Card Control Arthur H. Buckley, 2012-04-30 This profusely illustrated book demonstrates step by step the astonishing card magic cultivated by one of the premier sleight-of-hand artists of the 20th century. It presents maneuvers that have left theater audiences amazed and that card-playing professionals have used to great advantage. It is not a book for beginners, but will help those with basic card expertise reach new levels of performance in their art. Among the moves are shifts, palms, glides, false shuffles, cuts, fans, and steals. You'll learn how to do the false table riffle shuffle, how to deal from the bottom, how to know an opponent's hole card, how to warm up a cold deck, and much more. In addition, the author presents forty dazzling deceptions guaranteed to amaze your audience: Confusion, Birds of a Feather, The Ambitious Card, A Brilliant Climax, Your Favorite Ace, A Quickie, The Obtrusive Queens, and many more. Over 300 photographs show the practitioner's exact hand positions during each critical move. Australian-born Arthur H. Buckley became well known in America for the magic he worked with cards on the major vaudeville circuits of the 1920s. Schooled by the great sleight-of-hand artists he met in the entertainment business and by professional gamblers he met in his early years touring Australia, his absolute mastery of the most artful and demanding card-handling routines was legendary. In 1946, he wrote this practical guide revealing in detail the secrets of his art. Any magician or card conjurer who aspires to the utmost proficiency in card manipulation will want to have this indispensable reference in his or her library.

Audit Guide Stephen William Lipscomb, 2004-04 The fed. gov't. expended \$15 billion through Fed. purchase card programs (PCP) in FY 2002.

Fed. agencies are responsible for establishing and maintaining internal control to provide reasonable assurance that: the goals and objectives of the PCP are met; and safeguards against fraudulent, improper, and abusive purchases are adequate. This guide focuses on audits of internal control activities -- designed to prevent or detect fraudulent, improper, and abusive purchases -- in gov't. PCPs. Provides practical guidance for consideration by internal and external auditors, investigators, and program management oversight personnel in assessing the adequacy and performance of those control activities and identifying areas of internal control for potential improvement.

Purchase Cards Gregory D. Kutz, Ronald Damien Malfi, 2002-02 The DoD is promoting departmentwide use of purchase cards (PC) for obtaining goods and services. PC are used exclusively for gov't.-related purchases; transactions include acquisitions at or below the \$2,500 threshold, commercial training request valued at or below \$25,000, and payments on contracts. The benefits of using PC are lower transaction processing costs and less red tape for both the gov't. and vendors. This audit of the Army's PC program addresses whether: the Army's overall control environ. and mgmt. of the PC program were effective, the Army's internal control activities operated effectively and provide reasonable assurance that PC were used appropriately, and indications existed of fraudulent, improper, and questionable transactions. Plastic Capitalism Sean H. Vanatta, 2024-05-21 How bankers created the modern consumer credit economy and destroyed financial stability in the process American households are awash in expensive credit card debt. But where did all this debt come from? In this history of the rise of postwar American finance, Sean H. Vanatta shows how bankers created our credit card economy and, with it, the indebted nation we know today. America's consumer debt machine was not inevitable. In the years after World War II, state and federal regulations ensured that many Americans enjoyed safe banks and inexpensive credit. Bankers, though, grew restless amid restrictive rules that made profits scarce. They experimented with new services and new technologies. They settled on credit cards, and in the 1960s mailed out reams of high-interest plastic to build a debt industry from scratch. In the 1960s and '70s consumers fought back, using federal and state policy to make credit cards safer and more affordable. But bankers found ways to work around local rules. Beginning in 1980, Citibank and its peers relocated their card plans to South Dakota and Delaware, states with the weakest consumer regulations, creating "on-shore" financial havens and drawing consumers into an exploitative credit economy over which they had little control. We live in the world these bankers made.
