Thinking in New Boxes Luc De Brabandere,Alan Iny,2013-09-10 When BIC, manufacturer of disposable ballpoint pens, wanted to grow, it looked for an idea beyond introducing new sizes and ink colors. Someone suggested lighters. LIGHTERS? With an idea that seemed crazy at first, that bright executive, instead of seeing BIC as a pen company—a business in the PEN “box”—figured out that there was growth to be found in the DISPOSABLE “box.” And he was right. Now there are disposable BIC

lighters, razors, even phones. The company opened its door to a host of opportunities. IT INVENTED A NEW BOX. Your business can, too. And simply thinking “out of the box” is not the answer. True ingenuity needs structure, hard analysis, and bold brainstorming. It needs to start THINKING IN NEW BOXES—a revolutionary process for sustainable creativity from two strategic innovation experts from The Boston Consulting Group (BCG). To make sense of the world, we all rely on assumptions, on models—on what Luc de Brabandere and Alan Iny call “boxes.” If we are unaware of our boxes, they can blind us to risks and opportunities. This innovative book challenges everything you thought you knew about business creativity by breaking creativity down into five steps: • Doubt everything. Challenge your current perspectives. • Probe the possible. Explore options around you. • Diverge. Generate many new and exciting ideas, even if they seem absurd. • Converge. Evaluate and select the ideas that will drive breakthrough results. • Reevaluate. Relentlessly. No idea is a good idea forever. And did we mention Reevaluate? Relentlessly. Creativity is paramount if you are to thrive in a time of accelerating change. Replete with practical and potent creativity tools, and featuring fascinating case studies from BIC to Ford to Trader Joe’s, Thinking in New Boxes will help you and your company overcome missed opportunities and stay ahead of the curve. This book isn’t a simpleminded checklist. This is Thinking in New Boxes. And it will be fun. (We promise.) Praise for Thinking in New Boxes “Excellent . . . While focusing on business creativity, the principles in this book apply anywhere change is needed and will be of interest to anyone seeking to reinvent herself.”—Blogcritics “Thinking in New Boxes is a five-step guide that leverages the authors’ deep understanding of human nature to enable

readers to overcome their limitations and both imagine and create their own futures. This book is a must-read for people living and working in today's competitive environment."—Ray O. Johnson, Ph.D., chief technology officer, Lockheed Martin "Thinking In New Boxes discusses what I believe to be one of the fundamental shifts all companies/brands need to be thinking about: how to think creatively, in order to innovate and differentiate our brands. We need to thrive and lead in a world of accelerating change and this book challenges us to even greater creativity in our thinking. One of the best business books I've read in a long time."—Jennifer Fox, CEO, Fairmont Hotels & Resorts "As impressive as teaching new tricks to old dogs, Thinking in New Boxes is both inspirational and practical—a comprehensive, step-by-step guide to sharpening one's wits in order to harness creativity in the workplace."—Peter Gelb, general manager, Metropolitan Opera

Creativity Unlimited Micael Dahlen, 2010-03-19 Flying in the face of current thinking, this book suggests that we do not need to 'think outside the box' in our quest for creativity, rather we should rethink the way we look 'inside the box'. This idea will resonate only too well with those who have endeavoured to be creative by thinking outside that box, only to have their attempts scuppered by the constraints of bureaucracy and organizational politics. Instead of fighting a losing battle, the author suggests that creativity should be worked at within the constraints of the organizational box, but that space needs to be grown and allowed to be shaken up. Only by experimenting, mutating and finding new directions can you uncover business paths that lead to success. The reader is encouraged not to free themselves from all their knowledge and experiences (the thinking outside the box method) but to use their knowledge and experience in new ways. The book is structured around three key steps: Expanding the box: so that the pieces of the puzzle in it can move around more freely Filling the box: with even more knowledge, and how to get these new pieces of the puzzle to connect with the

existing ones Shaking the box: so that the pieces fall into new places and form new patterns. The book shows that anybody can be creative. The creative methods suggested in the book will be linked to real business examples from which techniques have been developed to help their implementation. Numerous exercises and 'eye-openers' form part of the practical implementation of Micael Dahlén's ideas. The book is framed by models and concepts of how creativity works (the creative process, the creative person and the creative result) and what its effects are.

