Capture-Recapture: Parameter Estimation for Open Animal Populations George A. F. Seber,Matthew R. Schofield,2019-08-13 This comprehensive book, rich with applications, offers a quantitative framework for the analysis of the various capture-recapture models for open animal populations, while also addressing associated computational methods. The state of our wildlife populations provides a litmus test for the state of our environment, especially in light of global warming and the increasing pollution of our land, seas, and air. In addition to monitoring our food resources such as fisheries, we need to protect endangered species from the effects of human activities (e.g. rhinos, whales, or encroachments on the habitat of orangutans). Pests must be be controlled, whether insects or viruses, and we need to cope with growing feral populations such as opossums, rabbits, and pigs. Accordingly, we need to obtain information about a given population's dynamics, concerning e.g. mortality, birth, growth, breeding, sex, and migration, and determine whether the respective population is increasing , static, or declining. There are many methods for obtaining population information, but the most useful (and most work-intensive) is generically known as "capture-recapture," where we mark or tag a representative sample of individuals from the population and follow that sample over time using recaptures, resightings, or dead recoveries. Marks can be natural, such as stripes, fin profiles, and even DNA; or artificial, such as spots on insects. Attached tags can, for example, be simple bands or streamers, or more sophisticated variants such as radio and sonic transmitters. To estimate population parameters, sophisticated and complex mathematical models have been devised on the basis of recapture information and computer packages. This book addresses the analysis of such models. It is primarily intended for ecologists and wildlife managers who wish to apply the methods to the types of problems discussed above, though it will also benefit researchers and graduate students in ecology. Familiarity with basic statistical concepts is essential.

The American Capture of Fort George, Ontario Margaret Coleman,1977 Fort George was reconstructed (between 1936 and 1940) by the Niagara Parks Commission to its pre-1812 dimensions, and transferred to the National Historic Parks. The first of these papers presents an historical background on British use of the Fort and its weaponry, the American capture, and details of events during 1813 and 1814. The second paper describes the guardhouse at Fort George and its use, based on archaelogical evidence and a comparative study of other guardhouses of the period, since no plans survive.

We Have Capture Thomas P. Stafford,Michael Cassutt,2014-01-14 What an amazing career. Tom Stafford attained the highest speed ever reached by a test pilot (28,547 mph), carried a cosmonaut's coffin with Soviet Secretary Leonid Brezhnev, led the team that designed the sequence of missions leading to the original lunar landing, and drafted the original specifications for the B-2 stealth bomber on a piece of hotel stationery. But his crowning achievement was surely his role as America's unofficial space ambassador to the Soviet Union during the darkest days of the Cold War. In this lively memoir written with Michael Cassutt, Stafford begins by recounting his early successes as a test pilot, Gemini and Apollo astronaut, and USAF general. As President Nixon's stand-in at the 1971 Soviet funeral for three cosmonauts, he opened the door to the possibility of cooperation in space between Russians and Americans. Stafford's Apollo-Soyuz team was the first group of Americans to work at the cosmonaut training center, and also the first to visit Baikonur, the top-secret Soviet launch center, in 1974. His 17 July 1975 "handshake in space" with Soviet commander Alexei Leonov (who became a lifelong friend) proved to the world that the two opposing countries could indeed work successfully together. Stafford has continued in this leadership role right up to the present, participating in designing and evaluating the Space Shuttle, Mir, and the International Space Station. He is truly an American hero who personifies the broadest spirit of exploration and cooperation.

Sustainable Carbon Capture Humbul Suleman,Philip Loldrup Fosbøl,Rizwan Nasir,Mariam Ameen,2022-02-16 A comprehensive resource on different aspects of sustainable carbon capture technologies including recent process developments, environmentally friendly methods, and roadmaps for implementations. It discusses also the socio-economic and policy aspects of carbon capture and the challenges, opportunities, and incentives for change with a focus on industry, policy, and governmental sector. Through applications in various fields of environmental health, and four selected case studies from four different practical regimes of carbon capture, the book provides guidelines for sustainable and responsible carbon capture and addresses current and future global energy, environment, and climate concerns.

