Designing Interaction John Millar Carroll, 1991-06-28 Designing Interaction, first published in 1991, presents a broadbased and fundamental re-examination of human-computer interaction as a practical and scientific endeavor. The chapters in this well-integrated, tightly focused book are by psychologists and computer scientists in industry and academia, who examine the relationship between contemporary psychology and human-computer interaction. HCI seeks to produce user interfaces that facilitate and enrich human motivation, action and experience; but to do so deliberately it must also incorporate means of understanding user interfaces in human terms - the province of psychology. Conversely, the design and use of computing equipment provides

psychologists with a diverse and challenging empirical field in which to assess their theories and methodologies.

The Voice that Won the Vote Elisa Boxer, 2020-03-15 In August of 1920, women's suffrage in America came down to the vote in Tennessee. If the Tennessee legislature approved the 19th amendment it would be ratified, giving all American women the right to vote. The historic moment came down to a single vote and the voter who tipped the scale toward equality did so because of a powerful letter his mother, Febb Burn, had written him urging him to Vote for suffrage and don't forget to be a good boy. The Voice That Won the Vote is the story of Febb, her son Harry, and the letter that gave all American women a voice.

Health Care Computing Philip Burnard, 2013-11-11 Most health professionals have to use computers - at least some of the time. Frequently, those computers are personal computers - the generic name for the ones that are variously known as 'IBM compatible' or 'IBM clones' or just PCs. This separates them out from certain other makes such as the Apple Macintosh, the Amstrad dedicated word processor, the Atari, Amiga and a number of others. This book is about PCs. When you need information about your computer when you are busy, you don't want to have to wade through piles of manuals to find what you need. You often need a fairly straightforward piece of information - now. Computers can be infuriating. When they are up and running properly, they can save time and help you to be more productive. When something goes wrong, they can be extremely frustrating. Once you have called in someone else to fix your problem, it is often apparent that the answer to your

problem was only a few keystrokes away. This book aims at supplying you with small chunks of information that can aid your productivity, get you out of awkward corners and help you to become more at home with your Pc. It has been my experience - as a health care lecturer and as a regular computer user - that you need to develop a certain baseline of confidence in working with them.

Warping to the Internet N. Salomón,1995 The Information Superhighway grows every day and by definition includes all online services--from CompuServe to America Online to the Internet itself. This book shows you how easy it can be to access these online services and the Internet using OS/2 Warp. From installation to tuning tips to online sessions, here is a practical guide to getting connected to the Internet and Information Superhighway with OS/2.

To Write as a Boxer Kurt Campbell,2019-04-18 This book recuperates the narrative of Andrew Jephtha, a Cape Town-born boxer who was the first black fighter to win a British welterweight title in 1907. As a result of that victory, Jephtha was permanently blinded, and took to preparing a book titled *A South African Boxer in Britain* (1910). This volume explores the relationship between the life of a pugilist and his textual production, and locates the complex negotiations of a pugilist by situating Jephtha in a larger arc of the 'care of the self', extending from Greco-Roman aesthetics to the present. In the process, it investigates the strategies of care that were integral to opposing, confronting and living in the increasingly racialised world of the early 1900s.

Bert Sugar on Boxing Bert Randolph Sugar,2005-10-01 Entertaining, insightful, and eminently colorful--the next best thing to being at the fights.--New York Sportscene . . . anyone taking a trip through the sport's hardscrabble past couldn't ask for a better guide....--The Ring Known as the guru of boxing, Bert Randolph Sugar is one of the most charismatic writers ever to capture the drama of the fight on paper. With a passion for the sport that is rivaled only by his talent for writing about it, Bert

Sugar is also regarded as the unofficial historian of boxing. With his trademark fedora and always-handly cigar, Sugar is a guaranteed ringside presence. His colorful personality and flamboyant mannerisms are unforgettable whether you are meeting him in person or through his writing. Bert Sugar on Boxing brings out his best. Here's but a small sampling of what awaits readers: Many a troubled and troublesome youngster has embraced The Sweet Science as a way out, a social staircase out of the mean streets that formed his limited world, fighting his way, bloody hand over bloody hand, up the ladder of acceptance the only way he knows: with his fists. You see, I was raised in a society, many moons ago, which held to two general axioms: That men were stronger; and women, smarter. And if women are so damned smart, why are they interested in having their features rearranged and acquiring cauliflower ears so pronounced they can be covered with hollandaise sauce? I will not be dissuaded from attacking those with souls like the undersides of flat rocks any more than ice can be welded or iron melted. There is no shaking-knee factor here.
