### **The Fundamentals of Creative Advertising** Ken

Burtenshaw, Caroline Barfoot, Nik Mahon, 2011-09-19

The Fundamentals of Creative Advertising 2nd edition provides a rich introduction to the key elements of creative advertising. Burtenshaw, Mahon and Barfoot explore the role of the creative team (comprising art director and copywriter) and examine the ways in which these teams generate ideas and the techniques they utilize. This second edition reflects the changes that have taken place within the advertising industry over recent years and, in particular, the growth of digital media and integrated advertising campaigns. Interviews with leading practitioners, exercises and checklists combine to provide an up-to-date overview of the industry, and to encourage a practical application of the creative ideas explored within the book.

**LISS 2012** Zhenji Zhang, Runtong Zhang, Juliang Zhang, 2013-03-19 Information and communication technology has helped to provide a more effective network infrastructure and development platform for logistics and service operations. In order to meet the needs of consumers, and particularly to promote low-carbon development processes, new types of services will also emerge. LISS 2012 is a prime international forum for both researchers and industry practitioners to exchange the latest fundamental advances in the state of the art and practice of logistics, informatics, service operations and service science. Experts and researchers from related fields will discuss current issues and future development

opportunities, discuss and analyze developing trends and exchange the latest research and academic thought. The theme of the conference is Logistics and Service Science based on the Internet of Things.

*Mobility* Peter Adey,2009-09-10 As everything from immigration, airport security and road tolling become headline news, the need to understand mobility has never been more pertinent. Yet 'mobility' remains remarkably elusive in summary and definition. This introductory text makes 'mobility' tangible by explaining the key theories and writings that surround it. This book traces out the concept of mobility as a key idea within the discipline of geography as well as

subject areas from the wider arts and social sciences. The text takes an interdisciplinary approach to draw upon key writers and thinkers that have contributed to the topic. In analyzing these, it develops an understanding of mobility as a relationship through which the world is lived and understood. Mobility is organized around themed chapters discussing – 'Meanings', 'Politics', 'Practices' and 'Mediations', and the book identifies the evolution of mobility and its implications for theoretical debate. These include the way we think about travel and embodiment, to regarding issues such as power, feminism and post-colonialism. Important contemporary case-studies are showcased in boxes. Examples range from the mobility politics evident in the evacuation of the flooding of New Orleans, xenophobia in Southern Africa, motoring in India, to the new social relationships emerging from the mobile phone. The methodological quandaries mobility demands are addressed through highlighted boxes discussing both qualitative and quantitative research methods. Arguing for a more relational notion of the term, the book understands mobility as a keystone to the examination of issues from migration, war and transportation; from communications and politics to disability rights and security. Key concept and case-study boxes, further readings, and central issue discussions allow students to grasp the central importance of 'mobility' to social, cultural, political, economic and everyday terrains. The text also assists scholars of Geography, Sociology, Cultural Studies, Planning, and Political Science to

understand and engage with this evasive concept.

**Simulating Fuzzy Systems** James J.

Buckley,2005-02-01 Simulating Fuzzy Systems demonstrates how many systems naturally become fuzzy systems and shows how regular (crisp) simulation can be used to estimate the alpha-cuts of the fuzzy numbers used to analyze the behavior of the fuzzy system. This monograph presents a concise introduction to fuzzy sets, fuzzy logic, fuzzy estimation, fuzzy probabilities, fuzzy systems theory, and fuzzy computation. It also presents a wide selection of simulation applications ranging from emergency rooms to machine shops to project scheduling, showing the varieties of fuzzy systems.

**Advances in Intelligent Networking and Collaborative Systems** Leonard Barolli,Kin Fun Li,Hiroyoshi Miwa,2020-08-20 This book aims to provide the latest research findings, innovative research results, methods and development techniques from both theoretical and practical perspectives related to intelligent social networks and collaborative systems, intelligent networking systems, mobile collaborative systems, secure intelligent cloud systems, etc., as well as to reveal synergies among various paradigms in

such a multi-disciplinary field intelligent collaborative systems. With the fast development of the Internet, we are experiencing a shift from the traditional sharing of information and applications as the main purpose of the Web to an emergent paradigm, which locates people at the very centre of networks and exploits the value of people's connections, relations and collaboration. Social networks are also playing a major role in the dynamics and structure of intelligent Web-based networking and collaborative systems. Virtual campuses, virtual communities and organizations strongly leverage intelligent networking and collaborative systems by a great variety of formal and informal electronic relations, such as business-to-business, peer-to-peer and many types of online collaborative learning interactions, including the emerging e-learning systems. This has resulted in entangled systems that need to be managed efficiently and in an autonomous way. In addition, latest and powerful technologies based on grid and wireless infrastructure as well as cloud computing are currently enhancing collaborative and networking applications as a great deal but also facing new issues and challenges. The principal purpose of the research and development community is to stimulate research that will lead to the creation of responsive environments for networking and, at longer-term, the development of adaptive, secure, mobile and intuitive intelligent systems for collaborative work and learning.
