Success Cybernetics (Unabridged edition) Uell S. Andersen,2022-02-23 Here’s a wonderful new system of self-development based upon the most recent discoveries of the brain sciences and their close relationship to the computer sciences. In this book, U. S. Andersen shows you how your brain and nervous system are under the automatic control of your “Mental Computer”—and gives you scores of “computer instruction” techniques for programming this mental computer to automatically increase your skills and performance in any area you choose! Just as a computer can be programmed, you, too, can rapidly program a “guidance system” and a “power mechanism” into your brain and nervous system—and quickly combine the two into an automatic data processing unit that instantly emits spontaneous success responses to all outside problems. Cramming his book full of true case

histories from his own experience in training people, U. S. Andersen gives you a unique approach to solving all your problems . . . handling people more easily . . . and building automatic success habits into your life through mental programming. Within these pages you'll discover: How to program your mental computer to unleash your greatest potential—under all circumstances and in any situation—and quickly become a winner! How to create a power mechanism that turns on your energies and enthusiasm full blast. How to like yourself—enjoy yourself—while blasting full speed ahead to your targets! How to program the Success Mechanism into your nervous system so that you respond to signals in the same manner as a guided missile. You'll be astonished at the speed, power and control you'll develop! How to use programming techniques to constantly improve your skills and abilities, based on a breathtaking, new discovery about how the brain functions! How to "compute" ideas that are productive and useful and put money into your pocket—and how to cast off worthless ideas! How to run your mental data cards through your psychic "scanner" and find quick solutions to unsolvable problems! How to "keypunch" your mental data cards to attract opportunity into your mental computer. Throw luck out the window once and for all. Become a magnet for enterprises that are destined for success! How to operate your mental computer to gain lasting happiness—how to use it to make others happy—how to not only succeed, but how to have fun doing it! . . . plus much, much more! Yes, just as machine "cybernetics" is revolutionizing the technological world, so brain "cybernetics" is revolutionizing the world of man's performance . . . because it synchronizes your goals with the automatic responses which will achieve them for you. Machine cybernetics already has taken man into outer space. Human cybernetics seems certain to uncover the vast potentials of

his inner world—unlocking immense powers of the mind!
