**Tell No One** Harlan Coben, 2021-06-29 For Dr. David Beck, the loss was shattering. And every day for the past eight years, he has relived the horror of what happened. The gleaming lake. The pale moonlight. The piercing screams. The night his wife was taken. The last night he saw her alive. Everyone tells him it's time to move on, to forget the past once and for all. But for David Beck, there can be no closure. A message has appeared on his computer, a phrase only he and his dead wife know. Suddenly Beck is taunted with the impossible—that somewhere, somehow, Elizabeth is alive. Beck has been warned to tell no one. And he doesn't. Instead, he runs from the people he trusts the most, plunging headlong into a search for the shadowy figure whose messages hold out a desperate hope. But already Beck is being hunted down. He's headed straight into the heart of a dark and deadly secret—and someone intends to stop him before he gets there.

This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more. ECSCW 2005 Hans Gellersen, Kjeld Schmidt, Michel Beaudouin-Lafon, Wendy Mackay, 2006-01-26 The emergence and widespread use of personal computers and network technologies have seen the development of interest in the use of computers to support cooperative work. This volume presents the proceedings of the ninth European conference on Computer Supported Cooperative Work (CSCW). This is a multidisciplinary area that embraces the development of new technologies grounded in actual cooperative practices. These proceedings contain a collection of papers that reflect the variegated research activities in the field. The volume includes papers addressing novel interaction technologies for CSCW systems, new models and architectures for groupware systems, studies of communication and coordination among mobile actors, studies of cooperative work in complex settings, studies of groupware systems in actual use in real-world settings, and theories and techniques to support the development of cooperative applications. The papers present emerging technologies alongside new methods and approaches to the development of this important class of

applications. The work in this volume represents the best of the current research and practice within CSCW. The collection of papers presented here will appeal to researchers and practitioners alike, as they combine an understanding of the nature of work with the possibility offered by new technologies.

*Teaching Students to Drive Their Brains* Donna Wilson,Marcus Conyers,2016-06-28 If the difference between a student's success and failure were something specific you could teach,

wouldn't you? Metacognition is exactly that—a tool that helps students unlock their brain's amazing power and take control of their learning. Educational researchers and professional developers Donna Wilson and Marcus Conyers have been exploring and using the explicit teaching of metacognition for years, and in this book they share a practical way to teach preK-12 students how to drive their brains by promoting the following practices: \* Adopt an optimistic outlook toward learning, \* Set goals, \* Focus their attention, \* Monitor their progress, and \* Engage in practices that enhance cognitive flexibility. Wilson and Conyers explain metacognition and how it equips students to meet today's rigorous education standards. They present a unique blend of useful metaphors, learning strategies, and instructional tips you can use to teach your students to be the boss of their brains. Sample lessons show these ideas in a variety of classroom settings, and sections on professional practice help you incorporate these tools (and share them with colleagues and parents) so that you are teaching for and with metacognition. Research suggests that metacognition is key to higher student achievement, but studies of classroom practice indicate that few students are taught to use metacognition and the supporting cognitive strategies that make learning easier. You can teach metacognition to your students, so why wouldn't you? This book shows you how.

**3D User Interfaces** Doug Bowman, Ernst Kruijff, Joseph J. LaViola Jr., Ivan P. Poupyrev, 2004-07-26 Here's what three pioneers in computer graphics and human-computer interaction have to say about this book: "What a tour de force—everything one would want—comprehensive, encyclopedic, and authoritative." — Jim Foley "At last, a book on this important, emerging area. It will be an indispensable reference for the practitioner, researcher, and student interested in 3D user interfaces." — Andy van Dam "Finally, the book we need to bridge the dream of 3D graphics with the user-centered reality of interface design. A thoughtful and practical

guide for researchers and product developers. Thorough review, great examples.” — Ben Shneiderman

