The Perfect Slime Hans-Curt Flemming, Dr Thomas R. Neu, Dr Jost Wingender, 2016-09-15 The Perfect Slime presents the latest state of knowledge and all aspects of the Extracellular Polymeric Substances, (EPS) matrix – from the ecological and health to the antifouling perspectives. The book brings together all the current material in order to expand our understanding of the functions, properties and characteristics of the matrix as well as the possibilities to strengthen or weaken it. The EPS matrix represents the immediate environment in which biofilm organisms live. From their point of view, this matrix has paramount advantages. It allows them to stay together for extended periods and form synergistic microconsortia, it retains extracellular enzymes and turns the matrix into an external digestion system and it is a universal recycling yard, it protects them against desiccation, it allows for intense communication and represents a huge genetic archive. They can remodel their matrix, break free and eventually, they can use it as a nutrient source. The EPS matrix can be considered as one of the emergent properties of biofilms and are a major reason for the success of this form of life. Nevertheless, they have been termed the “black matter of biofilms” for good reasons. First of all: the isolation methods define the results. In most cases, only water soluble EPS components are investigated; insoluble ones such as cellulose or amyloids are much less included. In particular in environmental biofilms with many species, it is difficult to impossible isolate, separate the various EPS molecules they are encased in and to define which species produced which EPS. The regulation and the factors which trigger or inhibit EPS production are still very poorly understood. Furthermore: bacteria are not the only microorganisms to produce EPS. Archaea, Fungi and algae can also form EPS. This book investigates the questions, What is their composition, function, dynamics and regulation? What do they all have in common?

American Jewish Year Book 2015 Arnold Dashefsky, Ira M. Sheskin, 2016-02-12 This Year Book, now in its 115th year, provides insight into major trends in the North American Jewish communities and is the Annual Record of the North American Jewish Communities. The first two chapters of Part I examine Jewish immigrant groups to the US and Jewish life on campus. Chapters on “National Affairs” and “Jewish Communal Affairs” analyze the year’s events. Three chapters analyze the demography and geography of the US, Canada, and world Jewish populations. Part II provides Jewish Federations, Jewish Community Centers, social service agencies, national organizations, overnight camps, museums, and Israeli consulates. The final chapters present national and local Jewish periodicals and broadcast media; academic resources, including Jewish Studies Programs, books, articles websites, and research libraries; and lists of major events in the past year, Jewish honorees, and obituaries. For those interested in the North American Jewish community—scholars, service providers, volunteers—this volume undoubtedly provides the single best source of information on the structure, dynamics, and ongoing religious, political, and social challenges confronting the community. It should be on the bookshelf of everyone interested in monitoring the dynamics of change in the Jewish communities of North America. Sidney Goldstein, Founder and Director, Population Studies and Training Center, Brown University, and Alice Goldstein, Population Studies and Training Center, Brown University The American Jewish Year Book is a unique and valuable resource for Jewish community professionals. It is part almanac, directory, encyclopedia and all together a volume to have within easy reach. It is the best, concise diary of trends, events, and personalities of interest for the past year. We should all welcome the Year Book’s publication as a sign of vitality for the Jewish community. Brenda Gevertz, Executive Director, JPRO Network, the Jewish Professional Resource Organization

Vegetation of the Arabian Peninsula S.A. Ghazanfar, M. Fisher, 2013-04-17 The inspiration for this book came from our ten years of journeys and wanderings through the varied landscapes of Arabia, and in particular through those of its hospitable southeastern corner, Oman. We owe a particular debt to Sultan Qaboos University, which during this time has provided us with both a stimulating working environment and a home. Transliteration of Arabic place and other names into English script is a task fraught with difficulties. We have followed 'accepted' spellings wherever these were not contrary to our common sense, and in other cases we have rendered names into Roman English script using phonetic spellings. Our main task in this respect was to ensure conformity between the fifteen contributing authors. Diacritical signs have mostly been avoided, since their use is neither widely followed nor readily

understood. Arabic words which have been commonly taken into the English language, such as 'sabkha' for a salt flat and 'wadi' for a valley with a seasonal watercourse, are not italicised in usage. However, other Arabic terms which are occasionally used in English but not as widely known, such as harrah for a basaltic lava field and hima for a traditional grazing reserve, are italicised throughout the text.

Insects of the Los Angeles Basin Charles Leonard Hogue,1993 Southern California is home not only to the country's second largest metropolitan center but to an estimated 3,000 to 4,000 different kinds of insects. *Insects of the Los Angeles Basin* provides an introduction to more than 400 of the most conspicuous or curious of these invertebrate animals and to about 70 spiders, mites and ticks, and related forms. With color photographs or drawings of all but a few species, the text describes the size and most striking physical characteristics of adults and immature stages and gives information on locomotion and behavior, offensive and defensive maneuvers, mating rituals, food preferences, nests and traps, and noises and scents. The specific habitat and general geographic range of each insect are included, as are lore and superstition regarding some notorious species. The author, Dr. Charles L. Hogue, has answered the questions that he was most often asked in his position as Curator of Entomology at the Natural History Museum of Los Angeles County. The result is a highly readable text with an emphasis on the effects that insects have on the people who encounter them.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc.
