Theoretical Aspects of Computing - ICTAC 2009 Martin Leucker, Charles Carroll Morgan, 2009-08-03

This volume contains the papers presented at ICTAC 2009: the 6th International Colloquium on Theoretical Aspects of Computing held August 18–20, 2009 in Kuala Lumpur, Malaysia, hosted by Universiti Kebangsaan Malaysia. The ICTAC series was founded by the International Institute for Software Technology of the United Nations University (UNU-IIST). It brings together practitioners and researchers from academia, industry and government to present results and to exchange ideas and experience addressing challenges in both theoretical aspects of computing and in the exploitation of theory through methods and tools for system development. The series also promotes cooperation in research and education between participants and their institutions, from developing and industrial countries, in accordance with the mandate of the United Nations University. The previous ICTAC colloquia were held in Guiyang, China (2004, LNCS 3407), Hanoi, Vietnam (2005, LNCS 3722), Tunis, Tunisia (2006, LNCS 4281), Macao SAR, China (2007, LNCS 4711), and Istanbul, Turkey (2008, LNCS 5160). This year, 81 submissions were received, distributed over 70 full research papers and 11 tool papers. Each submission was reviewed by at least three Program Committee members. We thank the members of the Program Committee and the other specialist referees for the effort and skill that they invested in the review and selection process, which was managed using EasyChair. The Committee decided to accept 20 papers: 17 full research papers and 3 tool papers.

Adobe Dreamweaver CS3, 2008 Dreamweaver is the standard by which site designers and managers handle the many components required to run today's typical web presence. The Portfolio Series addresses this powerful tool the same way it does other Creative Suite applications -- the way one has to in the real world of design and site management. Purely project-based, the book offers eight hands-on, step-by-step assignments exactly as they would be handed to someone in the field. Each assignment addresses workflow, task, and process requirements, finishing with a site that works the way it's supposed to. The title provides self-learners, interested readers, students, and professional instructors detailed instructions on how to master the application.

Marcus Contextual Grammars Gheorghe Paun, 2013-04-17 Marcus Contextual Grammars is the first monograph to present a class of grammars introduced about three decades ago, based on the fundamental linguistic phenomenon of strings-contexts interplay (selection). Most of the theoretical results obtained so far about the many variants of contextual grammars are presented with emphasis on classes of questions with relevance for applications in the study of natural language syntax: generative powers, descriptive and computational complexity, automata recognition, semilinearity, structure of the generated strings, ambiguity, regulated rewriting, etc. Constant comparison with families of languages in the Chomsky hierarchy is made. Connections with non-linguistic areas are established, such as molecular computing. Audience: Researchers and students in theoretical computer science (formal language theory and automata theory), computational linguistics, mathematical methods in linguistics, and linguists interested in formal models of syntax.

Call-By-Push-Value P.B. Levy,2012-12-06 Call-by-push-value is a programming language paradigm that, surprisingly, breaks down the call-by-value and call-by-name paradigms into simple primitives. This monograph, written for graduate students and researchers, exposes the call-by-push-value structure underlying a remarkable range of semantics, including operational semantics, domains, possible worlds, continuations and games.

Indigenous Language Media in Africa 'Biodun Salawu,2006 Indigenous language publishing in Africa started with Christian missionaries, and in part by Islamic clerics. The socio-political and economic changes since then have greatly affected indigenous language media. Here, twenty scholars examine aspects of those changes; they are from Nigeria, Uganda, Malawi, Cameroon, Kenya and Congo; with contributions also from USA and UK. Future prospects are explored, and the possibilities for improving the prospects of the genre. Covering the written word and the broadcast media, the work is a pioneering documentation of a neglected subject of academic study.
