The new turn in India's economic policies and performance in the last decade of the twentieth century; the success of Indian enterprise in the post-WTO world; the emergence of a confident professional middle-class; a demonstrated nuclear capability; and the resilience of an open society and an open economy, in the face of multiple and complex challenges, have all shaped India's response to the tectonic shifts in the global balance of power in the post-Cold War era. In this collection of academic essays and newspaper columns, Baru explores the business of diplomacy and the diplomacy of business in a rising India. The role of India's cultural and intellectual 'soft power' in shaping global perceptions of India are examined. The book offers a panoramic view of the geopolitics and the geo-economics of India's recent rise as a free market democracy, and as such will interest both experts and lay readers.

Building Sustainable Competitive Advantage Dharendra Kumar, 2016-03-03 In *Building Sustainable Competitive Advantage* Dharendra Kumar shows how the Enterprise Excellence (EE) philosophy is a holistic approach for leading an enterprise to total excellence. It does this by focussing on achieving sustainable significant growth in revenue and profitability, reducing the business cycle time, strategically managing the enterprise risk and focusing on the needs of the customer. There may be various organizations within an enterprise but they must all focus on meeting or exceeding customer needs. Therefore, EE is an integrated approach affecting every employee, every functional area and strategy within the organization. Enterprise risk must be identified, assessed and prioritized; developing a growth strategy proposal which leadership has to execute in order to achieve goals. As business leaders spearhead the efforts, they must minimize, monitor and control the probability and/or impact of unfortunate events and maximize the realization of opportunities. The achievements in Enterprise Excellence can range from greater cost efficiencies, improved market perceptions, fundamental changes to markets, to new product and service offerings. There may also be significant upgrades in skills, technology, and business strategies. The scope of Enterprise Excellence can also range from operations activities, to business functions, to overall organization and to the enterprise as a whole. *Building Sustainable Competitive Advantage* is a comprehensive reference book for practising professionals, teaching faculty, and students alike.
