PC Hacks Jim Aspinwall,2005 Presents information on getting the most out of a PC's hardware and software, covering such topics as upgrading the BIOS, configuring the hard drive, installing more RAM, improving CPU performance, and adding COM ports.

Focke-Wulf Fw 190 "long Nose" Dietmar Harmann,2003 This book covers the complete development history of those variants of the Focke-Wulf Fw 190 powered by inline engines. The first Fw 190 equipped with a Daimler Benz liquid-cooled engine took to the air in early 1942, followed six months later by another powered by a Jumo 213. Production of the Fw 190 C, Fw 190 D and Ta 153 was delayed by the German air ministry. Not until 1944, by which time Germany had lost control of the air, did the Fw 190 D-9, an interim fighter powered by the Jumo 213 A, enter production. The Fw 190 D-9 proved an immediate success, largely due to an excellent prototype test program under Dipl.Ing. Hans Sander. The type quickly entered service with the Luftwaffe and more than 1,700 examples were completed by the end of the war. The Fw 190 D-9 gave rise to a number of improved variants with the more powerful Jumo 213 F engine and a heavier armament, however only a handful of the D-11 and D-13 versions were completed. With a maximum speed of 750 km/h, the Fw 190 D-12 powered by the new Jumo 213 EB would have represented the apex of Fw 190 development. The proposed Fw 190 D-14 and D-15, both powered by improved versions of the dive-bombers 603, came too late to see service with the Luftwaffe.

The Neoliberal Diet Gerardo Otero,2018-10-03 This “remarkable, comprehensive” study of neoliberal agribusiness and the obesity epidemic “is critical reading for food studies scholars” (Contemporary Sociology). Obesity rates are rising across the United States and beyond. While some claim that people simply eat too much “energy-dense” food while exercising too little, The Neoliberal Diet argues that the issue is larger than individual lifestyle choices. Since the 1980s, the shift toward neoliberal regulation has enabled agribusiness multinationals to thrive by selling a combination of meat and highly processed foods loaded with refined flour and sugars—a diet that originated in the United States. Drawing on extensive empirical data, Gerardo Otero identifies the socioeconomic and political forces that created this diet, which has been exported around the globe at the expense of people’s health. Otero shows how state-level actions, particularly subsidies for big farms and agribusiness, have ensured the dominance of processed foods and made fresh foods inaccessible to many. Comparing agrifood performance across several nations, including the NAFTA region, and correlating food access to class inequality, he convincingly demonstrates the structural character of food production and the effect of inequality on individual food choices. Resolving the global obesity crisis, Otero concludes, lies not in blaming individuals but in creating state-level programs to reduce inequality and make healthier food accessible to all.

The Economics of Rural Organization Karla Hoff,Avishay Braverman,Joseph E. Stiglitz,1993 A key to understanding why some rural development policies succeed and some fail is found in this book. The editors contend that established economic models are inadequate to interpret the behavior of rural markets and nonmarket institutions. This book investigates economic institutions and contractual arrangements in credit, labor, and land markets and analyzes their implications for the behavior of the rural sector. Drawing on 15 short case studies, five overview and nine theoretical chapters explore some of the most pressing problems facing developing countries: how to promote financial integration of the rural sector, how to rationalize the use of land and water, and how to design and administer tax and transfer policies. The book contributes to theory, empirical methodology, and the solution of concrete policy questions.

Polish Migration to the UK in the 'New' European Union Kathy Burrell,2016-04-22 Since the 2004 enlargement of the European Union over half a million Polish migrants have registered to work in the United Kingdom, constituting one of the largest migration movements in contemporary Europe. Drawing on research undertaken across a wide range of disciplines - history, economics, sociology, anthropology, film studies and discourse analysis -

and focusing on both the Polish and British aspects of this phenomenon - both emigration and immigration - this edited collection investigates what is actually new about this migration flow, what its causes and consequences are, and how these migrants' lives have changed by moving to the United Kingdom. As the first book to deal with Polish migration to the United Kingdom, Polish Migration to the UK in the 'New' European Union will appeal to scholars across a range of social sciences, whose work concerns migration and the migration process.

