George III G. Ditchfield,2002-10-31 This book is a political study of the reign of George III which draws upon unpublished sources and takes account of recent research to present a rounded appreciation of one of the most important and controversial themes in British history. Hiera kala Straten,2015-08-24 Hierà kalá presents a collection, analysis and interpretation of the representations of animal sacrifice from ancient Greece. The Archaic and Classical material is dealt with comprehensively. Later evidence is adduced more selectively, for the sake of comparison. All aspects of Greek sacrifice that are (or appear to be) represented in the iconographical material are treated in depth; interpretations are based on a combined study of the archaeological, the epigraphical and the literary data. Full catalogues of vase paintings and votive reliefs with depictions of sacrifice are included. A generous selection of these are illustrated in more than 200 figures.

Consumer Psychology Brian M. Young,2018-07-04 This book approaches consumer psychology from a unique perspective - it covers the entire lifespan, from birth to old age. Childhood and youth are not discussed as areas special, different and remote from the rest of consumer research but are integrated into our development as humans. Consumption is viewed as a process by groups and individuals with the cycle continuing through to disposal or ownership and possession. The author discusses how people's natural lifespan influences their relationship to the things they own, how preferences are developed from childhood and how motivations for purchases change throughout their lives from childhood to old age. This book brings together the most recent findings and theories on child and youth consumption, including children's understanding of advertising and marketing, teen and youth identities and their consumption tastes. Moving through Erikson's life stages chapters continue on to adulthood, the mid-life 'crisis' and possessions and ownership in older consumers. This is a deeply interdisciplinary work that will be of interest to scholars across the fields of psychology, business and marketing, as well as to the more general consumer.

Xerxes Richard Stoneman,2015-08-15 Xerxes, Great King of the Persian Empire from 486-465 B.C., has gone down in history as an angry tyrant full of insane ambition. The stand of Leonidas and the 300 against his army at Thermopylae is a byword for courage, while the failure of Xerxes' expedition has overshadowed all the other achievements of his twenty-two-year reign. In this lively and comprehensive new biography, Richard Stoneman shows how Xerxes, despite sympathetic treatment by the contemporary Greek writers Aeschylus and Herodotus, had his reputation destroyed by later Greek writers and by the propaganda of Alexander the Great. Stoneman draws on the latest research in Achaemenid studies and archaeology to present the ruler from the Persian perspective. This illuminating volume does not whitewash Xerxes' failings but sets against them such triumphs as the architectural splendor of Persepolis and a consideration of Xerxes' religious commitments. What emerges is a nuanced portrait of a man who ruled a vast and multicultural empire which the Greek communities of the West saw as the antithesis of their own values.

Remembering Heraclitus Richard G. Geldard,2000 Fragments of Heraclitus: To be wise is one thing: to know the thought that directs all things through all things. We should not act like the children of our parents. This bright, deep, meditative jewel-like study brings Heraclitus to life in a new way, and shows him to be one of the principal sources of Western mystical thinking. From Geldard's point of view, the study of Heraclitus is not just an academic matter but, on the contrary, presents us with very real existential and phenomenological challenges. The book includes new translations of all the essential fragments. Geldard, through his exploration of Heraclitus, shows us, The more that human beings openly and humbly seek higher knowledge, the more they develop the power to perceive it, until finally they penetrate to the hidden universal order. The result of this penetration is knowledge of the Logos, that 'which directs all things through all things.' The acquisition of this knowledge is not an event; it is a stance in the world. It is Being in its fullness. The Art of Commedia M. A. Katritzky,2006 Italian comedians attracted audiences to performances at every level, from the magnificent Italian, German and French court festival appearances of Orlando di Lasso or Isabella Andreini, to the humble street trestle lazzi of anonymous quacks. The characters they inspired continue to exercise a profound cultural influence, and an understanding of the commedia dell'arte and its visual record is fundamental for scholars of post-1550 European drama, literature, art and music. The 340 plates presented here are considered in the light of the rise and spread of commedia stock types, and especially Harlequin, Zanni and the actresses. Intensively researched in public and private collections in Oxford, Munich, Florence, Venice, Paris and elsewhere, they complement the familiar images of Jacques Callot and the Stockholm Recueil Fossard within a framework of hundreds of significant pictures still virtually unknown in this context. These range from anonymous popular prints to pictures by artists such as Ambrogio Brambilla, Sebastian Vrancx, Jan Bruegel, Louis de Caulery, Marten de Vos, and members of the Valckenborch and Francken clans. This volume, essential for commedia dell'arte specialists, represents an invaluable reference resource for scholars, students, theatre practitioners and artists concerned with commedia-related aspects of visual, dramatic and festival culture, in and beyond Italy.
