- **Sunny Makes a Splash: A Graphic Novel (Sunny #4)** Jennifer L. Holm,2021-09-21 The latest in the New York Times bestselling Sunny series brings Sunny into a sink-or-swim summer, where she needs to float her first job and dive into her first maybe-flirtation. It's summer, and Sunny is BORED. Most of her friends are out of town. Her mom wants her to baby-sit way more than Sunny wants to baby-sit. There's nothing good on TV. The only place that's cool (in a not-boring sense) and cool (in a not-hot sense) is the community pool. Sunny loves going there . . . and loves it even more when she's offered a job at the snack shack. Soon she's flinging fries and serving soft ice-cream like a pro . . . with the assistance of the very sweet boy who works with her. Sunny's mom isn't sure Sunny should be quite so independent. But Sunny is definitely sure: Life is best when it's free swim.
- Hand to Hold JJ Heller,2021-07-20 This heartwarming picture book reassures children that a parent's love never lets go—based on the poignant lyrics of JJ Heller's beloved lullaby "Hand to Hold." "May the living light inside you be the compass as you go / May you always know you have my hand to hold." With delightful illustrations and an engaging rhyme scheme, this book offers the promise of security and love every child's heart longs to know. From skipping stones and counting stars to climbing trees and telling stories, every moment is wrapped snugly in the certain warmth of a parent's presence and God's blessing. With poignancy and joy, this bedtime read captures the unconditional love parents want their children to know but so often fail to express amid the chaos of daily life.

- Thermodynamic Mechanism of MQL Grinding with Nano Bio-lubricant Changhe Li,2023-12-01 This book discusses the thermodynamic mechanism of MQL grinding with nano-biological lubricant from the force, heat, surface integrity, and micro-morphology. It makes up the fatal defect of the lack of heat transfer capability of traditional MQL grinding. The machining accuracy, surface quality, especially surface integrity of the workpiece, are significantly improved; at the same time, the service life of the grinding wheel is increased and the working environment is improved. The general scope of the book's content is the effects of MQL grinding with nano-bio-lubricant on grinding force, thermal mechanism, and surface. It provides a new method of sustainable green grinding for environment-friendly, resource-saving, and energy-efficient utilization and solves the technical bottleneck of the insufficient capacity in MQL heat transfer.
