Audacious Education Purposes Fernando M Reimers,2020-10-09 This open access book offers a comparative study of eight ambitious national reforms that sought to create opportunities for students to gain the necessary breath of skills to thrive in a rapidly changing world. It examines how national governments transform education systems to provide students opportunities to develop such skills. It analyses comprehensive education reforms in Brazil, Finland, Japan, Mexico, Peru, Poland, Portugal and Russia and yields original and important insights on the process of educational change. The analysis of these 21st century skills reforms shows that reformers followed approaches which are based on the five perspectives: cultural, psychological, professional, institutional and political. Most reforms relied on institutional and political perspectives. They highlight the systemic nature of the process of educational change, and the need for alignment and coherence among the various elements of the system in order. They underscore the importance of addressing the interests of various stakeholders of the education system in obtaining the necessary impetus to initiate and sustain change. In contrast, as the book shows, the use of a cultural and psychological frame proved rarer, missing important opportunities to draw on systematic analysis of emerging demands for schools and on cognitive science to inform the changes in the organization of instruction. Drawing on a rich array of sources and evidence the book provides a careful account of how education reform works in practice. The Poor Raul Brandão,2016 *The Poor* (Os Pobres, 1906), by Portuguese author Raúl Brandão is a powerful tribute to the underclasses. Innovative thematically and stylistically, the novel consists of loosely connected vignettes on two narrative levels: the lives of prostitutes, where the inexorable need for love is transformed into a means for survival; and the life of Gebo, a seemingly slovenly man, with neither sentiment nor intelligence. Instead, as he searches tirelessly for work -- and loves his daughter and wife with tenderness and constancy -- he is revealed as a victim of the economic situation in Portugal. With prescience, Brandão emphasizes the interdependence between nature and humankind by intertwining descriptions of the physical and human surroundings, while his depictions of desperation, sorrow and violence prefigure the works of contemporary Portuguese writers.

The Hillsong Movement Examined Tanya Riches,Tom Wagner,2017-11-02 This interdisciplinary volume brings together leading writers and thinkers to provide a critique of a broad range of topics related to Hillsong Church. Hillsong is one of the most influential, visible, and (in some circles) controversial religious organizations/movements of the past thirty years. Although it has received significant attention from both the academy and the popular press, the vast majority of the scholarship lacks the scope and nuance necessary to understand the complexity of the movement, or its implications for the social, cultural, political, spiritual, and religious milieus it inhabits. This volume begins to redress this by filling important gaps in knowledge as well as introducing different audiences to new perspectives. In doing so, it enriches our understanding of one of the most influential Christian organizations of the late 20th and early 21st centuries.

Urban Informatics Wenzhong Shi, Michael F. Goodchild, Michael Batty, Mei-Po Kwan, Anshu Zhang, 2021-04-06 This open access book is the first to systematically introduce the principles of urban informatics and its application to every aspect of the city that involves its functioning, control, management, and future planning. It introduces new models and tools being developed to understand and implement these technologies that enable cities to function more efficiently – to become ‘smart’ and ‘sustainable’. The smart city has quickly emerged as computers have become ever smaller to the point where they can be embedded into the very fabric of the city, as well as being central to new ways in which the population can communicate and act. When cities are wired in this way, they have the potential to become sentient and responsive, generating massive streams of ‘big’ data in real time as well as providing immense opportunities for extracting new forms of urban data through crowdsourcing. This book offers a comprehensive review of the methods that form the core of urban informatics from various kinds of urban remote sensing to new approaches to machine learning and statistical modelling. It provides a detailed technical introduction to the wide array of tools information scientists need to develop the key urban analytics that are fundamental to learning about the smart city, and it outlines ways in which these tools can be used to inform design and policy so that cities can become more efficient with a greater concern for environment and equity.

Saints & Sinners Michelangelo Merisi da Caravaggio, McMullen Museum of Art, 1999 This exhibition at Boston College's McMullen Museum of Art (February-May 1999) takes an interdisciplinary approach to studying the style, subject matter, and functions of religious art in Italy between 1580-1680. The conceptual centerpiece of the exhibition is Caravaggio's recently rediscovered *The Taking of Christ*. The catalogue reproduces in color all of the paintings in the exhibition and includes a collection of essays that analyze how some of the period's most important artistic, religious, and social concerns are encapsulated within the various images. Contributors include Franco Mormando (Exhibition Organizer and Catalogue Editor), Gauvin Bailey, Noel Barber, Sergio Benedetti, Pamela Jones, John W. O'Malley, John Varriano, Josephine von Henneberg, and Thomas Worcester.

