**Feedback Systems** Karl Johan Åström,Richard M. Murray,2021-02-02 The essential introduction to the principles and applications of feedback systems—now fully revised and expanded This textbook covers the mathematics needed to model, analyze, and design feedback systems. Now more user-friendly than ever, this revised and expanded edition of Feedback Systems is a one-volume resource for students and researchers in mathematics and engineering. It has applications across a range of disciplines that utilize feedback in physical, biological, information, and economic systems. Karl Åström and Richard Murray use techniques from physics, computer science, and operations research to introduce control-oriented modeling. They begin with state space tools for analysis and design, including stability of solutions, Lyapunov functions, reachability, state feedback observability, and estimators. The matrix exponential plays a central role in the analysis of linear control systems, allowing a concise development of many of the key concepts for this class of models. Åström and Murray then develop and explain tools in the frequency domain, including transfer functions, Nyquist analysis, PID control, frequency domain design, and robustness. Features a new chapter on design principles and tools, illustrating the types of problems that can be solved using feedback Includes a new chapter on fundamental limits and new material on the Routh-Hurwitz criterion and root locus plots Provides exercises at the end of every chapter Comes with an electronic solutions manual An ideal textbook for undergraduate and graduate students Indispensable for researchers seeking a self-contained resource on control theory

*It Happens in Louisiana* Sam Irwin,2021-03-22 Only in the Bayou State do Louisianans travel door to door on horseback collecting gumbo ingredients for Mardi Gras gatherings. Residents compete in egg pàquer contests to see who can crack their opponent's Easter egg first. Louisiana is a place where frequent collisions with natural disasters can inspire a drink like Pat O'Brien's famous hurricane. And the state's history is filled with colorful figures like Governor Earl K. Long, whose wife committed him to a mental institution--only for him to use his political pull to inspire his own release. Elsewhere these accounts may seem odd or farfetched, but it all happens in Louisiana. Join author Sam Irwin as he details these intriguing Pelican State stories with pithy observations, humorous asides and droll determinations.
