Micro Middle Ages Paul Edward Dutton,2023-12-01 Micro Middle Ages brings together five microhistorical case studies focusing on small or seemingly inconsequential evidence that leads to broader conclusions about medieval history and the way we do and understand history in general. Paul Dutton provides an

overview of microhistorical approaches and theorizes about its use in pre-modern history. As opposed to studying history “from above” or history “from below,” Dutton shows the advantages for historians of doing history “from the inside out,” starting from some single, overlooked, but potentially knowable thing, delving deep inside, and then reattaching it to its time and place. Such an approach has one abiding advantage: its insistence on being grounded in the particularity of the evidence. The book highlights what the microhistorical is, its conceptual and practical challenges. Dutton argues that the attention to the micro has always been with us and is a constitutive, cognitive part of who we are as human beings.

Worldviews of the Greenlanders Birgitte Sonne, 2017 Ninety years ago, Knud Rasmussen’s popular account of his scientific expeditions through Greenland and North America introduced readers to the culture and history of arctic Natives. In the intervening century, a robust field of ethnographic research has grown around the Inuit and Yupiit of North America—but, until now, English-language readers have had little access to the broad corpus of work on Greenlandic natives. *Worldviews of the Greenlanders* draws upon extensive Danish and Greenlandic

research on Inuit arctic peoples—as well as Birgitte Sonne’s own decades of scholarship and fieldwork—to present in rich detail the key symbols and traditional beliefs of Greenlandic Natives, as well as the changes brought about by contact with colonial traders and Christian missionaries. It includes critical updates to our knowledge of the Greenlanders’ pre-colonial world and their ideas on space, time, and other worldly beings. This expansive work will be a touchstone of Arctic Native studies for academics who wish to expand their knowledge past the boundaries of North America.

Monster Walter Dean Myers, 2004-12-14 While on trial as an accomplice to a murder, 16-year-old Steve Harmon records his experiences in prison and in the courtroom in the form of a film script, as he tries to come to terms with the course his life has taken.

From Cairo to Coffee Gillian Roberts, 2010-04 I have written a true account of a relationship and its despicable ending: that almost cost me my life. That there was, indeed, a relationship is patent. The truth is all around me. A great number of points of interest, irregularities and proof are now in the light that were once in the dark. Having shown that, it is understandable to see, why the betrayal was so devastating. And why my trust was so misplaced.

There are also in life acknowledged truths: things we will believe without evidence. It is within acceptable limits to presuppose that in a relationship that had spanned almost eight years, that assurances were given and promises were made. I am no author, no writer, no spinner of tales. The desire to record and write down the truth was a lifeline. I wrote my story because I'm trying to reclaim my life: the book is a benchmark of my progress to date. I nearly paid a terrible price. The relationship that dominated my life is over now, and its despicable ending. I have lost someone I thought I could trust unequivocally. I have lost my home, and my job. And my beautiful cat - Cleopatra, I couldn't take her to where I moved to, so I lost even her. I lost my mind for awhile: and I nearly lost my life. Now I have to move forward, and hope that the grief will loosen its hold, and a brighter future will give a better shape back to the world. In his last e-mail to my daughter he said, 'Today's disagreements will resolve themselves and become yesterday's forgotten problems.' I do hope that he's right. Gillian Roberts September 2008

Instructional Skills Handbook David G. Armstrong, Jon J. Denton, Tom V. Savage, 1978

An American Provence Thomas P. Huber, 2011-12-15 I have

talked about luscious wines and succulent fruit and exquisite dinners. But there may be no more evocative experience of the two valleys than the smell of new-mown hay in the fields at dusk. If a person were to close their eyes, they could not tell if they were in Provence or the North Fork Valley. That sweet, earthy odor is part of the beauty of these places. -From *An American Provence* In this poetic personal narrative, Thomas P. Huber reflects on two seemingly unrelated places-the North Fork Valley in western Colorado and the Coulon River Valley in Provence, France-and finds a shared landscape and sense of place. What began as a simple comparison of two like places in distant locations turned into a more complex, interesting, and personal task. Much is similar-the light, the valleys, the climate, the agriculture. And much is less so-the history, the geology, the physical makeup of villages. Using a geographer's eye and passion for the land and people, Huber examines the regions' similarities and differences to explore the common emotional impact of each region. Part intimate travelogue and part case study of geography in the real world, *An American Provence* illuminates the importance sense of place plays in who we are.

The Kneeling Man Leta McCollough Seletzky,2023-04-04 BCALA Literary Award Winner The intimate and heartbreaking story of a Black undercover police officer who famously kneeled by the assassinated Rev. Dr. Martin Luther King Jr—and a daughter's quest for the truth about her father In the famous photograph of the assassination of Martin Luther King Jr. on the balcony of Memphis's Lorraine Motel, one man kneeled down beside King, trying to staunch the blood from his fatal head wound with a borrowed towel. This kneeling man was a member of the Invaders, an activist group that was in talks with King in the days leading up to the murder. But he also had another identity: an undercover

Memphis police officer reporting on the activities of this group, which was thought to be possibly dangerous and potentially violent. This kneeling man is Leta McCollough Seletzky's father. Marrell McCollough was a Black man working secretly with the white power structure, a spy. This was so far from her understanding of what it meant to be Black in America, of everything she eventually devoted her life and career to, that she set out to learn what she could about his life, his actions and motivations. But with that decision came risk. What would she uncover about her father, who went on to a career at the CIA, and did she want to bear the weight of knowing?

