Radio Is Sound Only Dr. Harliantara, Drs., M.Si., Andi Rustam, 2021-11-18 Prof. Josef Rauschecker, neuro-scientist dari University College, London, pernah mengungkapkan proses pengartian getaran suara (auditory) di otak jauh lebih cepat daripada proses pengartian getaran gambar (visual). Oleh sebab itulah apabila indera kita menerima sinyal/stimuli gambar dan sinyal/stimuli suara dalam waktu bersamaan sekaligus (seperti menonton TV), maka yang terjadi di otak adalah tercipta “gambar imajiner” terlebih dahulu (karena proses getaran auditory sudah selesai, sementara proses getaran visual masih berlangsung). Baru ketika proses getaran visual selesai, maka digabungkan kedua hasil proses tadi oleh otak untuk peng-artian lengkap. Dengan demikian bisa dikatakan, bahwa “gambar asli” dikonfirmasi terlebih dahulu terhadap “gambar imajiner” (sebagai referensi yang sudah terbentuk lebih dahulu), baru setelah itu proses peng-artian oleh otak dengan masuknya kedua stimuli tersebut selesai/final. Media radio, melalui sarana apapun didengarkannya, tetap saja ia merupakan media “suara/ bunyi”. Maka salah satu kekuatan yang khas karakter radio adalah justru terletak pada hanya suara. Karena dengan suara sajalah bisa tercipta “gambar imajiner yang tak terbatas”. Kemampuan radio untuk menciptakan imajinasi tanpa batas inilah yang sering diistilahkan sebagai “Radio is Theatre of Mind”. Mengutip kata-kata tokoh periklanan dunia David Ogilvy, “Sebotol Coca-cola dengan ukuran dan bentuk yang tak terbatas, serta dapat berubah-ubah setiap saat, hanya bisa dilakukan oleh Radio. Sedangkan kalau Anda melihat sebotol Coca Cola di Televisi, pasti bentuknya dan warnanya ya seperti itulah.. dan ukuran botolnya paling besar hanya sebesar layar televisi Anda”. Kalimat ini secara akurat telah menggambarkan bagaimana Radio bisa menciptakan Theatre of Mind, suatu hal yang tak bisa dilakukan oleh media yang dianggap paling lengkap (audio-visual), yaitu televisi. Sayangnya, tidak banyak yang menyadari hal ini baik dari kalangan radio sendiri maupun dari kalangan pengiklan/biro iklan (advertisers & advertising agency), yang menganggap TV lebih unggul dari Radio. Padahal masing-masing media punya kekurangan dan keunggulannya masing-masing. Ke-efektif-an media sebetulnya sama saja, tergantung bagaimana cara kita mengoptimalkan karakteristik-nya. Melalui buku ini yang menggabungkan beragam teori komunikasi terkait radio dan hasil dari praktik selama puluhan tahun, penulis Harliantara Harley Prayudha dan Andy Rustam Munaf berupaya mengajak Anda untuk mengoptimalkan Keunggulan Radio dalam kondisi kekinian, era digital. Dalam paparan Harliantara Harley Prayudha yang terserak dari bab 1 sampai bab 5, penulis coba mengajak Anda untuk menyelami beragam teori komunikasi yang bisa dan telah diimplementasikan menjadi bagian dunia radio. Tak hanya itu, dengan keterlibatannya secara langsung sebagai praktisi hingga sekarang,

Harliantara Harley Prayudha pun memberikan sejumlah tips, terutama bagi para penyiar. Sementara itu, Andy Rustam Munaf dengan bahasa yang ringan juga kritis berupaya memberikan pemahaman esensi radio yang diuraikan dalam puluhan artikel yang tersimpan dalam bab 7 dan ini bisa diharapkan bisa mencerahkan dan melekatkan prinsip bagi siapa pun yang sudah dan ingin memasuki dunia radio sehingga mereka tak sekedar tahu, tetapi bisa paham.

Linux in a Nutshell Ellen Siever, Aaron Weber, Stephen Figgins, Robert Love, Arnold Robbins, 2005 Over the last few years, Linux has grown both as an operating system and a tool for personal and business use. Simultaneously becoming more user friendly and more powerful as a back-end system, Linux has achieved new plateaus: the newer filesystems have solidified, new commands and tools have appeared and become standard, and the desktop--including new desktop environments--have proved to be viable, stable, and readily accessible to even those who don't consider themselves computer gurus. Whether you're using Linux for personal software projects, for a small office or home office (often termed the SOHO environment), to provide services to a small group of colleagues, or to administer a site responsible for millions of email and web connections each day, you need quick access to information on a wide range of tools. This book covers all aspects of administering and making effective use of Linux systems. Among its topics are booting, package management, and revision control. But foremost in *Linux in a Nutshell* are the utilities and commands that make Linux one of the most powerful and flexible systems available. Now in its fifth edition, *Linux in a Nutshell* brings users up-to-date with the current state of Linux. Considered by many to be the most complete and authoritative command reference for Linux available, the book covers all substantial user, programming, administration, and networking commands for the most common Linux distributions. Comprehensive but concise, the fifth edition has been updated to cover new features of major Linux distributions. Configuration information for the rapidly growing commercial network services and community update services is one of the subjects covered for the first time. But that's just the beginning. The book covers editors, shells, and LILO and GRUB boot options. There's also coverage of Apache, Samba, Postfix, sendmail, CVS, Subversion, Emacs, vi, sed, gawk, and much more. Everything that system administrators, developers, and power users need to know about Linux is referenced here, and they will turn to this book again and again.