As 3D technology becomes available for a wide range of applications, its successful deployment will require well-designed user interfaces (UIs). Specifically, software and hardware developers will need to understand the interaction principles and techniques peculiar to a 3D environment. This understanding, of course, builds on usability experience with 2D UIs. But it also involves new and unique challenges and opportunities. Discussing all relevant aspects of interaction, enhanced by instructive examples and guidelines, 3D User Interfaces comprises a single source for the latest theory and practice of 3D UIs. Many people already have seen 3D UIs in computer-aided design, radiation therapy, surgical simulation, data visualization, and virtual-reality entertainment. The next generation of computer games, mobile devices, and desktop applications also will feature 3D interaction. The authors of this book, each at the forefront of research and development in the young and dynamic field of 3D UIs, show how to produce usable 3D applications that deliver on their enormous promise. Coverage includes:

- The psychology and human factors of various 3D interaction tasks
- Different approaches for evaluating 3D UIs
- Results from empirical studies of 3D interaction techniques
- Principles for choosing appropriate input and output devices for 3D systems
- Details and tips on implementing common 3D interaction techniques
- Guidelines for selecting the most effective interaction techniques for common 3D tasks
- Case studies of 3D UIs in real-world applications

To help you keep pace with this fast-evolving field, the book’s Web site, [www.3dui.org](http://www.3dui.org), will offer information and links to the latest 3D UI research and applications.

Microscopic X-Ray Fluorescence Analysis Koen H. A. Janssens, Freddy Adams, Anders Rindby, 2000-06-15 Microscopic X-ray Fluorescence Analysis Edited by Koen H. A. Janssens, Freddy C. V. Adams Department of Chemistry, University of Antwerp, Belgium and Anders Rindby

Department of Physics, Chalmers University of Technology, Göteborg, Sweden In the last 10-15 years many analytical advances in X-ray fluorescence analysis (XRF) have taken place, giving rise to non-destructive ultrasensitive surface analyses of materials. One of the variants of XRF developed is micro-XRF ( $\mu$ -XRF), which is able to analyse the distribution of major, minor and trace elements in microscopic sample surface areas. Due to the availability of commercial instrumentation and the development of simple devices for focusing X-rays,  $\mu$ -XRF has increased in popularity and is able to fill the gap between bulk X-ray fluorescence and electron probe X-ray microanalysis (EPXMA). Microscopic X-ray Fluorescence Analysis is the first single volume to bring together introductory and advanced information on the essential aspects of the technique, thereby providing an excellent overview of the developments and applications of  $\mu$ -XRF. Topics discussed in the book include: \* Interaction of X-rays with matter \* Micro-focusing X-ray optics \* Instrumentation for  $\mu$ -XRF with laboratory and synchrotron sources \* Evaluation and calibration of  $\mu$ -XRF data \* Comparison of  $\mu$ -XRF to other microanalytical techniques. In addition, the final chapters of the book describe applications of  $\mu$ -XRF in the geosciences, in art and archaeology, environmental and biological applications, and the use of  $\mu$ -XRF for industrial purposes. Finally an overview is presented of some of the new directions both laboratory and synchrotron  $\mu$ -XRF are likely to take in the 21st Century.

**Stories from the Field** Peter Krause, Ora Szekely, 2020-06-30 What do you do if you get stuck in an elevator in Mogadishu? How worried should you be about being followed after an interview with a ring of human traffickers in Lebanon? What happens to your research if you get placed on a government watchlist? And what if you find yourself feeling like you just aren't cut out for fieldwork? *Stories from the Field* is a relatable, thoughtful, and unorthodox guide to field research in political science. It features personal stories from working political scientists: some funny, some dramatic, all

fascinating and informative. Political scientists from a diverse range of biographical and academic backgrounds describe research in North and South America, Africa, Asia, Europe, and the Middle East, ranging from archival work to interviews with combatants. In sharing their stories, the book's forty-four contributors provide accessible illustrations of key concepts, including specific research methods like conducting surveys and interviews, practical questions of health and safety, and general principles such as the importance of flexibility, creativity, and interpersonal connections. The contributors reflect not only on their own experiences but also on larger questions about research ethics, responsibility, and the effects of their personal and professional identities on their fieldwork. *Stories from the Field* is an essential resource for graduate and advanced undergraduate students learning about field research methods, as well as established scholars contemplating new journeys into the field.