Marine Raiders Carole Engle Avriett, 2021-08-31 FORGOTTEN NO MORE. The American people revere their elite combat units, but one of these noble bands has been unjustifiably forgotten—until

now. At the beginning of World War II, military planners set out to form the most ruthless, skilled, and effective force the world had ever seen. The U.S. Marines were already the world's greatest fighters, but leadership wanted a select group to conduct special operations at the highest level in the Pacific theater. And so the Marine Raiders were born. These young men, the cream of the crop, received matchless training in the arts of war. Marksmen, brawlers, and tacticians, the Marine Raiders could accomplish their objective before the enemy even knew they were there. These heroes and their exploits should be the stuff of legend. Yet even though one of their commanders was President Roosevelt's son, they have disappeared into the mists of history—the greatest warriors you've never heard of. Carole Engle Avriett's thorough telling of the Marine Raider story includes: The personal narratives of four men who served as Marine Raiders Frontline accounts of the Raiders' most important engagements The explanation for their obscurity, despite their earlier fame The Marine Raiders were one of the greatest forces ever to take the field under the American flag. After reading this book, you'll know why.

Identity Safe Classrooms, Grades 6-12 Becki Cohn-

Vargas,Alexandrea Creer Kahn,Amy Epstein,2020-08-04 Welcome

to Identity Safe Classrooms! In identify safe classrooms, students facing negative stereotypes or viewed as different are “seen,” accepted, and valued for who and what they are. Their identity is embraced as an asset not a barrier for school success. Identity safety is a research-based set of practices that counter the harmful effects of stereotype threat and allow our students to reach their full capacity for learning, foster positive relationships, and better appreciate the full spectrum of human differences. The second of a two-volume set, *Identity Safe Classrooms, Grades 6-12*, is a call for educators to come together and realize a vision of schools as transformative places of opportunity and equity for all students. Inside you’ll find: Design principles for promoting belonging and a welcoming classroom environment Compelling evidence from identity safety research on ways to mitigate stereotype threat along with counter-narratives that challenge societal biases about gender, race, and other differences Pragmatic strategies for student-centered teaching, including trauma-informed practices, that hold high expectations and validate each student’s background as a resource for learning Vignettes with concrete examples and try-it-out activities and prompts for self-reflection Devour *Identity Safe Classrooms*, adopt its practices, and soon enough you’ll inspire in

all of your students a greater sense of empathy and agency in their educational experiences. “Dr. Becki Cohn-Vargas along with Alexandria Creer Kahn and Amy Epstein show us the intersections between adolescent identity development, racial identity development, and social-emotional development so we know how to use the diversity in classrooms as our strength.” --Zaretta Hammond, Author of Culturally Responsive Teaching and the Brain “Identity Safe Classrooms should be in the hands of every educator who walks into a school. It's clear and accessible, grounded in research, thought-provoking and engaging, and actionable, and fills a crucial gap in our resources for creating just and liberated schools.” --Elena Aguilar, Author of The Art of Coaching “The authors have done an excellent job showing how an identity safe classroom integrates the growth mindset in a secondary school. When students feel accepted and valued, when they feel safe learning from mistakes and encouraged to continually grow as learners, they can reach their highest potential.” --Carol Dweck, Stanford University

And he's not happy when a bossy physical therapist named Jordan Delaney is hired to assist in his recovery. But Kodiak soon realizes what he thought had been a gross miscalculation on his part had actually been an attempt on his life. He may be stubborn as a mule but he knows he's going to have to cooperate with the therapist if his physical condition is going to improve. Can Jordan get Kodiak back on his feet before the person who's trying to kill him tries again?

Curriculum, Environment, and the Work of C. A. Bowers Audrey

Dentith, David Flinders, John Lupinacci, Jennifer Thom, 2021-06-28

This edited volume extends ecological approaches to curriculum

theory by recognizing and building on the contributions of the late Chet A. Bowers to curriculum and ecological studies globally. Chapters provide in-depth explanation of Bowers' central contributions to the field, including his identification of the linguistic roots of ecological degradation; the need for school curricula to support sustainability; and the principles of cultural commons, eco-justice, and ecological intelligence. Building on these ideas and emphasizing the links between curriculum studies, social justice, and environmental education, the text illustrates how Bowers' ideas must now inform future approaches to schooling, teacher education, research, and Indigenous communities to guard against the global ecological crises we now face. This text will benefit researchers, academics, and educators with an interest in curriculum studies, sustainability education, and environmental studies in particular. Those interested in the sociology of education, educational change, and school reform will also benefit from the book.
