Boy Robot Simon Curtis,2016-10-25 Seventeen-year-old Isaak discovers the truth about his origin and the underground forces that must come together to fight against a secret government organization formed to eradicate those like him in this high-octane science fiction debut. There once was a boy who was made, not created. In a single night, Isaak's life changed forever. His adoptive parents were killed, a mysterious girl saved him from a team of soldiers, and he learned of his own dark and destructive origin. An origin he doesn't want to believe, but one he cannot deny. Isaak is a Robot: a government-made synthetic human, produced as a weapon and now hunted, marked for termination. He and the Robots can only find asylum with the Underground—a secret network of Robots and humans working together to ensure a coexistent future. To be protected by the Underground, Isaak will have to make it there first. But with a deadly military force tasked to find him at any cost, his odds are less than favorable. Now Isaak must decide whether to hold on to his humanity and face possible death...or to embrace his true nature in order to survive, at the risk of becoming the weapon he was made to be. In his debut, recording artist Simon Curtis has written a fast-paced, high-stakes novel that explores humanity, the ultimate power of empathy, and the greatest battle of all: love vs. fear.

Cartoon and TV Robots Prof Charria,2013-12-15 Caution: This book requires that both, parents and children, work together at least 15 minutes a day on reading texts and assembling some robot pieces (only the printed version). Parents will remember all those TV and animated series where a robot was part of the cast. Children will learn about the robots and the importance of science.This is a reading book and also a historic compilation of robots appearing in Cartoon and TV Series. Do you like ROBOTS? This book is a reading book for children from 5 to 80 years old (OK, OK...from 5 to your age). The idea is that every parent and his(her) child spend some few minutes every day practicing reading, explaining the concepts for reading comprehension and learning about robotics. Every book has vocabulary for parents to help children to understand some terms from the world of Robots. Additionally, with very simple tools like glue and scissors, parents and children build the robot's parts, but again it’s recommended to make just one robot part per day. This activity help to build children’s imagination and creativity . It is a wonderful way to develop fine motor skills and something very important nowadays: patience. Some cutting ans folding is a good exercise to help children to figure out geometric figures.Every reading session becomes a fun activity while kids see their own progress in several ways. The more they read the closer they get to have their paper-craft robot as a final reward. Automated printing has limitations and though the desire is to have the paper-craft robot on a sheet with good thickness, we had to use the same paper thickness of the interior pages.
