Everybody Loves Our Town Mark Yarm, 2011-09-06 Twenty years after the release of Nirvana's landmark album *Nevermind* comes *Everybody Loves Our Town: An Oral History of Grunge*, the definitive word on the grunge era, straight from the mouths of those at the center of it all. In 1986, fledgling Seattle label C/Z Records released *Deep Six*, a compilation featuring a half-dozen local bands: Soundgarden, Green River, Melvins, Malfunkshun, the U-Men and Skin Yard. Though it sold miserably, the record made music history by documenting a burgeoning regional sound, the raw fusion of heavy metal and punk rock that we now know as grunge. But it wasn't until five years later, with the seemingly overnight success of Nirvana's "*Smells Like Teen Spirit*," that grunge became a household word and Seattle ground zero for the nineties alternative-rock explosion. *Everybody Loves Our Town* captures the grunge era in the words of the musicians, producers, managers, record executives, video directors, photographers, journalists, publicists, club owners, roadies, scenesters and hangers-on who lived through it. The book tells the whole story: from the founding of the *Deep Six* bands to the worldwide success of grunge's big four (Nirvana, Pearl Jam, Soundgarden and Alice in Chains); from the rise of Seattle's cash-poor, hype-rich indie label Sub Pop to the major-label feeding frenzy that overtook the Pacific Northwest; from the simple joys of making noise at basement parties and tiny rock clubs to the tragic, lonely deaths of superstars Kurt Cobain and Layne Staley. Drawn from more

than 250 new interviews—with members of Nirvana, Pearl Jam, Soundgarden, Alice in Chains, Screaming Trees, Hole, Melvins, Mudhoney, Green River, Mother Love Bone, Temple of the Dog, Mad Season, L7, Babes in Toyland, 7 Year Bitch, TAD, the U-Men, Candlebox and many more—and featuring previously untold stories and never-before-published photographs, *Everybody Loves Our Town* is at once a moving, funny, lurid, and hugely insightful portrait of an extraordinary musical era.

Graphic Design Portfolio-builder ,2006 Self-paced, self-guided instruction is all well and good, but at the end of the day, most people could use a little feedback--especially when they're ready to build a design portfolio and hit the job market. Not to worry, this book provides actual instructor feedback along with the self-paced, individualized instruction in Photoshop and Illustrator that designers need. Written by the faculty of New York-based, accredited online design school Sessions.edu, the book uses the school's trademark project-based curriculum to teach essential design concepts with Photoshop and Illustrator. After a brief intro to the world of graphic design, Sessions instructors provide quick refresher course chapters on the two programs. Then, armed with Photoshop and Illustrator basics, readers tackle a series of projects that stretch their imagination and creative muscles involving logo design, magazine layouts, illustrations, poster design, digital imaging, book cover design, packaging design, and more. Best of all, readers are encouraged to post their work for expert

feedback from Session.edu faculty on Studio Sessions, the custom Web site created for this book.

Schubert Calculus and Its Applications in Combinatorics and Representation Theory Jianxun Hu, Changzheng Li, Leonardo C. Mihalcea, 2020-10-24 This book gathers research papers and surveys on the latest advances in Schubert Calculus, presented at the International Festival in Schubert Calculus, held in Guangzhou, China on November 6–10, 2017. With roots in enumerative geometry and Hilbert's 15th problem, modern Schubert Calculus studies classical and quantum intersection rings on spaces with symmetries, such as flag manifolds. The presence of symmetries leads to particularly rich structures, and it connects Schubert Calculus to many branches of mathematics, including algebraic geometry, combinatorics, representation theory, and theoretical physics. For instance, the study of the quantum cohomology ring of a Grassmann manifold combines all these areas in an organic way. The book is useful for researchers and graduate students interested in Schubert Calculus, and more generally in the study of flag manifolds in relation to algebraic geometry, combinatorics, representation theory and mathematical physics.

Food Systems in Africa Gaëlle Balineau, Arthur Bauer, Martin Kessler, Nicole Madariaga, 2021-01-11 Rapid population growth, poorly planned urbanization, and evolving agricultural production and distribution practices are changing foodways in African cities and creating challenges: Africans are increasingly

facing hunger, undernutrition, and malnutrition. Yet change also creates new opportunities. The food economy currently is the main source of jobs on the continent, promising more employment in the near future in farming, food processing, and food product distribution. These opportunities are undermined, however, by inefficient links among farmers, intermediaries, and consumers, leading to the loss of one-third of all food produced. This volume is an in-depth analysis of food system shortcomings in three West African cities: Abidjan, Côte d'Ivoire; Rabat, Morocco; and Niamey, Niger. Using the lens of geographical economics and sociology, the authors draw on quantitative and qualitative field surveys and case studies to offer insightful analyses of political institutions. They show the importance of "hard" physical infrastructure, such as transport, storage, and wholesale and retail market facilities. They also describe the "soft" infrastructure of institutions that facilitate trade, such as interpersonal trust, market information systems, and business climates. The authors find that the vague mandates and limited capacities of national trade and agriculture ministries, regional and urban authorities, neighborhood councils, and market cooperatives often hamper policy interventions. This volume comes to a simple conclusion: international development policy makers and their financial and technical partners have neglected urban markets for far too long, and now is the time to rethink and reinvest in this complex yet crucial subject.

Pakistan Cinema Mushtaq Gazdar, 2019 First published in 1997 to commemorate the fiftieth anniversary of the creation of Pakistan, the book features a review of films before Partition, plots of great cinema classics, trivia, and cinema lore. It contains anecdotes and reminiscences about the people who shaped the entertainment industry, as well as interviews with directors and producers. But alongside the trivia is a clever synthesis juxtaposing the artistic development of the cinematic world with the overall social development in the country. It shows how the narrow self-interest of the ruling clique clashed with the creative potential of the artistic world, stifling originality and all but destroying the film industry. The narrative is punctuated with over a hundred photographs and contains an index of all the films made to date. In this second edition of Mushtaq Gazdar's seminal

work, I. A. Rehman, Haris Gazdar, and Aisha Gazdar provide an overview of the two decades since, marking seventy years of the country's film industry. The filmography has also been updated to include the last two decades.
