2 Inside the Smart Home Richard Harper,2006-04-18 Using clear and accessible language this book examines the growing field of ‘smart technology’ for the home. The author first introduces the field before exploring the various background issues, including how the home differs from other environments. He then shows how these background issues affect the design and usability of these technologies. A detailed case study looks at the use of handheld and wearable digital technology in sheltered housing. The last section examines what it is like to live in a smart home and why they have so far failed to reach the levels of success originally predicted. 2 Wives of Fame Edna Healey,2011-12-01 Here are portraits of three very different Victorian women, all of whom married men of exceptional talent, energy and genius. To be the wife of such frenetic, explosive characters as David Livingstone, Karl Marx or Charles Darwin, especially at this period in history, demanded rare qualities. Yet the late twentieth-century view of these women is perhaps best summed up in the frequently heard comment: ‘I didn’t know he had a wife.’ The mid-nineteenth century was a time of unprecedented movement and upheaval. The revolutions of 1848 set Europe ablaze and sent swarms of political dissidents to seek freedom outside their homelands. Britain and her empire were ruled by a young Queen Victoria, inspired by her enterprising, vigorous consort, Albert; it was a climate in which invention and discovery were encouraged. Men were creating new frontiers, both geographically and intellectually, and where they went their wives and families accompanied them.

2 Unless It Isn’t Bob McCurdy,2021-05-08 This is the fourth book in the BJ Conner series. It is set during the COVID-19 global pandemic of 2020. The book follows BJ and his partner as they try to help residents of Door County deal with the pandemic, and face their own battles with the virus. As always, the author weaves some unexpected surprises, a shocking discovery about a neighbor, the ever-present Wisconsin weather, the devastating loss of a family member, and the shared effort of all to overcome the challenges of 2020.

2 Cardiovascular Soft Tissue Mechanics Stephen C. Cowin, Jay D. Humphrey,2001 Cowin (New York Center for Biomedical Engineering) and Humphrey (Biomedical Engineering, Texas A&M U.) present seven papers that discuss current research and future directions. Topics concern tissues within the cardiovascular system (arteries, the heart, and biaxial testing of planar tissues such as heart valves). Themes include an emphasis on data on the underlying microstructure, especially collagen; the consideration of the fact that both arteries and the heart contain muscle and that there is, therefore, a need to quantify both the active and passive response; constitutive relations for active behavior; and the growth and remodeling of cardiovascular tissues. Of interest to cardiovascular and biomechanics soft tissue researchers, and bioengineers. Annotation copyrighted by Book News, Inc., Portland, OR.

2 Medicolegal Death Investigation System Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee for the Workshop on the Medicolegal Death Investigation System,2003-09-22 The US Department of Justice’s National Institute of Justice (NIJ) asked the Institute of Medicine (IOM) of the National Academies to conduct a workshop that would examine the interface of the medicolegal death investigation system and the criminal justice system. NIJ was particularly interested in a workshop in which speakers would highlight not only the status and needs of the medicolegal death investigation system as currently administered by medical examiners and coroners but also its potential to meet emerging issues facing contemporary society in America. Additionally, the workshop was to highlight priority areas for a potential IOM study on this topic. To achieve those goals, IOM constituted the Committee for the Workshop on the Medicolegal Death Investigation System, which developed a workshop that focused on the role of the medical examiner and coroner death investigation system and its promise for improving both the criminal justice system and the public health and health care systems, and their ability to respond to terrorist threats and events. Six panels were formed to highlight different aspects of the medicolegal death investigation system, including ways to improve it and expand it beyond its traditional response and meet growing demands and challenges. This report summarizes the workshop presentations and discussions that followed them.

2 Returning Individual Research Results to Participants National Academies of Sciences, Engineering, and Medicine, Health and Medicine Division, Board on Health Sciences Policy, Committee on the Return of Individual-Specific Research Results Generated in Research Laboratories,2018-09-23 When is it appropriate to return individual research results to participants? The immense interest in this question has been fostered by the growing movement toward greater transparency and participant engagement in the research enterprise. Yet, the risks of returning individual research results—such as results with unknown validity—and the associated burdens on the research enterprise are competing considerations. Returning Individual Research Results to Participants reviews the current evidence on the benefits, harms, and costs of returning individual research results, while also considering the ethical, social, operational, and regulatory aspects of the practice. This report includes 12 recommendations directed to various stakeholders—investigators, sponsors, research institutions, institutional review boards (IRBs),

REGULATORS, AND PARTICIPANTS] €AND ARE DESIGNED TO HELP (1) SUPPORT DECISION MAKING REGARDING THE RETURN OF RESULTS ON A STUDY-BY-STUDY BASIS, (2) PROMOTE HIGH-QUALITY INDIVIDUAL RESEARCH RESULTS, (3) FOSTER PARTICIPANT UNDERSTANDING OF INDIVIDUAL RESEARCH RESULTS, AND (4) REVISE AND HARMONIZE CURRENT REGULATIONS.