I, Avatar Mark Stephen Meadows, 2007-12-27 What is an avatar? Why are there nearly a billion of them, and who is using them? Do avatars impact our real lives, or are they just video game conceits? Is an avatar an inspired rendering of its creator's inner self, or is it just one among millions of anonymous vehicles clogging the online freeways? Can we use our avatars to really connect with people, or do they just isolate us? And as we become more like our avatars do they become more like us? In *I, Avatar*, Mark Stephen Meadows answers some of these questions, but more importantly, he raises hundreds of others in his exploration of avatars and the fascinating possibilities they hold. His examination of avatars through the lenses of sociology, psychology, politics, history, and art, he will change the way you look at even a simple online profile and revolutionize the idea of avatars as part of our lives, whether first or second.

Globalization from Below Donatella Della Porta, Presenting the first systematic empirical research on the global justice movement, *Globalization from Below* analyzes a movement from the viewpoints of the activists, organizers, and demonstrators themselves. The authors traveled to Genoa with anti-G8 protesters and collected data from more than 800 participants. They examine the interactions between challengers and elites, and discuss how new models of activism fit into current social movement work.

A Universe of Atoms, An Atom in the Universe Mark P. Silverman, 2008-04-08 This thoroughly updated and revised text contains a selection of well-written essays based on Silverman's work on a wide range of topics, including: quantum mechanics, including atomic and nuclear physics, electromagnetism and optics, gravity, thermodynamics, and the physics of fluids. Presenting a personal odyssey in physics, Silverman investigates processes for which no visualizable mechanism can be given, or that seem to violate fundamental physical laws (but do not). The discussions use little mathematics, and anyone with a little college physics will be able to read the book with pleasure. -Engagingly written -Easily understandable by both the general reader and the seasoned physicist -Covers a diversity of subjects from hot topics in contemporary physics to less widely known but subtle and intriguing issues in physics -Discusses real physical systems whose behavior provokes, surprises and challenges the imagination -This second edition is newly revised and updated

Death of a Cheerleader (Riverdale, Novel 4) Micol Ostow, 2020-05-05 Betty and Veronica's cheerleading retreat with the River Vixens was supposed to be fun -- not deadly. Betty, Veronica, Cheryl, and the rest of the River Vixens are heading out of town for the weekend on a cheerleading retreat. So Archie, Jughead, and the rest of the guys decide to have a poker night at La Bonne Nuit. But a storm causes the power to go out, and the speakeasy goes into lockdown. When the lights come back on, all of the cash is gone. The thief has to be someone the guys know -- but who? A few hours away, the River Vixens are ready to enjoy a few days of nature and team bonding. But when they arrive at the cheerleading camp, there are two other feuding squads already there. The team from Stonewall Prep claims that the Greendale girls are the reason one of their teammates went missing two years ago. Betty and Veronica volunteer to investigate after creepy things start happening all over camp. And when one of the cheerleaders nearly drowns in the lake, Betty and Veronica know they have to find out the truth before anyone else gets hurt -- or worse. This original *Riverdale* novel features a story not seen on the show!

Agrometeorology: Principles and Applications of Climate Studies in Agriculture is a much-needed reference resource on the practice of merging the science of meteorology with the service of agriculture. The book addresses pressing topics of agriculture resource utilization and management, such as regional and land use planning; soil and water conservation; frost; growing degree day; risk analysis of climate hazards; animal parasites; harvest forecasts; crop models; decision support systems (DSS); agroclimatological forecast; and the ecological and economic implications of climate change. Agrometeorology: Principles and Applications of Climate Studies in Agriculture also addresses: managing farm water resources environmental temperature planning for frost mitigation photosynthetically active radiation (PAR) thermoperiodism managing the extremes--droughts and floods using computers to manage agricultural systems and much more! The interdisciplinary focus and reader-friendly style of Agrometeorology: Principles and Applications of Climate Studies in Agriculture make the book invaluable to scientists, planners, and academics working in the major agricultural sciences, geography, natural resource studies, and meteorology.
