Anxiety about her new school is causing Charlie's stutter to return. And the villagers are just plain weird. Not least, Agatha, who may not have a broomstick or a cauldron, but is definitely a witch...

Blue Moon Investigations: Case Files 7-9 Steve

Higgs, 2019-10-25 The paranormal? It's all nonsense, but proving might just get them killed. Delve into a world where supernatural crimes are investigated by two detectives standing alone to protect those that call on them. In the brooding, dark landscape of England, with its rolling hills and forgotten castles, the dark breeds evil in every shadow. Or stupid, some of them definitely just contain stupid. With millions of pages read and thousands of books sold, the Blue Moon paranormal investigation series will grip you from the start and rob you of sleep as you continue turning pages until well after your bedtime. It is action-packed, but funny, fast-paced yet intriguing and there are 15 stories already written. Get the third instalment of case files and 3 excitement-filled stories in this omnibus edition and save a pile against buying them individually. The Witches of East Malling – There's a storm brewing. It's late Autumn in England, but the wet weather is hiding a dark crime – witches using lightning to kill! Hired to investigate, Tempest soon becomes a target himself when he comes face to face with a witch and she knows who and what he is. Is he closing in on the coven, or are they closing in on him? The deadly conclusion will leave you breathless. Crop Circles, Cows, and Crazy Aliens – Aliens? Really? There are lights in the sky, crop

circles in the fields and the cows are producing glowing milk. It's Amanda's case, and seems a simple one until the first body shows up. Suddenly she has a mystery person leaving her clues, an internet star trying to help her investigation and conspiracy nuts raining from the sky. Is this the first wave of an alien invasion, or something far worse? Whispers in the Rigging - His dad reported stories of a ghost in the old Royal Dockyard, but that's not why Tempest is going undercover. He's there because his dad was found unconscious in a dumpster when he tried to poke around. Now Tempest must find out what is going on, but all too soon he realises there's something beneath the dockyard that is much worse than ghosts. Praise for the Blue Moon Investigation series and Steve Higgs: 'Be prepared to struggle with getting anything else done, as you will want to keep reading.' 'Supernatural overtones with a hint of sexual tension, interspersed with humor make this a fantastic book.' 'Truly delightful tales of mystery and misadventure.' 'Higgs is a wonderful author with great character development which includes an enticing cast of misfits.' 'A great crime comedy with a group of zany characters. I really enjoyed the book and look forward to the next one. Highly recommended!' 'Higgs makes everything and everyone come alive.'

The Gospel Sounds Like the Witch's Spell Kiyoshi

Umeya,2022-02-10 The Gospel Sounds Like the Witch's Spell is a highly detailed ethnography about how the Jopadhola in eastern

Uganda talk about, interpret and cope with death, illness and other misfortunes. The book presents a provocative discussion that critiques the idea of the revival of witchcraft in the neo-liberalised contemporary world, as represented by the 'modernity model of witchcraft', and attempts to formulate a 'spiderweb model' that connects witchcraft to contemporary society in a more complex manner. The book is a unique ethnography of the collective memory of indigenous knowledge and local historicity. The author moves the reader from curse to misfortune to fortune as he plots the notion of 'curse' as deeply embedded in the Adhola way of life. He weaves between culture, religion, state and modernity with lived experience. Did the concept of witchcraft unwittingly endear the Adhola to the Christian way of life because of the presence of the notion of 'curse' in the Bible or make them less susceptible to the vagaries of modernity compared to their neighbours? These are some of the questions that the author puts on the table in a deeply reflective manner. The phenomenon of witchcraft is given an intriguing angle that invites the reader to reexamine earlier anthropological writings on the subject among African peoples.

Catching a Witch Heidi Eljarbo, 2017-08-01 "An enjoyable read, strong on its portrayal of witch-hunting . . . [and] the tensions between medicine and healing, religion and superstition."

—Historical Novel Society The year 1660 is when it all changed . . . That's when a witch-hunter comes to Clara Dahl's seaside village in Norway. She's horrified to discover how fast her neighbors and friends are to turn against each other. She soon realizes her sleepy, little, picturesque corner of the world has been invaded by evil—and it has nothing to do with witchcraft. As neighbor turns against neighbor, Clara finds herself drawn into the fray, forced to do what she can to protect her friends and loved ones. An educated and upstanding minister's daughter, Clara speaks out against the witch-hunter's unjust treatment of those accused of witchcraft. She sees how he plays the villagers, using their superstitions and religious beliefs to make good people accept

horrible things. When Clara's best friend Bess is accused of being a witch, Clara must make an incredible sacrifice to save not only her friend, but the entire town—before it's too late. "For me, this story is much more about the strength and bond of female friendship, with the persecution of witches as a catalyst forcing them to band together." —Quiet Fury Books "This story really brings you back in time and pulls out so many emotions . . . Interesting and tragic." —What's Beyond Forks? Follow more of Clara Dahl's adventures in *Trailing the Hunter*!

Fish atlas of the Celtic Sea, North Sea, and Baltic Sea

Henk J.L. Heessen, Niels Daan, Jim R. Ellis, 2023-09-14 The atlas presents a unique set of abundance data to describe the spatial, depth, size, and temporal distribution of demersal and pelagic fish species over an extensive marine area, together with accounts of their biology. A large number of pictures, graphs and distribution maps illustrate the text. By largely avoiding - or at least explaining - scientific terms and providing extensive references, the book should be useful for both laymen and scientists. The quantitative information on some 200 fish taxa is derived from 72,000 stations fished by research vessels during the period 1977-2013. The area covers the northwest European shelf from west of Ireland to the central Baltic Sea and from Brittany to the Shetlands. Although the surveys extend beyond the shelf edge, only taxa reported at least once in waters less than 200 m are included. Typical deep-water species and typical fresh-water species are excluded. We hope this publication will contribute to gaining a better understanding of the ocean ecosystems.
