<u>Spam</u> Finn Brunton,2015-01-30 What spam is, how
it works, and how it has shaped online communities
and the Internet itself. The vast majority of all
email sent every day is spam, a variety of
idiosyncratically spelled requests to provide
account information, invitations to spend money on
dubious products, and pleas to send cash overseas.
Most of it is caught by filters before ever
reaching an in-box. Where does it come from? As
Finn Brunton explains in Spam, it is produced and
shaped by many different populations around the
world: programmers, con artists, bots and their
botmasters, pharmaceutical merchants, marketers,
identity thieves, crooked bankers and their
victims, cops, lawyers, network security
professionals, vigilantes, and hackers. Every time
we go online, we participate in the system of
spam, with choices, refusals, and purchases the
consequences of which we may not understand. This
is a book about what spam is, how it works, and
what it means. Brunton provides a cultural history
that stretches from pranks on early computer
networks to the construction of a global criminal
infrastructure. The history of spam, Brunton shows
us, is a shadow history of the Internet itself,
with spam emerging as the mirror image of the
online communities it targets. Brunton traces spam
through three epochs: the 1970s to 1995, and the
early, noncommercial computer networks that became
the Internet; 1995 to 2003, with the dot-com boom,
the rise of spam's entrepreneurs, and the first
efforts at regulating spam; and 2003 to the
present, with the war of algorithms—spam versus
anti-spam. Spam shows us how technologies, from
email to search engines, are transformed by
unintended consequences and adaptations, and how
online communities develop and invent governance
for themselves.

Legal Aspects of an E-Commerce Transaction examines various national and international laws and treaties as well as European Community law. Additionally, post-contractual issues, dispute resolution, and taxation are discussed, and their interaction is examined.   Email Spam Filtering Gordon V. Cormack,2008 Email Spam Filtering: A Systematic Review surveys current and proposed spam filtering techniques with particular emphasis on how well they work. The primary focus is on spam filtering in email, while similarities and differences with spam filtering in other communication and storage media – such as instant messaging and the Web – are addressed peripherally. Email Spam Filtering: A Systematic Review examines the definition of spam, the user's information requirements and the role of the spam filter as one component of a large and complex information universe. Well known methods are detailed sufficiently to make the exposition self-contained; however, the focus is on considerations unique to spam. Comparisons, wherever possible, use common evaluation measures and control for differences in experimental setup. Such comparisons are not easy, as benchmarks, measures and methods for evaluating spam filters are still evolving. The author surveys these efforts, their results and their limitations. In

spite of recent advances in evaluation methodology, many uncertainties (including widely held but unsubstantiated beliefs) remain as to the effectiveness of spam filtering techniques and as to the validity of spam filter evaluation methods. Email Spam Filtering: A Systematic Review outlines several uncertainties and proposes experimental methods to address them. Email Spam Filtering: A Systematic Review is a highly recommended read for anyone conducting research in the area or charged with controlling spam in a corporate environment.
