. With an interdisciplinary approach, *Gaming Utopia* emphasizes how game design, creation, and play can become political forms of social protest and examines the ways that games as art open doors to a more just and peaceful world.
