What Caused the Financial Crisis Jeffrey Friedman,2011-06-06 The deflation of the subprime mortgage bubble in 2006-7 is widely agreed to have been the immediate cause of the collapse of the financial sector in 2008. Consequently, one might think that uncovering the origins of subprime lending would make the root causes of the crisis obvious. That is essentially where public debate about the causes of the crisis began—and ended—in the month following the bankruptcy of Lehman Brothers and the 502-point fall in the Dow Jones Industrial Average in mid-September 2008. However, the subprime housing bubble is just one piece of the puzzle. Asset bubbles inflate and burst frequently, but severe worldwide recessions are rare. What was different this time? In *What Caused the Financial Crisis* leading economists and scholars delve into the major causes of the worst financial collapse since the Great Depression and, together, present a comprehensive picture of the factors that led to it. One essay examines the role of government regulation in expanding home ownership through mortgage subsidies for impoverished borrowers, encouraging the subprime housing bubble. Another explores how banks were able to securitize mortgages by manipulating criteria used for bond ratings. How this led to inaccurate risk assessments that could not be covered by sufficient capital reserves mandated under the Basel accords is made clear in a third essay. Other essays identify monetary policy in the United States and Europe, corporate pay structures, credit-default swaps, banks' leverage, and financial deregulation as possible causes of the crisis. With contributions from Richard A. Posner, Vernon L. Smith, Joseph E. Stiglitz, and John B. Taylor, among others, *What Caused the Financial Crisis* provides a cogent, comprehensive, and credible explanation of why the crisis happened. It will be an essential resource for scholars and students of finance, economics, history, law, political science, and sociology, as well as others interested in the financial crisis and the nature of modern capitalism and regulation.

Snowball's Chance John Reed,2012-07-31 This unauthorized companion to George Orwell’s *Animal Farm* is a controversial parable about September 11th by one of fiction’s most inventive and provocative writers Written in 14 days shortly after the September 11th attacks, *Snowball’s Chance* is an outrageous and unauthorized companion to George Orwell’s *Animal Farm*, in which exiled pig Snowball returns to the farm, takes charge, and implements a new world order of untrammelled capitalism. Orwell’s “All animals are equal, but some animals are more equal than others” has morphed into the new rallying cry: “All animals are born equal—what they become is their own affair.” A brilliant political satire and literary parody, John Reed’s *Snowball’s Chance* caused an uproar on publication in 2002, denounced by Christopher Hitchens, and barely dodging a lawsuit from the Orwell estate. Now, a decade later, with America in wars on many fronts, readers can judge anew the visionary truth of Reed’s satirical masterpiece.

Hands Across the Water Peter Baines,2011-09-01 Peter Baines started his career as a police officer in the streets of Cabramatta in the early nineties. Becoming a specialist in forensic crime scene investigations he was called upon to bring his skills to the Bali bombings in 2002. But it was the 2004 Boxing Day tsunami that forever changed the direction of his life. Helping the people of Thailand identify their dead, he met the countless children who had been left behind, orphaned, with nowhere to go. With a colleague he decided to do something, and set about creating the charity Hands Across the Water, building an orphanage and raising funds to support and educate the children. This is Peter's story about how one knockabout Aussie bloke can change the lives of thousands by offering a hand.

Multinational Enterprises in India Nagesh Kumar,2002-09-11 Multinational enterprises play a vital role in the economic activity of most developing countries. In India MNE affiliates dominate whole sectors of industry - such as plastics and pharmaceuticals - characterised by a high degree of product differentiation, complex technology and high skill intensity. Such advantages, combined with intangible assets, centralised decision making and global outlook lead to a divergence of approach between MNEs and their local counterparts in host developing countries. This book analyses the inter-industry pattern of MNEs in India in the framework of the internationalisation theory, also examining the comparative behaviour of MNE affiliates and LCEs in terms of conduct and performance. The book goes further to explain the different performance of these two strategic groups by assessing profit and export.
