5K and 10K Training Brian Clarke, 2008-11-14 Make your workouts count with the breakthrough system that synchronizes your energy levels with your training effort. Instead of fighting your body to finish a workout just because it's written on the calendar, choose the most effective workout from 5K and 10K Training based on your body's capacity to perform at any given time. Effort-based training maximizes training adaptation by matching the goal of each workout with its optimal training level: hard when energy is high and recovery is adequate, and easy when energy is low and you're under physical stress. Effort-based training also gives you the most control over the training process, allowing you to stay injury free while actually increasing the energy you have available for workouts. Sample programs contain a variety of schedules and detailed workouts for developing five race-specific abilities. Run stronger and faster with more energy by using the proven system in 5K and 10K Training. With customizable programs to choose from and accompanying training logs you can use to record and evaluate your progress, this unique system is the fastest way to reach your training goals.

Electronic Dance Music Christopher T. Conner, David R. Communities of Practice and Vintage Innovation Francesco Schiavone, 2013-09-25 This book focuses on the notion of "vintage innovation" and its application in various old technology-based

communities of practice. Some communities of practice resist and react to technological change by adopting new technological products ("vintage products") that extend the lifetime of their old, favored products and practices. There are a number of potential reasons for such strategic reactions, which are analyzed by the author. The book opens by reviewing the nature of technological change. Old technology-based communities of practice and their typical reactions to technological change are then discussed, and the concept of vintage innovation, introduced and explained. The book presents four case studies of communities of users in which vintage innovation emerged: analog photographers, radio amateurs, arcade videogame players, and disc jockeys.
