Forex Trading Emraan Hussein, 2018-08-14 THIS BOOK IS PROBABLY THE MOST HONEST BOOK YOU WILL FIND ON FOREX TRADING This book is for: - Small traders who are already into Forex trading but finding it difficult to make money and may be losing money -Those who want to enter Forex trading but don't know how to manage it with a small account -Those who had tried Forex trading before but already quit after getting losses I have not wasted a single page of this book by writing unnecessary theories and presenting confusing technical analysis because I have read many books myself and most of them contained too much theories and technical analysis and after reading such books, I found myself to be more confused about what to do and how to do. Thus, I have simplified the things for my readers. No matter, if you are already in trading, already out of trading or want to be in trading, this book will guide you exactly what to do and how to do. I have only given those strategies which are tried and tested and for each strategy you will find exact entry points, take profit and stop loss levels. Logical explanation for each strategy has also been given. Real-time examples are given for each strategy so you can understand clearly. For most of the strategies, color charts are also given for your easy understanding. SO YOU CAN NOW GENERATE YOUR OWN BUY AND SELL SIGNALS. ALL THE CHARTS SHOWN IN THE BOOK, TO PROVE THE STRATEGIES, ARE REAL TIME CHARTS FROM LATEST DATES AND YOU CAN VERIFY THESE IN THE CHARTS OF YOUR MT4 OR MT5. The intention of writing this book is to give you the clear picture and not to show you any dreams which I already know cannot be fulfilled. I have been trading since last 12 years. I have seen many ups and downs with Forex trading and finally found a way to survive. In the beginning I lost money.....never made a penny in the first year but intelligently I was putting little money at stake. Reason is that I wanted to get the insight about Forex trading and I really believed that the experience which I will obtain by blowing away \$500 will be the same for \$10000 so why use bigger amount to get the insight. This book is basically for small traders who are already into Forex trading or want to start Forex trading with a small amount to generate some extra income but have no knowledge of technical charts. Instead of generating their own buy/sell signals, they depend of the brokers to provide them the signals. With all my experience, I can assure you this it is never going to work this way. The signals which you will receive from the Forex broker will definitely help you in earning a dollar in one trade but at the same time will rip you off 100 dollars in another trade. Forex brokers are smart and very calculative but I don't blame them because this is what their business is. Your loss is their profit so they are doing what any other business would do. So, you are the only one who can save yourself from losses. Various sources are available in the market for trading signals: -Brokers send you signals if you are their client -You can buy trade signals from various sites on monthly or yearly subscriptions -Copy trading where they give you access to live trading room and you can copy their trades I am not against any of these but after all my experience in Forex trading, I realized that it's best that you must be able to generate your own signals which will give you a logical satisfaction that you are putting the trade in the right direction. With the knowledge you will gain from this book, even if you use the signals from the brokers, or buy signals from various sites or copy trading, you will be absolutely able to analyze these yourself for accuracy rather than using these blindly and falling in the trap. It is a win-win situation for YOU. PRICE OF THIS BOOK IS ON THE BASIS OF THE QUALITY INFORMATION AVAILABLE IN THIS BOOK.

Forex trading can be highly rewarding, but it also carries inherent risks. Here are some key tips to get started: "Education: Invest time in learning about Forex trading, including market mechanics, analysis techniques, risk management, and trading strategies. "Start Small: Begin with a demo account to practice trading without real money. Once comfortable, start with a small amount of capital to avoid significant losses while you gain experience. "Risk Management: Set a risk limit per trade and never risk more than you can afford to lose. Use stop-loss orders to protect your capital. "Stay Disciplined: Stick to your trading plan and avoid emotional decision-making. Greed and fear can lead to impulsive actions. "Diversification: Avoid putting all your capital into one trade. Diversify across different currency pairs to spread risk. "Monitor Economic Events: Stay informed about economic news and events that can impact currency markets. "Patience and Practice: Success in Forex trading takes time and practice. Be patient, learn from your mistakes, and continually improve your trading skills. "Remember, Forex trading is not a get-rich-quick scheme. It requires dedication, knowledge, and discipline. Always be prepared to adapt to changing market conditions and stay focused on long-term success."

