A History of Rome During the Later Republic and Early Principate Abel Hendy Jones Greenidge, 1905

A History of Rome from 133 B.C. to 70 A.D. (1904) A.H.J. Greenidge, 2018-09-28 First published in 1904, this volume began what was to be the magnum opus of the highly regarded Classical scholar, A.H.J. Greenidge. Though published posthumously, the work stands alone as a valuable contribution to Classical history. Beginning with a socioeconomic history which exposes the conditions preceding and determining the great conflict of interests to follow, Greenidge then explores the story of Rome from Scipio Aemilianus and the Gracchi brothers until the second election of Marius to the consulship.

Intelligent Multimedia Surveillance Pradeep K. Atrey, Mohan S. Kankanhalli, Andrea Cavallaro, 2013-11-27 Intelligent multimedia surveillance concerns the analysis of multiple sensing inputs including video and audio streams, radio-frequency identification (RFID), and depth data. These data are processed for the automated detection and tracking of people, vehicles, and other objects. The goal is to locate moving targets, to understand their behavior, and to detect suspicious or abnormal activities for crime prevention. Despite its benefits, there is societal apprehension regarding the use of such technology, so an important challenge in this research area is to balance public safety and privacy. This edited book presents recent findings in the field of intelligent multimedia surveillance emerging from disciplines such as multimedia computing, computer vision, and artificial intelligence. It consists of nine chapters addressing intelligent video surveillance, video analysis of crowds, privacy issues in intelligent multimedia surveillance, RFID technology for localization of objects, object tracking using visual saliency information, estimating multiresolution depth using active stereo vision, and performance evaluation for video surveillance systems. The book will be of value to researchers and practitioners working on related problems in security, multimedia, and artificial intelligence.