The Oxford Handbook of Lexicography Philip Durkin, 2016 This volume provides concise, authoritative accounts of the approaches and methodologies of modern lexicography and of the aims and qualities of its end products. Leading scholars and professional lexicographers, from all over the world and representing all the main traditions and perspectives, assess the state of the art in every aspect of research and practice. The book is divided into four parts, reflecting the main types of lexicography. Part I looks at synchronic dictionaries - those for the general public, monolingual dictionaries for second-language learners, and bilingual dictionaries. Part II and III are devoted to the distinctive methodologies and concerns of the historical dictionaries and specialist dictionaries respectively, while chapters in Part IV examine specific topics such as description and prescription; the representation of pronunciation; and the practicalities of dictionary production. The book ends with a chronology of the major events in the history of lexicography. It will be a valuable resource for students, scholars, and practitioners in the field.

The Quiet Revolution in Staple Food Value Chains Asian Development Bank, 2012-12-01 Major changes have been occurring almost unnoticed in staple value chains in Asia. The Quiet Revolution in Staple Food Value Chains documents and explains the transformation of value chains moving rice and potatoes between the farm gate and the consumer in Bangladesh, the People's Republic of China, and India. The changes noted are the rapid rise of supermarkets, modern cold storage facilities, large rice mills, and commercialized small farmers using input-intensive, mechanized technologies. These changes affect food security in ways that are highly relevant for policymakers across Asia—the rise of supermarkets provides cheaper staples, more direct relations in the chains combined with branding have increased traceability, and the rise of cold storage has brought higher incomes for potato farmers and all-season access for potato consumers. The book also joins two debates that have long been separate and parallel—food industry and agribusiness development and market competitiveness—with the food security and poverty alleviation agenda.

E-Lexicography Pedro A. Fuertes-Olivera, Henning Bergenholtz, 2011-10-20 This book looks at current research and future directions in e-lexicography. Online dictionaries and reference tools are increasingly prevalent in a digitized and internet-led era in language study that has embraced computational linguistics. This book responds with theoretical and practical analysis of key topics, from a global range of contributors. Since COBUILD in the 1980s, lexicographers have found it essential to engage with and utilize electronic computational tools. Internet dictionaries, online reference tools and even search engine optimization demand a knowledge of electronic lexicography and force a reassessment of the field. This volume looks at, amongst other topics: • Polyfunctional versus monofunctional dictionary tools • Developing theories of lexicography for electronic mediums • Distinguishing between the database and the dictionary • Online dictionaries not as data repositories but as sophisticated search engines This volume will appeal to scholars in lexicography and to practicing lexicographers.

Electronic Lexicography Sylviane Granger, Magali Paquot, 2012-10-25 This book brings together leading professional and academic lexicographers to report on current developments in the deployment of electronic means in the planning, writing, and dissemination of dictionaries. Every major aspect of electronic lexicography is covered by the book including dictionary types (general and specialized dictionaries, monolingual and multilingual dictionaries, collocation dictionaries, sign dictionaries, collaborative dictionaries) in a range of formats (CD-ROM, web-based, handheld), dictionary-writing systems, integration of corpora. The book also addresses the implications of electronic dictionary-making for

lexicographic theory and illustrates how the new developments are integrated into innovative dictionary projects like Wiktionary. The perspective of the user is considered throughout the book, including how electronic dictionaries take account of user needs and whether and how users take advantages of the new features afforded by the electronic medium. This state-of-the-art account of developments in one of the most vibrant areas of reference publishing and language research will appeal to everyone concerned with current lexicography.

Theory and Practice of Specialised Online Dictionaries Pedro A. Fuertes-Olivera, Sven Tarp, 2014-09-23 This book is the first comprehensive monograph on the Function Theory of Lexicography, which originated at the Aarhus School of Business (Aarhus University). Function Theory considers dictionaries to be tools that are constructed for assisting specific users with punctual needs in specific usage situations, e.g. communicative-oriented situations and cognitive-oriented situations. The book's main focus is on defending the independent academic status of lexicography and its corollary: The process of designing, compiling and updating (specialised) online dictionaries needs a theoretical framework that addresses general and specific aspects. The former are common to all types of information tools, the latter are mainly dependent on the media for which the information tool is constructed and their specific target users. This book offers both aspects and moves from the highest level of abstraction to very detailed aspects of lexicographic work, e.g. how to convert an originally-conceived polyfunctional online dictionary into several monofunctional usage-based ones. The book illustrates that the theory and the methodology currently used by advocates of the Function Theory of Lexicography offers better results than other approaches and therefore makes its case for proposing the Function Theory for terminological/terminographical work.

