*The Economics of Sports Betting* Plácido Rodríguez, Brad R. Humphreys, Robert Simmons, This unique book delves into a number of intriguing issues and addresses several pertinent questions including, should gambling markets be privatized? Is the 'hot hand' hypothesis real or a myth? Are the 'many' smarter than the 'few' in estimating betting odds? How are prices set in fixed odds betting markets? The book also explores the informational efficiency of betting markets and the prevalence of corruption and illegal betting in sports.

*Lightwave Technology* Govind P. Agrawal, 2005-08-19 The state of the art of modern lightwave system design Recent advances in lightwave technology have led to an explosion of high-speed global information systems throughout the world. Responding to the growth of this exciting new technology, *Lightwave Technology* provides a comprehensive and up-to-date account of the underlying theory, development, operation, and management of these systems from the perspective of both physics and engineering. The first independent volume of this two-volume set, *Components and Devices*, deals with the multitude of silica- and semiconductor-based optical devices. This second volume, *Telecommunication Systems*, helps readers understand the design of modern lightwave systems, with an emphasis on wavelength-division multiplexing (WDM) systems. \* Two introductory chapters cover topics such as modulation formats and multiplexing techniques used to create optical bitstreams \* Chapters 3 to 5 consider degradation of optical signals through loss, dispersion, and nonlinear impairment during transmission and its corresponding impact on system performance \* Chapters 6 to 8 provide readers with strategies for managing degradation induced by amplifier noise, fiber dispersion, and various nonlinear effects \* Chapters 9 and 10 discuss the engineering issues involved in the design of WDM systems and optical networks Each chapter includes problems that enable readers to engage and test their new knowledge to solve problems. A CD containing illuminating examples based on RSoft Design Group's award-winning OptSim optical communication system simulation software is included with the book to assist readers in understanding design issues. Finally, extensive, up-to-date references at the end of each chapter enable students and researchers to gather more information about the most recent technology breakthroughs and applications. With its extensive problem sets and straightforward writing style, this is an excellent textbook for upper-level undergraduate and graduate students. Research scientists and engineers working in lightwave technology will use this text as a problem-solving resource and a reference to additional research papers in the field.

*Warhogs* Stuart D. Brandes, 2014-10-17 The Puritans condemned war profiteering as a Provoking Evil, George Washington feared that it would ruin the Revolution, and Franklin D. Roosevelt promised many times that he would never permit the rise of another crop of war millionaires. Yet on every occasion that American soldiers and sailors served and sacrificed in the field and on the sea, other Americans cheerfully enhanced their personal wealth by exploiting every opportunity that wartime circumstances presented. In *Warhogs*, Stuart D. Brandes masterfully blends intellectual, economic, and military history into a fascinating discussion of a great moral question for generations of Americans: Can some individuals rightly profit during wartime while others sacrifice their lives to protect the nation? Drawing upon a wealth of manuscript sources, newspapers, contemporary periodicals, government reports, and other relevant literature, Brandes traces how each generation in financing its wars has endeavored to assemble resources equitably, to define the ethical questions of economic mobilization, and to manage economic sacrifice responsibly. He defines profiteering to

include such topics as price gouging, quality degradation, trading with the enemy, plunder, and fraud, in order to examine the different guises of war profits and the degree to which they have existed from one era to the next. This far-reaching discussion moves beyond a linear narrative of the financial schemes that have shaped this nation's capacity to make war to an in-depth analysis of American thought and culture. Those scholars, students, and general readers interested in the interaction of legislative, economic, social, and technological events with the military establishment will find no other study that so thoroughly surveys the story of war profits in America.

Jewish Buenos Aires, 1890-1939 Victor A Mirelman, 2018-02-05 Victor Mirelman, in his study of the greatest concentration of Latin American Jewry, examines the changing facade of the Argentinean Jewish community from the beginning of mass Jewish immigration in 1890 to its decline in 1930. During this period, Jews arrived from Russia, Poland, Romania, Syria, Turkey and Morocco Each group founded its own synagogues. mutual help organizations. hospitals. cultural associations. and newspapers of particular vitality was the Yiddish press and the Yiddish theatre. **Economics with Calculus** Michael C. Lovell, 2004 This textbook provides a calculus-based introduction to economics. Students blessed with a working knowledge of the calculus would find that this text facilitates their study of the basic analytical framework of economics. The textbook examines a wide range of micro and macro topics, including prices and markets, equity versus efficiency, Rawls versus Bentham, accounting and the theory of the firm, optimal lot size and just in time, monopoly and competition, exchange rates and the balance of payments, inflation and unemployment, fiscal and monetary policy, IS-LM analysis, aggregate demand and supply, speculation and rational expectations, growth and development, exhaustible resources and over-fishing. While the content is similar to that of conventional introductory economics textbook, the assumption that the reader knows and enjoys the calculus distinguishes this book from the traditional text.

