Perspectives and Trends in Education and Technology Anabela Mesquita,António Abreu,João Vidal Carvalho,2022 This book presents high-quality, peer-reviewed papers from the International Conference in Information Technology & Education (ICITED 2021), to be held at the ESPM - Higher School of Advertising and Marketing, Sao Paulo, Brazil, between the 15th and the 17th of July 2021. The book covers a specific field of knowledge. This intends to cover not only two fields of knowledge - Education and Technology - but also the interaction among them and the impact/result in the job market and organizations. It covers the research and pedagogic component of Education and Information Technologies but also the connection with society, addressing the three pillars of higher education. The book addresses impact of pandemic on education and use of technology in education. Finally, it also encourages companies to present their professional cases which is discussed. These can constitute real examples of how companies are overcoming their challenges with the uncertainty of the market.

Evidence-Based Geriatric Nursing Protocols for Best Practice, Fifth Edition Marie Boltz, PhD, RN, GNP-BC, FGSA, FAAN, Elizabeth Capezuti, PhD, RN, FAAN, Terry T. Fulmer, PhD, RN, FAAN, DeAnne Zwicker, DrNP, APRN, BC, 2016-03-28 This new edition of one of the premier references for geriatric nurses in hospital, long-term, and community settings delivers current guidelines, real-life case studies, and evidence-based protocols developed by master educators and practitioners. With a focus on improving quality of care, cost-effectiveness, and outcome, the fifth edition is updated to provide the most current information about care of common clinical conditions and issues in older patients. Several new expert contributors present current guidelines about hip fractures, frailty, perioperative and postoperative care, palliative care, and senior-friendly emergency departments. Additionally, chapters have been reorganized to enhance logical flow of content and easy information retrieval. Protocols, systematically tested by more than 300 participating NICHE (Nurses Improving Care for Health system Elders) hospitals, are organized in a consistent format and include an overview, evidence-based assessment and intervention strategies, and an illustrative case study with discussion. Additionally, protocols are embedded within chapter text, providing the context and detailed evidence for each. Chapter objectives, annotated references, and evidence ratings for each protocol are provided along with resources for additional study. New to the Fifth Edition: Reorganized to enhance logical flow of information and ease of use Updated and revised Includes new contributions from expert educators and practitioners Provides new chapters on perioperative and postoperative care, general surgical care, care of hip fracture, palliative care, and the senior-friendly emergency department Key Features: Includes PowerPoints and a test bank for instructors Delivers evidence-based, current guidelines and protocols for care of common clinical conditions in the older person Illustrates the application of clinical protocols to real-life practice through case studies and discussion Edited by nationally known geriatric leaders who are endorsed by the Hartford Institute for Geriatric Nursing and NICHE Written for nursing students, nurse leaders, and practitioners at all levels, including those in specialty roles

5th International Conference on Practical Applications of Computational Biology & Bioinformatics

Miguel P. Rocha, Juan Manuel Corchado Rodríguez, Florentino Fdez Riverola, Alfonso

Valencia, 2011-03-09 The growth in the Bioinformatics and Computational Biology fields over the last few years has been remarkable and the trend is to increase its pace. In fact, the need for computational techniques that can efficiently handle the huge amounts of data produced by the new experimental techniques in Biology is still increasing driven by new advances in Next Generation Sequencing, several types of the so called omics data and image acquisition, just to name a few. The analysis of the datasets that produces and its integration call for new algorithms and approaches from fields such as Databases, Statistics, Data Mining, Machine Learning, Optimization, Computer Science and Artificial Intelligence. Within this scenario of increasing data availability, Systems Biology has also been emerging as an alternative to the reductionist view that dominated biological research in the last decades. Indeed, Biology is more and more a science of information requiring tools from the computational sciences. In the last few years, we have seen the surge of a new generation of interdisciplinary scientists that have a strong background in the biological and computational sciences. In this context, the interaction of researchers from different scientific fields is, more than ever, of foremost importance boosting the research efforts in the field and contributing to the education of a new generation of Bioinformatics scientists. PACBB'11 hopes to contribute to this effort promoting this fruitful interaction. PACBB'11 technical program included 50 papers from a submission pool of 78 papers spanning many different sub-fields in Bioinformatics and Computational Biology. Therefore, the conference will certainly have promoted the interaction of scientists from diverse research groups and with a distinct background (computer scientists, mathematicians, biologists). The scientific content will certainly be challenging and will promote the improvement of the work that is being developed by each of the participants.