In this book series that I prepared, the training set that will be a profitable investor for education will guide the investors and you can safely enter the transaction. I realized how difficult it was for new investors to find correct information, but it was more difficult to find any training that could be applied to our own trade. It is impossible to come across a clean and tidy option to Forex and Binary Options right on the Internet. The extent to which the information you can find reflects the truth is uncertain. It only included a few resources on forex - everything was messy. There was no place for forex currency for new provisions. We were left to learn information such as MACD, trade psychology on another website, and risk management on a 10. website. Forex is one of the newest people who have heard about the Forex Exchange trade, but it is meant to be heard more in these trading years but not fully described in the market. For more than 10 years, I have prepared this training series for you with Millions of Knowledge to Learn Skills in your transactions in order to grow Open Market Dynamics by protecting our capital with the knowledge and experience I gained by reading a Lots training article on how to trade in the Forex Exchange Market. Everything is here to ensure the coordination between the trading strategies, market analysis and the psychology triangle in the educational series that is now included in this course content. Position Trading Alpha Bull Traders ,2019-08-12 Finally, an investing book which isn't an infomercial! When you are learning to trade, there are 2 types of books that you don't need. There are the dry-as-dust academic books that require a PhD in math to read. And then there are the books about a trader who turned \$5,000 into \$100 million, but with no details about how he did it... but he'll let you pay thousands of dollars to learn how. Here's the deal. Position trading is how men like Warren Buffett and Ray Dalio amassed a net worth of tens of billions of dollars. By trading a few times per year, rather than a few

times per day. Which is why people who have followed their advice to the letter... Have literally made millions of dollars just from doing exactly as the advice suggests... No more and no less! And many of these people started off as small part-time traders like you and I. Over the years, the team at Alpha Bull Traders has continually refined a position trading strategy which has resulted in untold amounts of profit. Using a combination of western technical and fundamental analysis and ancient Japanese candlestick charting techniques – we are able to note which days you should... and more importantly which days you shouldn't be trading. Because here's the big "secret" which people don't want you to know... You only need to trade between 5-15 times a year to make huge profits in the stock market! In fact, some years have seen huge gains in our portfolio with as little as 3 trades. Here's just a fraction of what you'll learn inside: How to easily profit from the bear market with one simple fund. 95% of beginner investors and traders don't know about it, and yet you can easily net 10-12% a year in a bear market. The #1 thing new traders miss about aftermarket trading. Get this right and you'll have a huge advantage How to set a proper stop loss so you don't get stopped out prematurely. One of the biggest mistakes new traders make is having a stop loss which is too tight. Do this instead and you'll profit when the market moves in your favor. The "zen trader" strategy which makes you immune to losses (which although rare, will occur with any trading plan) A useful, yet barely known website which breaks company news faster than relying on mainstream news services. How to use the "other 80/20 rule" to profit from short term price movements. 3 profit securing lessons to learn from the DOTCOM bubble How to beat the market without spending hours each day monitoring stocks. Why a new trader should never trade cryptocurrency, and what to trade instead How one trader made \$1.4 million in a single day with 1 options trade, and why you shouldn't try to replicate their strategy Money management for absolute beginners How to profit from legal marijuana (all the upside of cannabis growing companies but without the red tape and volatility) ...and much, much more. You may have experienced various obnoxious and even misleading advertisements of easy, get rich trading strategies. This is not one of those. You won't have to spend thousands on expensive trading software or "magic bullet systems" In fact, you can get started using an online trading account and use free websites for your information (you'll find the best two in Chapter 7) You will build up both your skills and confidence, with practical "how-to" approaches. All written in plain, easy to understand English. So if you want to make money in your spare time, and have fun while doing it... scroll up and click "add to cart"