Programming Parallel Processors Robert G. Babb, 1988 This book surveys the major commercially available, scientific parallel computers with emphasis on how they are programmed. For each machine, the way in which parallel performance can be assessed is shown for the same small example program. The book will appeal to programmers, managers, and students in computer science and other disciplines with an interest in understanding the state of the art in software tools for programming the current generation of parallel processors.

Frontiers In Orthogonal Polynomials And Q-series Nashed M Zuhair, Li Xin, 2018-01-12 This volume aims to highlight trends and important directions of research in orthogonal polynomials, q-series, and related topics in number theory, combinatorics, approximation theory, mathematical physics, and computational and applied harmonic analysis. This collection is based on the invited lectures by well-known contributors from the International Conference on Orthogonal Polynomials and q-Series, that was held at the University of Central Florida in Orlando, on May 10–12, 2015. The conference was dedicated to Professor Mourad Ismail on his 70th birthday. The editors strived for a volume that would inspire young researchers and provide a wealth of information in an engaging format. Theoretical, combinatorial and computational/algorithmic aspects are considered, and each chapter contains many references

Molecular Basis of Resilience Patrick L. Iversen, 2019-01-05 This book illuminates mechanisms of resilience. Threats and defense systems lead to adaptive changes in gene expression. Environmental conditions may dampen adaptive responses at the level of RNA expression. The first seven chapters elaborate threats to human health. Human populations spontaneously invade niche boundaries exposing us to threats that drive the resilience process. Emerging RNA viruses are a significant threat to human health. Antiviral drugs are reviewed and how viral genomes respond to the environment driving genome sequence plasticity. Limitations in predicting the human outcome are described in “nonlinear anomalies.” An example includes medical countermeasures for Ebola and Marburg viruses under the “Animal Rule.” Bacterial infections and a review of antibacterial drugs and bacterial resilience mediated by horizontal gene transfer follow. Chapter 6 shifts focus to cancer and discovery of novel therapeutics for leukemia. The spontaneous resolution of AML in children with Down syndrome highlights human resilience. Chapter 7 explores chemicals in the environment. Examples of chemical carcinogenesis illustrate how chemicals disrupt genomes. Historic research ignored RNA damage from chemically induced nucleic acid damage. The emergence of important forms of RNA and their possible role in resilience is proposed. Chapters 8-10 discuss threat recognition and defense systems responding to improve resilience. Chapter 8 describes the immune

response as a threat recognition system and response via diverse RNA expression. Oligonucleotides designed to suppress specific RNA to manipulate the immune response including exon-skipping strategies are described. Threat recognition and response by the cytochrome P450 enzymes parallels immune responses. The author proposes metabolic clearance of small molecules is a companion to the immune system. Chapter 10 highlights RNA diversity expressed from a single gene. Molecular Resilience lists paths to RNA transcriptome plasticity forms the molecular basis for resilience. Chapter 11 is an account of ExonDys 51, an approved drug for the treatment of Duchenne muscular dystrophy. Chapter 12 addresses the question “what informs molecular mechanisms of resilience?” that drives the limits to adaptation and boundaries for molecular resilience. He speculates that radical oxygen, epigenetic modifications, and ligands to nuclear hormone receptors play critical roles in regulating molecular resilience.

Preaching with Empathy Lenny Luchetti,2018-09-18 Preachers can find help from many resources to get the text right, the structure right, and the delivery right. Preaching with Empathy aims to help preachers and homiletics students learn to deeply understand and love their listeners, in order to get preaching right. Preachers who profess a love for God, Scripture, and preaching, but who lack loving empathy for the listener, betray their three professed loves and limit their fruitfulness in ministry. This book teaches how to practice preaching in new ways, incorporating a heightened awareness and empathy for the people in the preacher’s community. Author Lenny Luchetti provides immediately useful tools, all based on the foundations of scripture, theology, history, and social awareness. Readers will learn to embody Christ for their congregations, as they empathically love God and humanity. This book is part of the successful Artistry in Preaching series, edited by Paul Scott Wilson. Other books in the series include Preaching as Poetry: Beauty, Goodness and Truth in Every Sermon, by Paul Scott Wilson; Actuality: Real Life Stories for Sermons that Matter, by Scott Hoezee; and Preaching in Pictures: Using Images for Sermons that Connect, by Peter Jonker.
