Risky Business William D. Romanowski,2017-07-28 The role of motion pictures in the popularity of rock music became increasingly significant in the latter twentieth century. Rock music and its interaction with film is the subject of this significant book that re-examines and extends Serge Denisoff's pioneering observations of this relationship.Prior to Saturday Night Fever rock music had a limited role in the motion picture business. That movie's success, and the success of its soundtrack, began to change the silver screen. In 1983, with Flashdance, the situation drastically evolved and by 1984, ten soundtracks, many in the pop/rock genre, were certified platinum. Choosing which rock scores to discuss in this book was a challenging task. The authors made selections from seminal films such as The Graduate, Easy Rider, American Grafitti, Saturday Night Fever, Help!, and Dirty Dancing. However, many productions of the period are significant not because of their success, but because of their box office and record store failures.Risky Business chronicles the interaction of two major mediums of mass culture in the latter twentieth century. This book is essential for those interested in communications, popular culture, and social change.

Business Analytics Sanz Jorge L C,2016-09-29 Technological advances in the last five years have allowed organizations to use Business Analytics to provide insights, increase understanding and it is hoped, gain the elusive

'competitive edge'. The rapid development of Business Analytics is impacting all enterprise competences profoundly and classical business professions are being redefined by a much deeper interplay between business and information systems. As computing capabilities for analysis has moved outside the IT glass-house and into the sphere of individual workers, they are no longer the exclusive domain of IT professionals but rather accessible to all employees. Complex open-source data analytics packages and client-level visualization tools deployed in desktops and laptops equip virtually any end-user with the instruments to carry out significant analytical tasks. All the while, the drive to improve 'customer experience' has heightened the demand for data involving customers, providers and entire ecosystems. In response to the proliferation of Business Analytics, a new Center and Masters of Science Program was introduced at the National University of Singapore (NUS). The Center collaborates with over 40 different external partner organizations in Asia-Pacific with which all MSBA students undertake individual projects. Business Analytics: Progress on Applications in Asia Pacific provides a useful picture of the maturity of the Business Analytics domain in Asia Pacific.

Time Out Seoul Editors of Time Out, 2011-11-08 Time Out Seoul helps travelers get the best out of the ever-changing South Korean metropolis. Race Experts Linda Kim, 2018-08 In *Race Experts* Linda Kim examines the complicated and ambivalent role played by sculptor Malvina Hoffman in *The Races of Mankind* series created for the Chicago Field Museum in 1930. Although Hoffman had training in fine arts and was a protégé of Auguste Rodin and Ivan Meštrović, she had no background in anthropology or museum exhibits. She was nonetheless commissioned by the Field Museum to make a series of life-size sculptures for the museum's new racial exhibition, which became the largest exhibit on race ever installed in a museum and one of the largest sculptural commissions ever undertaken by a single artist. Hoffman's *Races of Mankind* exhibit was realized as a series of 104 bronzes of racial types from around the world, a unique visual mediation between anthropological expertise and everyday ideas about race in interwar America. Kim explores how the artist brought scientific understandings of race and the everyday racial attitudes of museum visitors together in powerful and productive friction. The exhibition compelled the artist to incorporate not only the expertise of racial science and her own artistic training but also

the popular ideas about race that ordinary Americans brought to the museum. Kim situates the Races of Mankind exhibit at the juncture of these different forms of racial expertise and examines how the sculptures represented the messy resolutions between them. *Race Experts* is a compelling story of ideological contradiction and accommodation within the racial practices of American museums, artists, and audiences.
