Bulgaria's Integration Into the Pan-European Economy and Industrial Restructuring Bart?omiej Kami?ski, Francis Ng, 2006 (3) Exports of unskilled labor-intensive products continue towering over other exports even during the current expansionary phase. The composition of top performers in EU markets indicates the shift toward natural resource and capital-intensive products. Bulgaria's export offer in EU markets has begun shifting

toward more processed goods, mostly products of electro-engineering sectors. Bulgarian producers have made significant strides in information communication technology products and automotive parts. Trade in parts and engineering products has displayed strong growth. The returns usually associated with liberal reforms, that is, gains in competitiveness combined with a shift toward products in line with the country's endowments in production factors began to surface only recently. In contrast to the period preceding the second transformational recession in 1996-97, gains in competitiveness derive from corporate and industrial restructuring and not from subsidies.

### **Azerbaijan: Moving Toward More Diversified, Resilient, and Inclusive**

**Development** Aimee Hampel-Milagrosa, Aziz Haydarov, Kym Anderson, Jasmin Sibai, Edimon Ginting, 2020-08-01 Azerbaijan has set the course for the economy to reduce its dependence on oil by promoting new drivers of growth. By 2025, under the government's Strategic Roads Maps, a more diversified economy should take shape led by three sectors: agriculture, tourism, and manufacturing. Bold reforms need to strengthen areas of the economy that could otherwise impede this transition, and policy makers must resolutely stay on the reform path. The core message of this publication is diversification toward non-oil sources of growth alongside efforts to reduce macroeconomic risks and the high cost of finance, make the education system responsive to the needs of the labor market, close infrastructure gaps, and help economically significant state-owned enterprises become more efficient.

*Frontiers in the Science and Technology of Polymer Recycling* Güneri Akovali, Carlos

A. Bernardo, Jacob Leidner, L.A. Utracki, Marino Xanthos, 2013-03-09 Polymers, main components of plastics and rubbers, are being discarded in increasing quantities. But this waste can also be considered as 'plastic gold'. Public concern, coupled with the inherent value of the material, means that recycling is imperative. The present book presents a survey of current knowledge in the form of case studies, including current legal and educational issues. Topics covered also include regulation and practice in NATO countries, the economics of recycling, the reprocessing of single polymers and mixtures, and future prospects and strategies. Audience: Vital reading for all polymer scientists, technicians and engineers.

**Clothing Sacred Scriptures** David Ganz,Barbara Schellewald,2018-12-03 According to a longstanding interpretation, book religions are agents of textuality and logocentrism. This volume inverts the traditional perspective: its focus is on the strong dependency between scripture and aesthetics, holy books and material artworks, sacred texts and ritual performances. The contributions, written by a group of international specialists in

Western, Byzantine, Islamic and Jewish Art, are committed to a comparative and transcultural approach. The authors reflect upon the different strategies of »clothing« sacred texts with precious materials and elaborate forms. They show how the pretypographic cultures of the Middle Ages used book ornaments as media for building a close relation between the divine words and their human audience. By exploring how art shapes the religious practice of books, and how the religious use of books shapes the evolution of artistic practices this book contributes to a new understanding of the deep nexus between sacred scripture and art.