The Seven Visions of Bull Lodge Fred P. Gone,George P. Horse Capture,1992-01-01 Provides real insight into the religion of the nineteenth-century Gros Ventre (Atsina) Indians. Known to themselves as the White Clay People, this little-known tribe now shares the Fort Belknap Reservation in Montana with the Assiniboines. However, throughout much of their recorded history they were allied with the Blackfeet. The book is a record of the spiritual life of Bull Lodge (born ca. 1802, died 1886), religions leader, healer, and for a time, keeper of the Feathered Pipe, one of the two tribal objects of the Gros Ventres. . . . [It] makes absorbing reading. Beginning at the age of twelve. Bull Lodge sought spiritual power through the tribal Feathered Pipe. From the ages of seventeen to twenty-three he was favored with a series of seven visions on seven buttes that together outline a Gros Ventre cultural geography. . . . The strength of the narrative is the rich detail of ritual description: fasting, sacrifices, vision experiences, the practices of healing. By describing ritual in the context of a man's life, the book gives a uniquely historical understanding of the dynamics of traditional religious life. It provides deeper understanding of the Gros Ventres' way of life and gives a valuable comparative perspective on plains Indian religion.--Raymond J. DeMallie, Western Historical Quarterly. George Horse Capture is field manager of Fort Belknap Ventures. Inc., a tribal enterprise to develop and market traditional Indian art. At present he is helping to establish a tribal museum.

Renewing Cities with Value Capture Planning Raymond Rauscher,2021-01-11 The book offers a model for city development and renewal based on land value capture (called 'value capture'). Firstly, a review is presented of cities around the world that are currently using value capture. From these city examples the author shows how any state, city or regional government can adopt value capture policies. Looking at recent events the author reviews the implications of the coronavirus pandemic (2020) for future planning (including value capture) of cities and regions (particularly noting healthy cities planning). The development of a value capture planning (VCP) model is then outlined. The basis of the model is reflected in its planning components, being: Housing (affordable, social and market housing); Public and Open Spaces (natural areas, open spaces and public

spaces); and, Sustainable Transport (rail, bus, and active transport). The VCP model is devised to provide an economic and planning tool that can be utilised in addressing each of these planning components. This tool includes data entry tables and explanations of how these tables are applied. Four case study cities (within Australia) currently undergoing renewal are selected for the model to be applied to. The areas were chosen to represent contrasting urban settings and types of development and renewal, including: inner city, middle ring city; growth centre city; and, regional capital city. The current (2020) active renewal programs within these areas include (city in brackets): Central to Eveleigh Renewal Area (CERA) (City of Sydney); Sydenham to Bankstown Urban Renewal Corridor (SBURC) (Canterbury Bankstown City); Gosford City Centre Revitalisation (GCCR) area (Gosford City); and, Newcastle City Renewal Area (NCRA) (Newcastle City). The reader is walked through (graphically) the backgrounds of these case study cities, including geography, development trends and details of renewal plans. Conclusions on the VCP model application are outlined for each study area (within that chapter) and for the cumulative results across all study areas (final chapter). With these conclusions, the application of the model to any city or region anywhere in the world is outlined. Finally, on a practical level the reader would be interested in how value capture is administered through programs (including the roles of government, developers and the community). Summing up, the book offers the reader an understanding of current city planning and the tools (like value capture) that will be required for future planning.

The Life, Crime, and Capture of John Wilkes Booth by George Alfred Townsend,2018-07-07 The Life, Crime, and Capture of John Wilkes Booth by George Alfred Townsend LETTER I. THE MURDER. Washington, April 17. Some very deliberate and extraordinary movements were made by a handsome and extremely well-dressed young man in the city of Washington last Friday. At about half-past eleven o'clock A. M., this person, whose name is J. Wilkes Booth, by profession an actor, and recently engaged in oil speculations, sauntered into Ford's Theater, on Tenth, between E and F streets, and exchanged greetings with the man at the box-office. In the conversation which ensued, the ticket agent informed Booth that a box was taken for Mr. Lincoln and General Grant, who were expected to visit the theater, and contribute to the benefit of Miss Laura Keene, and satisfy the curiosity of a large audience. Mr. Booth went away with a jest, and a lightly-spoken Good afternoon. Strolling down to Pumphreys' stable, on C street, in the rear of the National Hotel, he engaged a saddle horse, a high-strung, fast, beautiful bay mare, telling Mr. Pumphreys that he should call for her in the middle of the afternoon.
