**Quest to Learn** Katie Salen Tekinbas,Robert Torres,Loretta Wolozin,Rebecca Rufo-Tepper,Arana Shapiro,2010-10-29 The design for Quest to Learn, an innovative school in New York City that offers a “game-like” approach to learning. Quest to Learn, an innovative school for grades 6 to 12 in New York City, grew out of the idea that gaming and game design offer a promising new paradigm for curriculum and learning. The designers of Quest to Learn developed an approach to learning that draws from what games do best: drop kids into inquiry-based, complex problem spaces that are built to help players understand how they are doing, what they need to work on, and where to go next. Content is not treated as dry information but as a living resource; students are encouraged to interact with the larger world in ways that feel relevant, exciting, and empowering. Quest to Learn opened in the fall of 2009 with 76 sixth graders. In their first semester, these students learned—among other things—to convert fractions into decimals in order to break a piece of code found in a library book; to use atlases and read maps to create a location guide for a reality television series; and to create video tutorials for a hapless group of fictional inventors. This research and development document outlines the learning framework for the school, making the original design available to others in the field. Elements in development include a detailed curriculum map, a budget, and samples of student

and teacher handbooks.

**The Quest for Lost Éire** Patricia Walsh,2014-05-20 The twins, John and Paul, Hegarty, supposedly named after the Pope's visit, but actually after the Beatles, are what is termed 'immature students', that is, having gone to college after being sacked off every bad job there was. In the course of their studies, they feel they can take on the world, and when they land their first job on an archaeological site, under the auspices of Archaeological Research and Sites Excavation Ltd (or ARSE Ltd for short) , they are in their element. Even if it is

in a backwater called Baile B'stard. They quickly learn that the practice of archaeology is nothing like what they studied at college. The site they are working on is a circular feature called, temporarily, a 'thingfort', with bets being placed as to its true age afoot. They encounter a dystopian mix of disinterested supervisors, interested locals, megalomaniac site assistants, a porn star moonlighting as a finds person, and getting one's rocks off behind the filling station, all under the auspices of menacing giant cow who terrorises anyone that comes in her way. At least they wouldn't be bored...

### **The Quest for the Inner Human** Steven H. Propp, 2013-12-03

Psychology means “the study of the soul”; it is the social science concerned with investigating who we are, why we have certain feelings, and why we do the things we do. Are we no more than a vast assembly of nerve cells and their associated molecules? Is biology (our genetic inheritance) “destiny,” or does social upbringing play a crucial role? What are the roles played by “Nature” and by “Nurture”? Are we purely physical beings, or is there an aspect that can be called “spiritual”? This thought-provoking novel takes you on a journey of intellectual and emotional exploration, considering along the way questions that we've all asked ourselves, such as: Is it true that we only use 10% of our brains? Does playing classical music for infants increase their intelligence? Do crime rates go up during a full moon? Can hypnosis, or post-hypnotic suggestions, make us do something we wouldn't normally do? Does subliminal advertising influence us to buy products? Are our memories stored indelibly, almost like a tape recorder? What causes memory lapses as we age? Can “repressed” traumatic memories be recovered through hypnosis? Do some people have “multiple personalities”? How can I tell if someone has a “neurosis,” or a “psychosis”? Do men have an “inner

feminine” side, and women an “inner masculine”? Are there innate psychological differences between males and females? The four main characters in this book will guide you through a diverse and sometimes bewildering world of differing approaches to answering such questions, such as Freudian, Jungian, and Adlerian; Humanistic, Existential, and Transpersonal; as well as Cognitive, Emotive, and Behaviorist. Along the way you will learn about the developmental stages proposed by psychologists such as Erikson, Kohlberg, Piaget, and Fowler, and even explore some of the questions currently being asked by both neuroscientists, and philosophers of the mind. Start reading, to begin your study of our innermost selves...

### **Summary of Ahmir "Questlove" Thompson's Creative Quest**

Everest Media,2022-05-21T22:59:00Z Please note: This is a companion version & not the original book. Sample Book Insights: #1 I have a vivid memory of my father playing records in our house when I was three years old. I remember being scared of the mouse trap that was next to the turntable, but I also remember being fascinated by the final synthesizer sound that played when the mouse's neck was caught in the trap. #2 I began to think about every record in the house as if it were more than just a record. They captured a time, and then they captured another time, when I remembered where I was and what I was doing when I heard them. #3 Creativity is a fire that begins within your own head. It's difficult to discuss creativity, because it's a very individual thing. But you can start that fire by connecting with your own creative impulses. #4 Everyone is born with some creative impulse, but it's unevenly distributed within one individual. Creativity is unevenly distributed within different disciplines and times. We all have blind spots and creative areas where we wilt, but we also have bright spots and creative areas

where we flourish.
