**Microsoft Corp** Mohanbir Sawhney,2017 John Williams, senior director of marketing for Microsoft's .NET, was trying to build the .NET brand, a comprehensive family of next-generation connectivity software products. Highlights the challenges of branding and positioning a complex technology offering. The first challenge facing Microsoft was to develop a common definition of .NET, which had been in flux over the prior two years. The second challenge was to choose between an umbrella branding strategy, a sub-branding strategy, and an ingredient branding strategy. The third challenge was to create a value proposition that would appeal to three very different target audiences: business decision makers, IT professionals, and developers. To analyze the branding and positioning of a complex new technology offering: by defining a new product offering for public understanding and comprehension; evaluating brand strategies for optimal effect, considering possible hurdles to implementation of each strategy; and developing a value proposition attractive to differing audiences.

**Brand Fusion** Terry Smith,Tom Williams,2022-07-05 Brand Fusion: Purpose-driven brand strategy presents a compelling case for what consumers, customers, employees, and wider society are now demanding from companies – the development of brands that deliver profit with purpose, are sustainable, and create mutually beneficial meaning. It fuses theory-practice-application to purpose-driven brand strategies in order to develop a unique approach that has comprehensive theoretical underpinning as well as practical and thought-provoking lessons from industry. Data-driven case studies from a broad range of brands and contexts show the application of this learning—from micro-brands to corporates; charities to technology companies; retirement villages to aspiring high-growth start-ups. Brand Fusion: Purpose-driven brand strategy is an in-depth analysis of the philosophy and practice behind creating a purposeful brand.

**International Trade Outlook for Latin America and the Caribbean 2020** United Nations,2021-07-29 This report presents the main trends of international trade of the region's economies during the last year, with the most recent figures available on the impact of the COVID-19 pandemic in the different countries of the region. It is composed of three chapters that review the evolution of global and regional trade after the outbreak of the coronavirus disease, analyze the evolution of intraregional trade with a long-term view, and examine how international trade can contribute to gender equality when accompanied by adequate policies.

**Computer Attack and Cyberterrorism** Clay Wilson,2009 Many international terrorist groups now actively use computers and the Internet to communicate, and several may develop or acquire the necessary technical skills to direct a co-ordinated attack against computers in the United States. A cyberattack intended to harm the U.S. economy would likely target computers that operate the civilian critical infrastructure and government agencies. However, there is disagreement among some observers about whether a co-ordinated cyberattack against the U.S. critical infrastructure could be extremely harmful, or even whether computers operating the civilian critical infrastructure actually offer an effective target for furthering terrorists' goals. While there is no published evidence that terrorist organisations are currently planning a co-ordinated attack against computers, computer system vulnerabilities persist world-wide, and initiators of the random cyberattacks that plague computers on the Internet remain largely unknown. Reports from security organisations show that random attacks are now increasingly implemented through use of automated tools, called bots, that direct large numbers of compromised computers to launch attacks through the Internet as swarms. The growing trend toward the use of more automated attack tools has also overwhelmed some of the current methodologies used for tracking Internet cyberattacks. This book provides background information for three types of attacks against computers (cyberattack, physical attack, and electromagnetic attack), and discusses related vulnerabilities for each type of attack. The book also describes the possible effects of a co-ordinated cyberattack, or computer network attack (CNA), against U.S. infrastructure computers, along with possible technical capabilities of international terrorists. Issues for Congress may include how could trends in cyberattacks be measured more effectively; what is appropriate guidance for DOD use of cyberweapons; should cybersecurity be combined with, or remain separate from, the physical security organization within DHS; how can commercial vendors be encouraged to improve the security of their products; and what are options to encourage U.S. citizens to follow better cybersecurity practices? Appendices to this book describe computer viruses, spyware, and bot networks, and how malicious programs are used to enable cybercrime and cyberespionage. Also, similarities are drawn between planning tactics currently used by computer hackers and those used by terrorists groups for conventional attacks.

**The Archaeology of Sulawesi** Sue O'Connor,David Bulbeck,Juliet Meyer,2018-11-14 The central Indonesian island of Sulawesi has recently been hitting headlines with respect to its archaeology. It contains some of the oldest directly dated rock art in the world, and some of the oldest evidence for a hominin presence beyond the southeastern limits of the Ice Age Asian continent. In this volume, scholars from Indonesia and Australia come together to present their research findings and views on a broad range of topics. From early periods, these include observations on Ice Age climate, life in caves and open sites, rock art, and the animals that humans exploited and lived alongside. The archaeology presented from later periods covers the rise of the Bugis kingdom, Chinese trade ceramics, and a range of site-based and regional topics from the Neolithic through to the arrival of Islam. This carefully edited volume is the first to be devoted entirely to the archaeology of the island of Sulawesi, and it lays down a baseline for significant future research. **The Governance of Privacy** Colin J. Bennett,Charles D. Raab,2017-11-01 This book was published in 2003.This book offers a broad and incisive analysis of the

governance of privacy protection with regard to personal information in contemporary advanced industrial states. Based on research across many countries, it discusses the goals of privacy protection policy and the changing discourse surrounding the privacy issue, concerning risk, trust and social values. It analyzes at length the contemporary policy instruments that together comprise the inventory of possible solutions to the problem of privacy protection. It argues that privacy protection depends upon an integration of these instruments, but that any country's efforts are inescapably linked with the actions of others that operate outside its borders. The book concludes that, in a 'globalizing' world, this regulatory interdependence could lead either to a search for the highest possible standard of privacy protection, or to competitive deregulation, or to a more complex outcome reflecting the nature of the issue and its policy responses.

Design for Behaviour Change Kristina Niedderer, Stephen Clune, Geke Ludden, 2017-08-23 Design impacts every part of our lives. The design of products and services influences the way we go about our daily activities and it is hard to imagine any activity in our daily lives that is not dependent on design in some capacity. Clothing, mobile phones, computers, cars, tools and kitchenware all enable and hold in place everyday practices. Despite design's omnipresence, the understanding of how design may facilitate desirable behaviours is still fragmented, with limited frameworks and examples of how design can effect change in professional and public contexts. This text presents an overview of current approaches dedicated to understanding how design may be used intentionally to make changes to improve a range of problematic social and environmental issues. It offers a cross-disciplinary and cross-sectoral overview of different academic theories adopted and applied to design for behaviour change. The aim of the volume is twofold: firstly, to provide an overview of existing design models that integrate theories of change from differing scientific backgrounds; secondly, to offer an overview of application of key design for behaviour change approaches as used across case studies in different sectors, such as design for health and wellbeing, sustainability, safety, design against crime and social design. Design for Behaviour Change will appeal to designers, design students and practitioners of behavioural change.

The roundtable started with a progress report on the AEC Blueprint given by S. Pushpanathan, Principal Director of Economic Integration and Finance, ASEAN Secretariat, Jakarta. Thereafter, the sessions examined the various aspects of the Blueprint tackling the non-tariff barriers, designing a comprehensive ASEAN Investment Agreement, a regional framework for competition policy, the role of infrastructure development in economic integration, the importance of international production networks in economic integration, etc.