Community-In-a-Box Mark Birch, 2020-09-30 A practical guide for community builders on building and scaling professional communities that thrive and transform the lives of the people within them through virtual and in-person events. Community is a hot topic in 2020. Enterprises, startups, investors, entrepreneurs, and creators are all jumping on board launching communities or building products for communities. This is especially timely given that a global pandemic has left people longing for human connection. And then there are the people like Mark Birch that just wanted to bring salespeople together. When Mark started the Enterprise Sales Forum, he had no big vision. It was just his way to convince salespeople and startup founders to meet and help each other. What started in a sweaty conference room for 50 people six years ago eventually blossomed into a community of 25,000 members and over 20 cities globally. Community-in-a-Box is a how-to guide into building and scaling a community from the ground up or reinvigorating existing communities. From the experiences of the Enterprise Sales Forum and other communities he launched, Mark weaves those stories into a book that leads you past the minefields and mistakes so you can confidently launch and grow a healthy community. Even though we all come to community building with our

own motivations, the end result is a labor of love that positively impacts the lives of many. Through this book, you will also feel the impact of the power of community and what it takes to grab the spark and start a movement!

The Three-Box Solution Vijay

Govindarajan, 2016-04-26 How to Innovate and Execute Leaders already know that innovation calls for a different set of activities, skills, methods, metrics, mind-sets, and leadership approaches. And it is well understood that creating a new business and optimizing an already existing one are two fundamentally different management challenges. The real problem for leaders is doing both, simultaneously. How do you meet the performance requirements of the existing business—one that is still thriving—while dramatically reinventing it? How do you envision a change in your current business model before a crisis forces you to abandon it? Innovation guru Vijay Govindarajan expands the leader's innovation tool kit with a simple and proven method for allocating the organization's energy, time, and resources—in balanced measure—across what he calls “the three boxes”:

- Box 1: The present—Manage the core business at peak profitability
- Box 2: The past—Abandon ideas, practices, and attitudes that could inhibit innovation
- Box 3: The future—Convert breakthrough ideas into new products and businesses

The three-box framework makes leading innovation easier because it gives leaders a simple vocabulary and set of tools for managing and measuring these different sets of behaviors and activities across all levels of the organization. Supported with rich company examples—GE, Mahindra & Mahindra, Hasbro, IBM, United Rentals, and Tata Consultancy Services—and testimonies of leaders who have successfully used this framework, this book solves once and for all the practical

dilemma of how to align an organization on the critical but competing demands of innovation.

Business in the box Arnaud Segla, 2017-11-21

INTRODUCTION Since the more than symbolic loss of the twin towers and the subsequent crises, we have entered into a new phase of globalization. In an evolving cycle, we moved from a market economy to an economy of communities (including ethnic, regional, temporal, virtual ...) with the specificity that they are more interconnected than in the past of concentrations. The current economic challenge of maintaining a minimum level of growth and ensuring a suitable rate of employment has required a redefinition of alternative solutions for segments of the population with insufficient income; not necessarily low income. This nuance makes the difference! Indeed, this segment can be integrated into the economy. Through various initiatives and business projects geared towards ethnic groups, the relevance of this segment has been highlighted and must be part of the GDP. This information can lead many to wonder how it might impact them and how much interest they ought to be taking. This guide targets diaspora members living outside their birth countries particularly those in economically developed countries and native members of these countries wishing to initiate an informal way of doing business. Quebec is, as such, one of the largest ethnic communities ("nation") in Canada and with the "visible minorities" (especially Black communities), it faces the same daunting challenge of economic claim based on my analysis. Aboriginal communities themselves being more inclined towards issues of sharing revenues from the exploitation of their lands or estates. Becoming an ethnic entrepreneur is a question of one's financial environment or circumstances such as barriers to employment. Due to increasing

migration for economic reasons, many are driven to follow this path. The principle of solidarity between entrepreneurs can create a greater impact than the traditional view of competition in the community. Pairing economic structures is an attempt at regulating the imbalances brought about by globalization.

The World in a Box Anke te Heesen, 2002-05 This is a book about a box that contained the world. The box was the Picture Academy for the Young, a popular encyclopedia in pictures invented by preacher-turned-publisher Johann Siegmund Stoy in eighteenth-century Germany. Children were expected to cut out the pictures from the Academy, glue them onto cards, and arrange those cards in ordered compartments—the whole world filed in a box of images. As Anke te Heesen demonstrates, Stoy and his world in a box epitomized the Enlightenment concern with the creation and maintenance of an appropriate moral, intellectual, and social order. The box, and its images from nature, myth, and biblical history, were intended to teach children how to collect, store, and order knowledge. te Heesen compares the Academy with other aspects of Enlightenment material culture, such as commercial warehouses and natural history cabinets, to show how the kinds of collecting and ordering practices taught by the Academy shaped both the developing middle class in Germany and Enlightenment thought. *The World in a Box*, illustrated with a multitude of images of and from Stoy's Academy, offers a glimpse into a time when it was believed that knowledge could be contained and controlled.
