United States Code United States, 2013 The United States Code is the official codification of the general and permanent laws of the United States of America. The Code was first published in 1926, and a new edition of the code has been published every six years since 1934. The 2012 edition of the Code incorporates laws enacted through the One Hundred Twelfth Congress, Second Session, the last of which was signed by the President on January 15,

2013. It does not include laws of the One Hundred Thirteenth Congress, First Session, enacted between January 2, 2013, the date it convened, and January 15, 2013. By statutory authority this edition may be cited U.S.C. 2012 ed. As adopted in 1926, the Code established prima facie the general and permanent laws of the United States. The underlying statutes reprinted in the Code remained in effect and controlled over the Code in case of any discrepancy. In 1947, Congress began enacting individual titles of the Code into positive law. When a title is enacted into positive law, the underlying statutes are repealed and the title then becomes legal evidence of the law. Currently, 26 of the 51 titles in the Code have been so enacted. These are identified in the table of titles near the beginning of each volume. The Law Revision Counsel of the House of Representatives continues to prepare legislation pursuant to 2 U.S.C. 285b to enact the remainder of the Code, on a title-by-title basis, into positive law. The 2012 edition of the Code was prepared and published under the supervision of Ralph V. Seep, Law Revision Counsel. Grateful acknowledgment is made of the contributions by all who helped in this work, particularly the staffs of the Office of the Law Revision Counsel and the Government Printing Office--Preface.

Transnational France Tyler Stovall,2018-04-20 In this compelling volume, Tyler Stovall takes a transnational approach to the history of modern France, and by doing so draws the reader into a key aspect of France's political culture: universalism. Beginning with the French Revolution and its aftermath, Stovall traces the definitive establishment of universal manhood suffrage and the abolition of slavery in 1848. Following this critical time in France's history, Stovall then explores the growth of urban and industrial society, the beginnings of mass immigration, and the creation of a new, republican Empire. This time period gives way to the history of the two world wars, the rise of political movements like Communism and Fascism, and new directions in popular culture. The text concludes with the history of France during the Fourth and Fifth republics, concentrating on decolonization and the rise of postcolonial society and culture. Throughout these major historical events Stovall examines France's relations with three other areas of the world: Europe, the United States, and France's colonial empire, which includes a wealth of recent historical studies. By exploring these three areas-and their political, social, and cultural relations with France-the text will provide new insights into both the nature of French identity and the making of the modern world in general.