The result is a must-have for every plastic surgeon's library! Master 20 essential plastic surgery procedures including open and closed rhinoplasty, abdominal wall reconstruction, expander/implant reconstruction of the breast (including latissimus dorsi technique), local flaps for facial coverage (including cheek and lip reconstruction), cleft lip and cleft palate repair, flexor tendon reconstructions, and more. Depend on the preeminent authority that has made Dr. Neligan's Plastic Surgery, 3rd Edition the most trusted reference in plastic surgery. Review techniques quickly and easily thanks to a highly templated, bulleted format. See what to look for and how to proceed by viewing full-color photos throughout. Access the complete content and procedural videos online at Expert Consult.

Scar Management - ECAB Niti Khunger, Anil Ganjoo, 2013-07-12 A number of scar revision techniques can be utilized to treat specific types of scars, in combination with each other or with adjunctive therapies to achieve optimal results. Pathological conditions like hypertrophic scars and keloids are still challenging. Though a number of therapies exist to treat keloids, such as intralesional steroids and anti-metabolites, cryosurgery, to name a few, none are definitive in treatment. Understanding the molecular basis of keloids may lead to development of new therapies. Striae, also known as 'stretch marks', are extremely common, disfiguring and a real challenge to treat. Management of striae is a neglected field of research. Except for topical retinoids, the efficacy satisfactorily. Current treatment options include chemical peels, lasers and collagen induction therapy, with a tendency towards active intervention. However, studies are necessary to determine treatment strategies which produce results that are effective with minimal adverse effects. Post-acne scarring is one of the most common causes of facial scars, causing considerable cosmetic disability. Acne is a common skin disorder, unfortunately affecting a large number of teenagers. Usually patients have a combination of different types of scars; hence no single modality is useful. A combination of procedures is generally required for a satisfactory cosmetic outcome. The use of fractional lasers is gaining importance, as it is a minimally invasive procedure as compared to aggressive resurfacing procedures of the past. Collagen induction therapy is another promising technique. Today, patients are

also getting up-to-date information about the various modalities available for scar treatment through media, such as magazines, advertisements and internet. However, exaggerated advertisements and information from nonprofessional sources, particularly with regard to lasers can influence patient expectations and result in unrealistic expectations. Patients need to understand that deep scars cannot be eliminated fully and can only be improved. They usually have high expectations from procedural techniques. Proper counseling is extremely important for a happy and satisfactory outcome. Current innovations and techniques in scar prevention and management and increasing use of minimally invasive surgeries are paving the way toward smoother, less noticeable scars. Every surgeon practicing aesthetics should be well versed with modalities of scar management and this is the aim of this clinical update.

The Pickering Genealogy Harrison Ellery, Charles Pickering Bowditch, 1897

Chinese Annals in the Western Observatory Edward Shaughnessy, 2019-11-18 Since the beginning of the twentieth century, hundreds of thousands of documents of all sorts have been unearthed in China, opening whole new fields of study and transforming our modern understanding of ancient China. While these discoveries have necessarily taken place in China, Western scholars have

also contributed to the study of these documents throughout this entire period. This book provides a comprehensive survey of the contributions of these Western scholars to the field of Chinese paleography, and especially to study of oracle-bone inscriptions, bronze and stone inscriptions, and manuscripts written on bamboo and silk. Each of these topics is provided with a comprehensive narrative history of studies by Western scholars, as well as an exhaustive bibliography and biographies of important scholars in the field. It is also supplied with a list of Chinese translations of these studies, as well as a complete index of authors and their works. Whether the reader is interested in the history of ancient China, ancient Chinese paleographic documents, or just in the history of the study of China as it has developed in the West, this book provides one of the most complete accounts available to date.
