Breaking the Binaries in Security Studies Ayelet Harel-Shalev, Shir Daphna-Tekoah, 2020-01-02 Several months after a 2014 operation in the Gaza Strip, fifty-three Israeli Defense Forces combatants and combat-support soldiers were awarded military decorations for exhibiting extraordinary bravery. From a gendered perspective, the most noteworthy aspect of these awards was not the fact that only 4 of the 53 recipients were women, but rather the fact that the men were uniformly praised for being brave, being heroes, actively performing acts of bravery, protecting, and preventing terror attacks, while the women were repeatedly commended for not panicking. This pattern is not unique to the Israeli case, but rather reflects the patriarchal norms that still prevail in military institutions worldwide. One might expect that, now that women serve on the battlefield as combatants, some of the gendered norms informing militaries would have long disappeared. As it stands, women in the military still face a double battle--against the patriarchal institution, as well as against the military's purported enemies. Drawing on interviews with 100 women military veterans about their experiences in combat, this book asks what insights are gained when we take women's experiences in war as our starting point instead of treating them as add-ons to more fundamental or mainstream levels of analysis, and what importance these experiences hold for an analysis of violence and for security studies. Importantly, the authors introduce a theoretical framework in critical security studies for understanding (vis-à-vis binary deconstructions of the terms used in these fields) the integration of women soldiers into combat and combat-support roles, as well as the challenges they face. While the book focuses on women in the Israeli Defence Forces, the book provides different perspectives about why it is important to explore women in combat, what their experiences teach us, and how to consider soldiers and veterans both as citizens and as violent state actors--an issue with which scholars are often reluctant to engage. Breaking the Binaries in Security Studies raises methodological considerations about ways of evaluating power relations in conflict situations and patriarchal structures.

Bilateralism, Multilateralism and Asia-Pacific Security William T. Tow, Brendan Taylor, 2013-09-02 Many scholars of international relations in Asia regard bilateralism and multilateralism as alternative and mutually exclusive approaches to security co-operation. They argue that multilateral associations such as ASEAN will eventually replace the system of bilateral alliances which were the predominant form of U.S. security co-operation with Asia-Pacific allies during the Cold War. Yet these bilateral alliances continue to be the primary means of the United States' strategic engagement with the region. This book contends that bilateralism and multilateralism are not mutually exclusive, and that bilateralism is likely to continue strong even as multilateralism strengthens. It explores a wide range of issues connected with this question. It discusses how US bilateral alliances have been reinvigorated in recent years, examines how bilateral and multilateral approaches to specific problems can work alongside each other, and concludes by considering how patterns of international security are likely to develop in the region in future.

Carlos Solar offers a comparative analysis using the cases of Argentina, Brazil, Chile, Colombia, Mexico, and Venezuela to help navigate the changing security landscape and the growing risks found in the digital domain. His analysis includes a review of civilian and military preparedness emphasizing the ongoing alliances with the world's superpowers to finally debate what are the side effects for peace and development in the Americas from the current cybersecurity rivalry between the United States and China. Providing a much-needed account of state-technology affairs in the global south Cybersecurity Governance in Latin America challenges scholars and policymakers to rethink the protection of cyberspace to avoid unnecessarily sacrificing rights and freedoms in the name of national security.

Breaking Away From Broken Windows Ralph Taylor, 2018-03-08 In Breaking Away from Broken Windows Ralph Taylor uses data on recent Baltimore crime-reduction efforts to attack the 'broken windows' thesis--that is, the currently fashionable notion that by reducing or eliminating superficial signs of disorder (dilapidated buildings, graffiti, incivil behavior by teenagers, etc.), urban police departments can make significant and lasting reductions in crime. Taylor argues that such measures, while useful, are only a partial solution to the problem at hand. His data supports a materialist view: changes in levels of physical decay, superficial social disorder, and racial composition do not lead to higher crime, while economic decline does. He contends that the Baltimore example shows that in order to make real, long-term reductions in crime, urban politicians, businesses, and community leaders must work together to improve the economic fortunes of those living in high-crime areas.

Your Government Failed You Richard A. Clarke, 2009-10-13 Richard Clarke's dramatic statement to the grieving families during the 9/11 Commission hearings touched a raw nerve across America. Not only had our government failed to prevent the 2001 terrorist attacks but it has proven itself, time and again, incapable of handling the majority of our most crucial national-security issues, from Iraq to Katrina and beyond. This is not just a temporary failure of any one administration, Mr. Clarke insists, but rather an endemic problem, the result of a pattern of incompetence that must be understood, confronted, and prevented. In *Your Government Failed You*, Clarke goes far beyond terrorism to examine the inexcusable chain of recurring U.S. government disasters and strategic blunders in recent years. Drawing on his thirty years in the White House, Pentagon, State Department, and intelligence community, Clarke gives us a privileged, if gravely troubling, look into the debacle of government policies, discovering patterns in the failures and offering ways to halt the catastrophic cycle once and for all.
