**How the Internet Really Works** Article 19, 2020-12-11 An accessible, comic book-like, illustrated introduction to how the internet works under the hood, designed to give people a basic understanding of the technical aspects of the Internet that they need in order to advocate for digital rights. The internet has profoundly changed interpersonal communication, but most of us don't really understand how it works. What enables information to travel across the internet? Can we really be anonymous and private online? Who controls the internet, and why is that important? And... what's with all the cats? How the Internet Really Works answers these questions and more. Using clear language and whimsical illustrations, the

authors translate highly technical topics into accessible, engaging prose that demystifies the world's most intricately linked computer network. Alongside a feline guide named Catnip, you'll learn about: The How-What-Why of nodes, packets, and internet protocols Cryptographic techniques to ensure the secrecy and integrity of your data Censorship, ways to monitor it, and means for circumventing it Cybernetics, algorithms, and how computers make decisions Centralization of internet power, its impact on democracy, and how it hurts human rights Internet governance, and ways to get involved This book is also a call to action, laying out a roadmap for using your newfound knowledge to influence the evolution of digitally inclusive, rights-respecting internet laws and policies. Whether you're a citizen concerned about staying safe online, a civil servant seeking to address censorship, an advocate addressing worldwide freedom of expression issues, or simply someone with a cat-like curiosity about network infrastructure, you will be delighted -- and enlightened -- by Catnip's felicitously fun guide to understanding how the internet really works!

*How the Internet Works for Kids* Fernando Uilherme Barbosa de Azevedo,2019-11 'Mom, what's the

Internet?'Imagine yourself doing your monthly household budget one evening when your four-year-old daughter suddenly walks in asking you that. At that moment, you're busy trying to figure out why you've had more credits than debits on your balance sheet. You felt that your brain is about to short-circuit. And it's past her bedtime.'John Noah Mason Smith, you're forgetting that you're talking to a 60-year-old.'Your grandma calls you because she wants to learn how to use the Internet. You explain that it's not easy to teach that over the phone. It has to wait until you come over for Thanksgiving. She vehemently insists. You ask why. She tells you that she's heard about Tinder. And she wants her own account. Now.As you can imagine, explaining what social media is to a child or to a senior can, in itself, be challenging. How much more if you're asked to explain the Internet as a whole? Through this eBook, you'll encounter tons of metaphors that can help you do exactly that. From the seemingly out-of-this-world concept of the cloud, to how letter gets delivered without paper, to how a person's face ends up on a computer monitor, this eBook will showcase examples as models for explanation for the innocent young ones to the tenured baby boomer and Gen Xers. In the end, you'll realize that while you're aware of the technological gap that exists between generations, you won't really feel how significant that is until you're faced in a situation where you have to explain things to the unknowing.Now, please take note that not all of the discussions and examples offered in this eBook may be suitable for a child or a senior. Learning is still subjective and contextual so there may be times that you will be required to be creative.What this eBook intends to do is to just show you some metaphorical examples of how to answer those simple questions that are tough to answer if your audience is not technologically savvy like you.

**Surfing on the Internet** J. C. Herz, 1996-02-01 In secret, underground, an amazing new world has taken shape, an alternate universe where technical communications sit alongside bulletin boards devoted to TV sitcoms, popular music, and every imaginable sexual proclivity. The Internet has its own language, its own rituals, its own code of ethics, and even its own ways of punishing outsiders. Let the newbie beware! Surfing on the Internet is a fearless excursion through this remarkable new world, in the company of one of the most inventive young nonfiction writers at work today. Fueled by Fruity Pebbles and caffeine, J. C. Herz, a digital Dian Fossey loose in the jungle of Net life, embarks on an on-line odyssey. Beginning with worldwide message boards that feature tips for phreaking (phone tapping) and plots to assassinate Barney the purple dinosaur, she brings to life the anarchic sprawl of the Net, exploring the flames (personal tirades), the aliases (one guy she meets has 158), the Net cities and virtual saloons where the digerati congregate. No corner of the Net is beyond the reach of her curiosity, and some of those corners turn out to be pretty dark. Sex on-line has its limitations, for instance (although the cross-gender possibilities are intriguing). There are the out-and-out nuts who stretch even the most liberal free-speech ethos. And there's the chilling case of Kieran, the Internet ghost whose only off-line visitors for months are the people who deliver takeout food to his apartment. When last seen, J. C. Herz is checking into an Internet addicts

support group - meeting on-line, of course. Surfing on the Internet is a romp through the frontier of the twenty-first century, and J. C. Herz is a brilliant and daredevil guide. Don't log on without it.
