The Early English Impersonal Construction Ruth Möhlig-Falke,2012-06-06 The Early English Impersonal Construction aims to demonstrate that an understanding of the functional and semantic aspects of impersonal verbs in Old and Middle English can shed light on questions that remain about these verbs today.

Audrey Grant's Better Bridge Audrey Grant,1995 This book tells you everything you need to know about the most widely accepted bidding methods. Read about the secrets of hand evaluation that can dramatically improve your game. Learn how to describe your hand to partner so that the partnership can find its way to the best contract. Discover new concepts that keep the bidding conversation straightforward. You'll be confident when you go to your next bridge game because you'll have the solid foundation needed to handle any bidding sequence.--Back cover

Fast Food Nation Eric Schlosser,2012 An exploration of the fast food industry in the United States, from its roots to its long-term consequences.

Modern Losing Trick Count Flipper Ron Klinger,2009-04-09 The Losing Trick Count is a way of measuring the trick-taking potential of a trump contract. It enables you to calculate the playing-strength, the tricks in your own hand and to estimate those in your partner's hand. Used correctly the LTC is a vastly superior valuation technique for accurate bidding.

Edinburgh Companion to the First World War and the Arts Ann-Marie Einhaus,2017-05-24 A new exploration of literary and artistic responses to WW1 from 1914 to the presentThis authoritative reference work examines literary and artistic responses to the wars upheavals across a wide range of media and genres, from poetry to pamphlets, sculpture to television documentary, and requiems to war reporting. Rather than looking at particular forms of artistic expression in isolation and focusing only on the war and inter-war period, the 26 essays collected in this volume approach artistic responses to the war from a wide variety of angles and, where appropriate, pursue their inquiry into the present day. In 6 sections, covering Literature, the Visual Arts, Music, Periodicals and Journalism, Film and Broadcasting, and Publishing and Material Culture, a wide range of original chapters from experts across literature and the arts examine what means and approaches were employed to respond to the shock of war as well as asking such key questions as

how and why literary and artistic responses to the war have changed over time, and how far later works of art are responses not only to the war itself, but to earlier cultural production. **Key Features** Offers new insights into the breadth and depth of artistic responses to WWI Establishes links and parallels across a wide range of different media and genres Emphasises the development of responses in different fields from 1914 to the present

Beyond the Burghal Hidage John Baker, Stuart Brookes, 2013-03-27 Beyond the Burghal Hidage takes the study of Anglo-Saxon civil defence away from traditional historical and archaeological fields, and uses a groundbreaking interdisciplinary approach to examine warfare and public responses to organised violence through their impact on the landscape.

The Best Writing on Mathematics 2020 Mircea Pitici, 2020-11-24 The year's finest mathematical writing from around the world This annual anthology brings together the year's finest mathematics writing from around the world. Featuring promising new voices alongside some of the foremost names in the field, *The Best Writing on Mathematics 2020* makes available to a wide audience many articles not easily found anywhere else—and you don't need to be a mathematician to enjoy them. These writings offer surprising insights into the nature, meaning, and practice of mathematics today. They delve into the history, philosophy, teaching, and everyday aspects of math, and take readers behind the scenes of today's hottest mathematical debates. Here, Steven Strogatz reveals how calculus drives advances in virology, Paul Thagard argues that the power of mathematics stems from its combination of realistic and fictional qualities, and Erica Klarreich describes how Hao Huang used the combinatorics of cube nodes to solve a longstanding problem in computer science. In other essays, John Baez tells how he discovered the irresistible attractions of algebraic geometry, Mark Colyvan compares the radically different explanatory practices of mathematics and science, and Boris Odehnal reviews some surprising properties of multidimensional geometries. And there's much, much more. In addition to presenting the year's most memorable writings on mathematics, this must-have anthology includes a bibliography of other notable writings and an introduction by the editor. This book belongs on the shelf of anyone interested in where math has taken us—and where it is headed.

The Video Movie Guide 2001 Mick Martin, Marsha Porter, 2000 Presents brief reviews of more than nineteen thousand films and other videos that are available at rental stores and through mail order, arranged alphabetically by title; also includes actor and director indexes.