Regoverning Markets Derek Ray, Dr Bill Vorley, Mr Andrew Fearn, 2012-09-28 The internationalisation of food retailing and manufacturing that has swept through the agri-food system in industrialised countries is now moving into middle- and low-income countries with large rural populations, causing significant institutional changes that affect small producer agriculture and the livelihoods of rural communities the world over. Farmers and policy-makers are struggling to keep up with the wave of new demands being made on their supply chains by food manufacturers and retailers. In the process, new questions and challenges are arising: Can small-scale farmers organise to meet the demands of corporate giants? Should governments liberalise Foreign Direct Investment in the retail sector and expose numerous small shops to competition from multinationals? Can distribution systems be adapted to make markets work better for the poor? This book offers a contemporary look at what happens when the modernisation of food supply chains comes face to face with the livelihoods of rural and poor people. The authors are drawn from eighteen countries participating in the 'Regoverning Markets' programme, which aims to not only improve our understanding of the way modernisation and re-structuring of food supply chains is affecting food production and distribution systems, but also identify best-practice in involving small-scale producers in supermarket supply chains, and ascertain the barriers to inclusion which need to be removed. The book is aimed primarily at academics but will also appeal to practitioners in developing countries, civil servants, policy-makers and NGOs.

Exploring Christian Heritage C. Douglas Weaver, Rady Roldán-Figueroa, 2017 Exploring Christian Heritage provides students and teachers with a rich and substantial introduction to the texts that have shaped the Christian faith. Including works by Augustine, Aquinas, Martin Luther, John Wesley, John Calvin, and Karl Barth, among others, this collection also highlights essential movements--from the second to the twenty-first centuries--often glossed over in primary source readers. From Pentecostalism and Baptists to feminism and religious liberty movements, Exploring Christian Heritage succinctly joins together the most influential voices of Christian history and theology with those that have been forgotten and sometimes ignored. Now in its second edition, voices ancient and modern have been added to deepen and widen the story of Christianity in varied forms.

Exploring Christian Heritage, second edition also contains additional classroom resources, including new textual introductions and over ninety new quizzes.

Cultures, Ideologies, and the Dictionary Braj B. Kachru, Henry Kahane, 2013-03-01 A pioneering volume addressing issues related to cultures, ideologies, and the dictionary. A cross-cultural and cross-linguistic study with focus on selected Western and non-Western languages. A number of in-depth case studies illustrates the dominant role ideology and other types of bias play in the making of a dictionary. The volume includes invited papers of 40 internationally recognized scholars.

Lexicography in Africa R. R. K. Hartmann, University of Exeter. Dictionary Research Centre, 1990 Lexicography in Africa is a new book in the invaluable series Exeter Linguistic Studies and one of three volumes dedicated to lexicography to mark the fifth anniversary of the Dictionary Research Centre in the University of Exeter. It is the first attempt to fill a niche in our knowledge of lexicography on this continent. It does not pretend to be a complete survey of lexicography in Africa but a tentative one which conveys the most important trends in the field and a wealth of exemplary material. It investigates the lexicographic situation in different parts of Africa (Central Africa paper 3; Northern Africa paper 4 and Southern Africa paper 6) and the linguistic and historical background (paper 1 and 2). It also concerns itself with the user of the dictionary and his needs, types of dictionaries available and the hopes pinned on computer technology.

Lexicography in the 21st Century Sandro Nielsen, Sven Tarp, 2009-08-19 This is a state-of-the-art volume on lexicography at the beginning of the 21st century. It also offers proposals for future theoretical and practical work. The contributions, inspired by the ground-breaking work of Henning Bergenholtz, address topics such as dictionary functions; dictionary users; access routes; dictionary structures; dictionary reviewing; subject-field classifications; data retrieval; corpus lexicography; and collocations and phraseology. The contributors, all highly regarded international scholars in the field of lexicography, show how the theory of lexicographical functions can extend the forefront of the discipline by focusing on dictionary functions and how these meet the needs of users in various types of user situations. Thereby echoing Bergenholtz's idea that a dictionary is a tool that can help users solve problems encountered in communicative, cognitive and operative situations. This volume is not only of interest to practical and theoretical lexicographers but to anyone interested in lexicography.
