Risky Business William D. Romanowski, 2017-07-28 The role of motion pictures in the popularity of rock music became increasingly significant in the latter twentieth century. Rock music and its interaction with film is the subject of this significant book that re-examines and extends Serge Denisoff's pioneering observations of this relationship. Prior to Saturday Night Fever rock music had a limited role in the motion picture business. That movie's success, and the success of its soundtrack, began to change the silver screen. In 1983, with Flashdance, the situation drastically evolved and by 1984, ten soundtracks, many in the pop/rock genre, were certified platinum. Choosing which rock scores to discuss in this book was a challenging task. The authors made selections from seminal films such as The Graduate, Easy Rider, American Graffiti, Saturday Night Fever, Help!, and Dirty Dancing. However, many productions of the period are significant not because of their success, but because of their box office and record store failures. Risky Business chronicles the interaction of two major mediums of mass culture in the latter twentieth century. This book is essential for those interested in communications, popular culture, and social change.

Business Analytics Sanz Jorge L C, 2016-09-29 Technological advances in the last five years have allowed organizations to use Business Analytics to provide insights, increase understanding and it is hoped, gain the elusive 'competitive edge'. The rapid development of Business Analytics is impacting all enterprise competences profoundly and classical business professions are being redefined by a much deeper interplay between business and information systems. As computing capabilities for analysis has moved outside the IT glass-house and into the sphere of individual workers, they are no longer the exclusive domain of IT professionals but rather accessible to all employees. Complex open-source data analytics packages and client-level visualization tools deployed in desktops and laptops equip virtually any end-user with the instruments to carry out significant analytical tasks. All the while, the drive to improve 'customer experience' has heightened the demand for data involving customers, providers and entire ecosystems. In response to the proliferation of Business Analytics, a new Center and Masters of Science Program was introduced at the National University of Singapore (NUS). The Center collaborates with over 40 different external partner organizations in Asia-Pacific with which all MSBA students undertake individual projects. Business Analytics: Progress on Applications in Asia Pacific provides a useful picture of the maturity of the Business Analytics domain in Asia Pacific.

Race Experts Linda Kim, 2018-08 In *Race Experts* Linda Kim examines the complicated and ambivalent role played by sculptor Malvina Hoffman in *The Races of Mankind* series created for the Chicago Field Museum in 1930. Although Hoffman had training in fine arts and was a protégé of Auguste Rodin and Ivan Meštrović, she had no background in anthropology or museum exhibits. She was nonetheless commissioned by the Field Museum to make a series of life-size sculptures for the museum's new racial exhibition, which became the largest exhibit on race ever installed in a museum and one of the largest sculptural commissions ever undertaken by a single artist. Hoffman's *Races of Mankind* exhibit was realized as a series of 104 bronzes of racial types from around the world, a unique visual mediation between anthropological expertise and everyday ideas about race in interwar America. Kim explores how the artist brought scientific understandings of race and the everyday racial attitudes of museum visitors together in powerful and productive friction. The exhibition compelled the artist to incorporate not only the expertise of racial science and her own artistic training but also the popular ideas about race that ordinary Americans brought to the museum. Kim situates the *Races of Mankind* exhibit at the juncture of these different forms of racial expertise and examines how the sculptures represented the messy resolutions between them. *Race Experts* is a compelling story of ideological contradiction and accommodation within the racial practices of American museums, artists, and audiences.

North Korea Henry Marr, 2018-12-14 This new edition of Bradt's North Korea has been completely written from scratch and remains the only standalone guide to what is often regarded as the world's most secretive state, a place never far from media scrutiny but about which very little is actually known in the wider world. Detailed is everything you need to know for a successful visit, from the practicalities of how to get there and who to go with to cultural sensitivities and etiquette, safety, money and travelling around. Amongst the places covered are the supra-centrally planned showcase capital of Pyongyang; Panmunjom, where North meets South face-to-face inside the 4km-wide DMZ - the dividing line between two nations and one people; Kungansan Tourist Resort, the chiefly South Korean-built resort offering fantastic hikes; and Paektusan, the highest peak in all of Korea and Manchuria. For the intrepid and open-minded traveller North Korea is a truly mesmerising destination with a rich past and fascinating contemporary history. Visitors today are immersing themselves in an unrivalled experience in what is seemingly the last country in the world not to have submitted to globalisation, the last country still clinging on to the 20th century experiment in communism that for all others crumbled away shortly after the collapse of the Berlin Wall. Outside of the showcase socialist paradise of Pyongyang, visitors will find stunning natural scenery, from beautiful coastline and beaches to spectacular mountains, such as legendary Paektusan. Whilst many hold the ill-conceived notion that a visit to North Korea may not be safe, the reality is that visitors are warmly welcomed and still considered more as 'guests of the state' than as mere tourists. Written by expert author Henry Marr, who first visited North Korea in 2005 and has since been back more than twenty times, Bradt's North Korea is an indispensable guide to understanding and getting to know one of the world's most curious destinations.
