Hung,Noreen Clancy,Jeff Dominitz,Eric Talley,Claude Berrebi,2008-03-12 In theory, financial professionals are relatively distinct: A broker-dealer conducts transactions in securities on behalf of itself and others; and an investment adviser provides advice to others regarding securities. Different laws regulate each type of professional, but boundaries have blurred. This report examines current business practices and investor understanding of each type.

Lifecycle Investing Ian Ayres,Barry Nalebuff,2010-05 Diversification provides a well-known way of getting something close to a free lunch: by spreading money across different kinds of investments, investors can earn the same return with lower risk (or a much higher return for the same amount of risk). This strategy, introduced nearly fifty years ago, led to such strategies as index funds. What if we were all missing out on another free lunch that's right under our noses? InLifecycle Investing, Barry Nalebuff and Ian Ayres-two of the most innovative thinkers in business, law, and economics-have developed tools that will allow nearly any investor to diversify their portfolios over time. By using leveraging when young-a controversial idea that sparked hate mail when the authors first floated it in the pages ofForbes-investors of all stripes, from those just starting to plan to those getting ready to retire, can substantially reduce overall risk while improving their returns. InLifecycle Investing, readers will learn How to figure out the level of exposure and leverage that's right foryou How the Lifecycle Investing strategy would have performed in the historical market Why it will work even if everyone does it Whennotto adopt the Lifecycle Investing strategy Clearly written and backed by rigorous research,Lifecycle Investingpresents a simple but radical idea that will shake up how we think about retirement investing even as it provides a healthier nest egg in a nicely feathered nest.

Diary of a Professional Commodity Trader Peter L. Brandt,2011-02-02 Trading is generally far more difficult in practice than in theory. The reality is that no trade set up or individual trader or system can identify profitable trades in advance with complete certainty. In A Year of Trading, long-time trader Peter Brandt reveals the anxieties and uncertainties of trading in a diary of his 2009 trades. He explains his thought process as he searches for trading opportunities and executes them. Each trade includes charts, an analysis of the trade, and a play-by-play account of how the trade unfolds.

Behavioral Finance: The Second Generation Meir Statman, 2019-12-02 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.