*Manufacture of Animal Feeds* D. A. Beaven, 1984

Shortlisted Hannah Brenner Johnson, Renee Knake Jefferson, 2022-02-15 Winner, Next Generation Indie Book Awards - Women's Nonfiction Best Book of 2020, National Law Journal The inspiring and previously untold history of the women considered—but not selected—for the US Supreme Court In 1981, Sandra Day O'Connor became the first female justice on the United States Supreme Court after centuries of male appointments, a watershed moment in the long struggle for gender equality. Yet few know about the remarkable women considered in the decades before her triumph. *Shortlisted* tells the overlooked stories of nine extraordinary women—a cohort large enough to seat the entire Supreme Court—who appeared on presidential lists dating back to the 1930s. Florence Allen, the first female judge on the highest court in Ohio, was named repeatedly in those early years. Eight more followed, including Amalya Kearse, a federal appellate judge who was

the first African American woman viewed as a potential Supreme Court nominee. Award-winning scholars Renee Knake Jefferson and Hannah Brenner Johnson cleverly weave together long-forgotten materials from presidential libraries and private archives to reveal the professional and personal lives of these accomplished women. In addition to filling a notable historical gap, the book exposes the tragedy of the shortlist. Listing and bypassing qualified female candidates creates a false appearance of diversity that preserves the status quo, a fate all too familiar for women, especially minorities. Shortlisted offers a roadmap to combat enduring bias and discrimination. It is a must-read for those seeking positions of power as well as for the powerful who select them in the legal profession and beyond.

**On the Turn** Bárbara Arizti, Silvia Martínez-Falquina, 2007 *On the Turn: The Ethics of Fiction in Contemporary Narrative in English* is an attempt to listen to the various voices that participate in the current dialogue on the relationship between fiction and ethics. The editors's (TM) introduction investigates the current state of affairs on the return to ethics in critical and literary consideration, and it opens up the way for the variety of approaches that follows. Participants include internationally recognized scholars like Andrew Gibson, Patricia Waugh, or Native American fiction writer and poet Gordon Henry, winner of the American Book Award in 1995. All in all, contributors cover a significant geographical diversity, and their approaches also vary from general theory to particular examples, from traditional interpretations to post-deconstruction ethics. Authors analyze texts both mainstream and marginal, colonial and postcolonial; they examine the ethics of race, gender and sexuality; the ethics of self-positioning and orientation; the ethics of style; the ethics of reception; the ethics of mode and genre; the ethics of extreme situations of evil, disease and fascism.

In its search for a better understanding of the global/nationalistic world of today, *On the Turn* therefore moves beyond the scope of literary criticism into issues of wider, more urgent relevance. What should I, ought I, may I, must I, do, if anything, on the basis of reading, when I have read a literary work? What does reading a literary work authorize, or even command, me to do? Writing an essay about the work would be one response. *On the Turn* is a wonderfully diverse, learned, challenging, provocative, even sometimes controversial, collection of essays on the ethical dimensions of literature. This book is testimony to the continued lively interest in the ethical turn in literary studies. The authors are, for the most part, concerned with ethical theory and with ethically charged situations in postmodern novels in English, as they shape readers's (TM) values and judgments. Poetry and non-print media are, however, also discussed. J. Hillis Miller UCI Distinguished Research Professor of Comparative Literature and English, University of California at Irvine *The Ethics of Fiction* is an important and exciting volume that explores with energy and rigour the connections between ethics and literature. Relating literature to philosophy, neurobiology, politics, religion, deconstruction and psychoanalysis, the twenty two contributors richly advance â ~the ethical turnâ (TM) recently embraced by many critics. Works by authors such as Ian McEwan, A.S.Byatt, Charles Palliser, Hanif Kureishi, J.M. Coetzee, David Malouf, George Orwell, E.L. Doctorow, Flannery Oâ (TM)Connor, Toni Morrison and Paul Auster are presented in a new light and complex topics such as territoriality, the nature of love, Islamophobia and the politics of representation are tackled with imagination and intellectual integrity. This book is essential reading for anyone interested in the dialogue between ethics and literature. Avril Horner, Professor of English, Kingston University
