The Economics of Sports Betting Plácido Rodríguez,Brad R. Humphreys,Robert Simmons, This unique book delves into a number of intriguing issues and addresses several pertinent questions including, should gambling markets be privatized? Is the 'hot hand' hypothesis real or a myth? Are the 'many' smarter than the 'few' in estimating betting odds? How are prices set in fixed odds betting markets? The book also explores the informational efficiency of betting markets and the prevalence of corruption and illegal betting in sports.

Long Island Sound James S. Latimer,Mark A. Tedesco,R. Lawrence Swanson,Charles Yarish,Paul E. Stacey,Corey Garza,2013-11-22 The U.S. Ocean Commission Report identified the need for regional ecosystem assessments to support coastal and ocean management. These assessments must provide greater understanding of physical and biological dynamics than assessments at global and national scales can provide but transcend state and local interests. This need and timeliness is apparent for Long Island Sound, where a multi-state regional restoration program is underway for America's most urbanized estuary. Synthesis of the Long Island Sound ecosystem is needed to integrate knowledge across disciplines and provide insight into understanding and managing pressing issues, such as non-point sources of pollution, coastal development, global climatic change, and invasive species. Currently, there is a need for a comprehensive volume that summarizes the ecological and environmental dynamics and status of Long Island Sound and its myriad ecosystems. It has been 30 years since a

comprehensive summary of Long Island Sound was prepared and 50 years since the pioneering work of Gordon Riley. Major advances in estuarine science are providing new insights into these systems, and yet, the condition of many estuaries is in decline in the face of continuing coastal development. There is an opportunity to lay a foundation for integrative coastal observing systems that truly provide the foundation for improved decision-making. This book will provide a key reference of our scientific understanding for work performed over the past three decades and guide future research and monitoring in a dynamic urbanized estuary.

Gambling Disorders in Women Henrietta Bowden-Jones,Fulvia Prever,2017-07-14 This book brings together an international selection of academics with expertise in problem gambling issues in women, with chapters reflecting ongoing work with female gamblers across the world in both group and individual settings. In choosing such a specific patient group, the authors aim to raise the profile of gambling disorders in women and also provide fellow professionals across the world with a shared understanding of evidence based treatment and recovery in problem gambling literature and research. *Gambling Disorders in Women: An International Female Perspective on Treatment and Research* will provide professionals working in addictions and policy-making with much-needed knowledge about a seriously under-represented area, and about which many professionals feel they would like to know more. The book will also highlight different international approaches to the provision of treatment for women in each country as well as the epidemiology of the illness.

Gambling Giovanni Martinotti,Henrietta Bowden-Jones,2015 Gambling Disorder, or pathological gambling, is a psychiatric condition characterized by persistent and recurrent maladaptive gambling behaviour. Previously considered among impulse control disorders, the new DSM-5 considers Gambling Disorder as a behavioural addiction, sharing neurobiological and clinical similarities with substance-use disorders. However, although Gambling Disorder is a medical illness and as such can be treated, it is crucial to gain a wider perspective on the theme, taking into account all the cultural attitudes, motivations behind its diffusion and relative consequences on the quality of life. But why gamble? Among the wide variety of the material and symbolic functions of gambling, there are the desires for relaxation, excitement, socialization, challenge, and an aesthetic quest. Gambling can also be perceived as an escape from difficult situations. Generally, however, the hope for significant gains to improve the economic situation constitutes the leading motivation. In some cases trying to gamble may represent a tentative to establish a relation with something that is transcendent. In this book the proposed perspectives differ from that of schoolchildren and adolescents to females and indigenous populations. There is an emphasis on important issues as the psychopathological assessment, the availability of treatments and rehabilitation options, the presence of specific temperament and character traits, and other possible consequences of gambling directly depending on the poor quality of life, such as the suicide risk.

A History of the Dublin Metropolitan Police and its Colonial Legacy Anastasia Dukova,2016-10-10 This book illuminates the neglected history of the Dublin Metropolitan Police – a history that has been long overshadowed by existing historiography, which has traditionally been preoccupied with the more radical aspects of Irish history. It explores the origins of the institution and highlights the Dublin Metropolitan Police’s profound influence on the colonial forces, as its legacy reached some of the furthest outposts of the British Empire. In doing so Anastasia Dukova provides much needed nuance and complexity to our understanding of Ireland as a whole, and Dublin in particular, demonstrating that it was far more than a lawless place ravaged by political and sectarian violence. Simultaneously, the book tells the story of the bobby on the beat, the policeman who made the organisation; his work and day, the conditions of service and how they affected or bettered his lot at home and abroad.

Pricing and Revenue Optimization Robert Phillips,2005-08-05 This is the first comprehensive introduction to the concepts, theories, and applications of pricing and revenue optimization. From the initial success of yield management in the commercial airline industry down to more recent successes of markdown management and dynamic pricing, the application of mathematical analysis to optimize pricing has become increasingly important across many different industries. But, since pricing and revenue optimization has involved the use of sophisticated mathematical techniques, the topic has remained largely inaccessible to students and the typical manager. With methods proven in the MBA courses taught by the author at Columbia and Stanford Business Schools, this book presents the basic concepts of pricing and revenue optimization in a form accessible to MBA students, MS students, and advanced undergraduates. In addition, managers will find the practical approach to the issue of pricing and revenue optimization invaluable. Solutions to the end-of-chapter exercises are available to instructors who are using this book in their courses. For access to the solutions manual, please contact marketing@www.sup.org.