*Publishing Addiction Science* Thomas F. Babor, Kerstin Stenius, Richard Pates, Michal Miovsky', Jean O'Reilly, Paul Candon, 2017-05-24 *Publishing Addiction Science* is a comprehensive guide for addiction scientists facing the complex process of contributing to scholarly journals. Written by an international group of addiction journal editors and their colleagues, it discusses how to write research articles and systematic reviews, choose a journal, respond to reviewers' reports, become a reviewer, and resolve the often difficult authorship, ethical and citation issues that arise in addiction science publishing. As a "Guide for the Perplexed," *Publishing Addiction Science* helps novice as well as experienced researchers to deal with these challenges. It is suitable for university courses and forms the basis of the training workshops offered by the International Society of Addiction Journal Editors (ISAJE). Co-sponsored by ISAJE and the scientific journal *Addiction*, the third edition of *Publishing Addiction Science* gives special attention to the challenges faced by researchers from developing and non-English-speaking countries and features new chapters on guidance for clinician-scientists and the growth of infrastructure and career opportunities in addiction science.

**A triumph of failed ideas: European models of capitalism in the crisis** Steffen Lehndorff, 2012 The current crisis in Europe is being labelled, in mainstream media and politics, as a 'public debt crisis'. The present book draws a markedly different picture. What is happening now is rooted, in a variety of different ways, in the destabilisation of national models of capitalism due to the predominance of neoliberalism since the demise of the post-war 'golden age'. Ten country analyses

provide insights into national ways of coping – or failing to cope – with the ongoing crisis. They reveal the extent to which the respective socio-economic development models are unsustainable, either for the country in question, or for other countries. The bottom-line of the book is twofold. First, there will be no European reform agenda at all unless each country does its own homework. Second, and equally urgent, is a new European reform agenda without which alternative approaches in individual countries will inevitably be suffocated. This message, delivered by the country chapters, is underscored by more general chapters on the prospects of trade union policy in Europe and on current austerity policies and how they interact with the new approaches to economic governance at the EU level. These insights are aimed at providing a better understanding across borders at a time when European rhetoric is being used as a smokescreen for national egoism.

**From Conflict to Inclusion in Housing** Graham Cairns, Georgios Artopoulos, Kirsten Day, 2017-11-13 Socio-political views on housing have been brought to the fore in recent years by global economic crises, a notable rise of international migration and intensified trans-regional movement phenomena. Adopting this viewpoint, *From Conflict to Inclusion in Housing* maps the current terrain of political thinking, ethical conversations and community activism that complements the current discourse on new opportunities to access housing. Its carefully selected case studies cover many geographical contexts, including the UK, the US, Brazil, Australia, Asia and Europe. Importantly, the volume presents the views of stakeholders that are typically left unaccounted for in the process of housing development, and presents them with an interdisciplinary audience of sociologists, planners and architects in mind. Each chapter offers new interpretations of real-world problems, local community initiatives and successful housing projects, and together construct a critique on recent governmental and planning policies globally. Through these studies, the reader will encounter a narrative that encompasses issues of equality for housing, the biopolitics of dwelling and its associated activism, planning initiatives for social sustainability, and the cohabitation of the urban terrain.

**Nanomaterials and Their Biomedical Applications** Tuhin Subhra Santra, Loganathan Mohan, 2021-04-16 This book highlights the evolution of, and novel challenges currently facing, nanomaterials science, nanoengineering, and nanotechnology, and their applications and development in the biological and biomedical fields. It details different nanoscale and nanostructured materials syntheses, processing, characterization, and applications, and considers improvements that can be made in nanostructured materials with their different biomedical applications. The book also briefly covers the state of the art of different nanomaterials design, synthesis, fabrication and their potential biomedical applications. It will be particularly useful for reading and research purposes, especially for science and engineering students, academics, and industrial researchers.
