Year 2160 Amanda J Smith,2020-04-28 The year is 2160 and the country is unraveling from plaguing air contaminants. In this suspenseful dystopian, we follow Piper as she attempts to evade

Authority to save her friends and family suffering from the poisonous air. Along this journey, we piece together an entangled story from her past and experience the great strength that is born from loss. The ever-present governing agency, Authority, is close on her tail as she risks everything on a hunt for the next piece of the puzzle, a machine to heal the damage and eliminate the contaminants in order to save those at her compound. Will the hope of this machine be realized, or has it always been a myth just as she has feared? In this provocative post-apocalyptic tale, the reader glimpses at life without electricity, cars or safe oxygen to breathe as the dictatorship becomes all encompassing for every citizen across the country.
