*Re-platforming the Airline Business* Nawal K. Taneja, 2019-01-23 Airline business models continue to be shaped by powerful forces relating to customers, complexities and regulators. However, at the same time, there are emerging technologies that can help airlines cater to the needs of their changing customer bases and manage the complexities of the business. In his previous books, Nawal Taneja has deliberated on these forces and how the airline industry is poised for disruptive change that could come from within or outside of the industry. He also discussed the point that the airline planning systems and process in use are neither contemporary nor sufficiently integrated to meet the changing needs of customers who now are looking for outcomes, not products. In *Re-platforming the Airline Business: To Meet Travelers' Total Mobility Needs*, Taneja not only reiterates the need for transformation of the airline business but provides a map of the transformational process. This book proposes that different sectors of the aviation industry, particularly airlines and airports, should consider using not just a wide array of technologies (Artificial Intelligence, biometrics, blockchain, and the Internet of Things), but also specifically-designed customer-centric platforms to make informed decisions and to develop and implement transformative strategies to meet travelers' total mobility needs. These technologies and platforms can enable airlines and airports to achieve scale and scope as well as agility and flexibility (through strategic partnerships) to offer intelligently aggregated travel-related services right now. Subsequently, they will enable various members in the travel chain to provide solutions to travelers' global mobility requirements, effectively and with better experiences.

**Chinese Business and the Belt and Road Initiative** Jerry J. Zhang, 2021-09-26 This book looks at how Chinese companies optimize investment opportunities while implementing the Belt and Road Initiative (B&R or BRI). Specifically, it studies five high-profile infrastructure projects undertaken by Chinese firms. Going in-depth through case-study analysis, this book fills a gap by providing the background stories of these projects. By applying a case study approach to five notable and representative B&R projects, including Hambantota Port, the Port de Djibouti, and China-Belarus Industrial Park, it is found that strategies of Chinese firms to implement the BRI have been designed to achieve property rights security, reduction of transaction costs, and internalization of benefits overflowing from expanded business scope or multiple business lines. With firsthand data from host stakeholders and on-ground project managers, this book is a highly relevant and valuable text for policy makers and researchers hoping to understand the policy impact and implications of B&R investments on targeted countries
